Urban Politics and Policy in the United States Christine Kelleher Palus, Richardson Dilworth, 2016-02-11 The CQ Press
 Guide to Urban Politics and Policy in the United States will bring the CQ Press reference guide approach to topics in urban
 politics and policy in the United States If the old adage that all politics is local is even partially true then cities are important
 centers for political activity and for the delivery of public goods and services U S cities are diverse in terms of their political
 and economic development demographic makeup governance structures and public policies Yet there are some durable
 patterns across American cities too Despite differences in governance and or geographic size most cities face similar
 challenges in the management of public finances the administration of public safety and education And all U S cities have a
 similar legal status within the federal system This reference guide will help students understand how American cities from
 old to new have developed over time Part I how the various city governance structures allocate power across city officials
 and agencies Part II how civic and social forces interact with the organs of city government and organize to win control over
 these organs and or their policy outputs Part III and what patterns of public goods and services cities produce for their
 residents Part IV The thematic and narrative structure allows students to dip into a topic in urban politics for deeper
 historical and comparative context than would be possible in either an A to Z encyclopedia entry or in an urban studies
 course text FEATURES Approximately 40 chapters organized in major thematic parts in one volume available in both print
 and electronic formats Front matter includes an Introduction by the Editors along with biographical backgrounds about the

Editors and the Contributing Authors Back matter includes a compilation of relevant topical data or tabular presentation of major historical developments population growth size of city budgets etc or historical figures e g mayors a bibliographic essay and a detailed index Sidebars are provided throughout and chapters conclude with References Further Readings and Cross References to related chapters as links in the e version This Guide is a valuable reference on the topics in urban politics and policy in the United States The thematic and narrative structure allows researchers to dip into a topic in urban politics for a deeper historical and comparative context than would be possible in either an A to Z encyclopedia entry or in an urban studies course text The Routledge Handbook of Poverty in the United States Stephen Haymes, Maria Vidal de

Haymes, Reuben Miller, 2014-12-17 In the United States the causes and even the meanings of poverty are disconnected from the causes and meanings of global poverty The Routledge Handbook of Poverty in the United States provides an authoritative overview of the relationship of poverty with the rise of neoliberal capitalism in the context of globalization Reorienting its national economy towards a global logic US domestic policies have promoted a market based strategy of economic development and growth as the obvious solution to alleviating poverty affecting approaches to the problem discursively politically economically culturally and experientially However the handbook explores how rather than alleviating poverty it has instead exacerbated poverty and pre existing inequalities privatizing the services of social welfare and educational institutions transforming the state from a benevolent to a punitive state and criminalizing poor women racial and ethnic minorities and immigrants Key issues examined by the international selection of leading scholars in this volume include income distribution employment health hunger housing and urbanization With parts focusing on the lived experience of the poor social justice and human rights frameworks as opposed to welfare rights models and the role of helping professions such as social work health and education this comprehensive handbook is a vital reference for anyone working with those in poverty whether directly or at a macro level
