## **Rebuilding Urban Neighborhoods Achievements Opportunities And Limits:**

**Rebuilding Urban Neighborhoods** W Dennis Keating, Norman Krumholz, 1999-08-21 Reports on progress in the fight against the ingrained poverty and social problems of many of the USA's most devastated areas. Extensive case studies are provided from Atlanta, Camden, Chicago, Cleveland, East St. Louis, Los Angeles, Miami, and New York City. *Rebuilding Urban Neighborhoods* W Dennis Keating, Norman Krumholz, 1999-08-21. *Rebuilding Urban Neighborhoods* presents a timely look at some of the most troubled neighborhoods in eight American cities: Atlanta, Camden, Chicago, Cleveland, East Saint Louis, Los Angeles, Miami, and New York City. The authors, W Dennis Keating and Norman Krumholz, review past federal policies and early assessments of the latest federal initiative, the Empowerment Zone. They find some signs of revival even in the most distressed urban neighborhoods but often as an overlay to persistent poverty and social problems. The case studies emphasize the important roles played by Community Development Corporations, and the book concludes with an analysis of the future prospects for distressed urban neighborhoods.

**Fragmented Democracy** Jamila Michener, 2018-03-22. Medicaid is the single largest public health insurer in the United States, covering upwards of 70 million Americans. Crucially, Medicaid is also an intergovernmental program that yokes poverty to federalism: the federal government determines its broad contours, while states have tremendous discretion over how Medicaid is designed and implemented. Where some locales are generous and open-handed, others are tight-fisted and punitive. In *Fragmented Democracy*, Jamila Michener demonstrates the consequences of such disparities for democratic citizenship. Unpacking how federalism transforms Medicaid beneficiaries' interpretations of government and structures their participation in politics, the book examines American democracy from the vantage point of those who are living in or near poverty, disproportionately Black or Latino, and reliant on a federated government for vital resources.

**Loserville** Clayton Trutor, 2022-02. 2023 Bell Award for the Best Book on Georgia History. A Sports Collectors Digest Best Baseball Book of 2022. A Public Books Public Pick of 2022. In July 1975, the editors of the *Atlanta Constitution* ran a two-part series entitled *Loserville, U.S.A.* The provocatively titled series detailed the futility of Atlanta's four professional sports teams in the decade following the 1966 arrival of its first two major league franchises: Major League Baseball's Atlanta Braves and the National Football League's Atlanta Falcons. Two years later, the Atlanta Hawks of the National Basketball Association became the city's third major professional sports franchise. In 1972, the National Hockey League granted the Flames expansion franchise to the city, making Atlanta the first southern city with teams in all four of the big leagues. The excitement surrounding the arrival of four professional franchises in Atlanta in a six-year period soon gave way to widespread frustration and eventually widespread apathy toward its home teams. All four of Atlanta's franchises struggled in the standings and struggled to draw fans to their games. Atlantans' indifference to their new teams took place amid the social and political fracturing that had resulted from a new Black majority in Atlanta and a predominately white suburban exodus. Sports could never quite bridge the divergence between the two. *Loserville* examines the pursuit, arrival, and response to professional

sports in Atlanta during its first decade as a major league city 1966-75 It scrutinizes the origins of what remains the primary model for acquiring professional sports franchises: offers of municipal financing for new stadiums Other Sunbelt cities like San Diego, Phoenix, and Tampa that aspired to big league stature adopted Atlanta's approach Like the teams in Atlanta, the franchises in these cities have had mixed results both in terms of on-field success and financial stability The Chicago Freedom Movement Mary Lou Finley, Bernard LaFayette Jr., James R. Ralph Jr., Pam Smith, 2016-04-22 Six months after the Selma to Montgomery marches and just weeks after the passage of the Voting Rights Act of 1965, a group from Martin Luther King Jr.'s staff arrived in Chicago eager to apply his nonviolent approach to social change in a northern city Once there, King's Southern Christian Leadership Conference (SCLC) joined the locally based Coordinating Council of Community Organizations (CCCO) to form the Chicago Freedom Movement The open housing demonstrations they organized eventually resulted in a controversial agreement with Mayor Richard J. Daley and other city leaders, the fallout of which has historically led some to conclude that the movement was largely ineffective In this important volume, an eminent team of scholars and activists offer an alternative assessment of the Chicago Freedom Movement's impact on race relations and social justice both in the city and across the nation Building upon recent works, the contributors reexamine the movement and illuminate its lasting contributions in order to challenge conventional perceptions that have underestimated its impressive legacy **The Business of Black Power** Laura Warren Hill, Julia Rabig, 2012 Explores business development in the Black power era and the centrality of economic goals to the larger Black freedom movement The Business of Black Power emphasizes the centrality of economic goals to the larger Black freedom movement and explores the myriad forms of business development in the Black power era This volume charts a new course for Black power studies and business history, exploring both the business ventures that Black power fostered and the impact of Black power on the nation's business world Black activists pressed business leaders, corporations, and various levels of government into supporting a range of economic development ventures from Black entrepreneurship to grassroots experiments in economic self-determination to indigenous attempts to rebuild inner-city markets in the wake of disinvestment They pioneered new economic and development strategies often in concert with corporate executives and public officials Yet these same actors also engaged in fierce debates over the role of business in strengthening the movement and some African Americans outright rejected capitalism or collaboration with business The ten scholars in this collection bring fresh analysis to this complex intersection of African American and business history to reveal how Black power advocates or those purporting a Black power agenda engaged business to advance their economic, political, and social goals They show the business of Black power taking place in the streets, boardrooms, journals, and periodicals, corporations, courts, and housing projects of America In short, few were left untouched by the influence of this movement Laura Warren Hill is assistant professor of history at Bloomfield College Julia Rabig is a lecturer at Dartmouth College **Case Study Research and Applications** Robert K. **Housing Policy in the United States** Alex F. Schwartz, 2014-08-07 The classic primer for its

subject Housing Policy in the United States has been substantially revised in the wake of the 2007 near collapse of the housing market and the nation's recent signs of recovery. Like its previous editions, this standard volume offers a broad overview of the field but expands to include new information on how the crisis has affected the nation's housing challenges and the extent to which the federal government has addressed them. Schwartz also includes the politics of austerity that has permeated almost all aspects of federal policymaking since the Congressional elections of 2010, new initiatives to rehabilitate public housing, and a new chapter on the foreclosure crisis. The latest available data on housing conditions, housing discrimination, housing finance, and programmatic expenditures is included along with all new developments in federal housing policy. This book is the perfect foundational text for urban studies, urban planning, social policy, and housing policy courses.

**Making Our Neighborhoods, Making Our Selves** George C. Galster, 2019-03-13 Drawing on economics, sociology, geography, and psychology, Galster delivers a clear-sighted explanation of what neighborhoods are, how they come to be, and what they should be. Urban theorists have tried for decades to define exactly what a neighborhood is. But behind that daunting existential question lies a much murkier problem: never mind how you define them, how do you make neighborhoods productive and fair for their residents? In *Making Our Neighborhoods, Making Our Selves*, George C. Galster delves deep into the question of whether American neighborhoods are as efficient and equitable as they could be, socially, financially, and emotionally, and if not, what we can do to change that. Galster aims to redefine the relationship between places and people, promoting specific policies that reduce inequalities in housing markets and beyond.

**Urban Research Monitor**, 1998

**Environmental Policy Analysis and Practice** Michael R. Greenberg, 2008-03-13 Pressing environmental challenges are frequently surrounded with stakeholders on all sides of the issues. Opinions expressed by government agencies, the private sector, special interests, nonprofit communities, and the media, among others, can quickly cloud the dialogue, leaving one to wonder how policy decisions actually come about. In *Environmental Policy Analysis and Practice*, Michael R. Greenberg cuts through the complicated layers of bureaucracy, science, and the public interest to show how all policy considerations can be broken down according to six specific factors: 1. the reaction of elected government officials, 2. the reactions of the public and special interests, 3. knowledge developed by scientists and engineers, 4. economics, 5. ethical imperatives, and 6. time pressure to make a decision. The book is organized into two parts, with the first part defining and illustrating each one of these criteria. Greenberg draws on examples such as nuclear power, pesticides, brownfield redevelopment, gasoline additives, and environmental cancer, but focuses on how these subjects can be analyzed rather than exclusively on the issues themselves. Part two goes on to describe a set of over twenty tools that are used widely in policy analysis, including risk assessment, environmental impact analysis, public opinion surveys, cost-benefit analysis, and others. These tools are described and then illustrated with examples from part one. Weaving together an impressive combination of practical advice and engaging first-person accounts from government officials,

administrators and leaders in the fields of public health and medicine this clearly written volume is poised to become a leading text in environmental policy      **New Day Begun** R. Drew Smith, 2003-07-02 This collection discusses African American churches involvement in post civil rights era political culture with regard to faith based services black nationalism evangelism and community development
