**Recent Developments in High-Energy Physics** H. Mitter, C.B. Lang, 2012-12-06 This volume contains the written versions of the lectures held at the 22 Internationale Universitätswochen für Kernphysik in Schladming Austria in February 1983 The generous support of the Austrian Federal Ministry of Science and Research the Styrian Government and other sponsors once again made it possible for expert lecturers to be invited In choosing the topics the aim was to achieve a balance between the theoretical and phenomenological contributions on the theoretical side discussions centred on the impact of different approaches to quantum field theory on the elementary particle scenario on the other on the recent results in high energy physics which have provided fresh motivations for new kinds of experiments as well as having had a profound influence on cosmology Limited space has made it impossible to include manuscripts of the many interesting seminars presented The lecture notes were reexamined by the authors after the school and are now published in their final form It is a pleasure to thank all the lecturers for their efforts which made it possible to speed up publication Thanks are also due to Mrs Neuhold for the careful typing of the notes H Mitter C B Lang Acta Physica Austriaca Suppl XXV 70 1983 by Springer Verlag 1983 THE EARLY UNIVERSE FACTS AND FICTION by G BARNER Max Planck Institut für Physik und Astrophysik Institut für Astrophysik Karl Schwarzschild Str 1 8046 Garching b München FRG 1 Recent Developments in High-Energy Physics C. **Relativity** Hagen Kleinert,Robert T Jantzen,Remo Ruffini,2008-09-04 The Marcel Grossmann Meetings are three yearly forums that meet to discuss recent advances in gravitation general relativity and relativistic field theories emphasizing their mathematical foundations physical predictions and experimental tests These meetings aim to facilitate the exchange of ideas among scientists to deepen our understanding of space time structures and to review the status of ongoing experiments and observations testing Einstein s theory of gravitation either from ground or space based experiments Since the first meeting in 1975 in Trieste Italy which was established by Remo Ruffini and Abdus Salam the range of topics presented at these

meetings has gradually widened to accommodate issues of major scientific interest and attendance has grown to attract more than 900 participants from over 80 countries This proceedings volume of the eleventh meeting in the series held in Berlin in 2006 highlights and records the developments and applications of Einstein's theory in diverse areas ranging from fundamental field theories to particle physics astrophysics and cosmology made possible by unprecedented technological developments in experimental and observational techniques from space ground and underground observatories It provides a broad sampling of the current work in the field especially relativistic astrophysics including many reviews by leading figures in the research community
