Recent Progress in Hormone Research Roy O. Greep, 2013-10-22 Recent Progress in Hormone Research Volume 40 presents the proceedings of the 1983 Laurentian Hormone Conference held in Mont Tremblant Canada The book presents papers on promoter elements of genes coding for proteins and modulation of transcription by estrogens and progesterone the structure expression and evolution of the genes for the human glycoprotein hormones and the regulation and organization of thyroid stimulating hormone genes The text also includes papers on the mouse mammary tumor virus model in studies of glucocorticoid regulation the role of the circadian system in reproductive phenomena and endocytosis and membrane traffic in cultured cells Other papers on neuroendocrinology mechanism of hormone action reproductive biology subcellular processing of hormones and their receptors hereditary resistance to 1,25 dihydroxyvitamin D are also encompassed Physiologists endocrinologists biochemists and scientists involved in hormone research will prove the book invaluable

Recent Progress in Hormone Research James H. Clark, 2013-10-22 Recent Progress in Hormone Research Volume 45 covers the proceedings of the 1988 Laurentian Hormone Conference The book presents papers on the molecular characterization of the glucocorticoid receptor the estrogen regulation of gene transcription and mRNA stability and the molecular and cellular biology of mammalian progesterone receptors The text also includes papers on the molecular basis of regulation of ionic channels by G proteins the role of biologically active follicle stimulating hormone in reproduction and the role of glycosylphosphoinositides in signal transduction Papers on the mechanisms of growth control in normal and malignant breast epithelium the biochemical and structural analysis of the nerve growth factor receptor and the isolation molecular cloning and mechanism of action of parathyroid hormone related protein are also considered The book further tackles the regulation and dysregulation of adiponectin in obesity and other metabolic states Endocrinologists physiologists biochemists and scientists involved in hormone research will find the book invaluable

Recent Progress in Hormone Research Gregory Pincus, 2013-10-22 Recent Progress in Hormone Research Volume 23 is a collection of papers presented at the 1966 Laurentian Hormone Conference held at Mont Tremblant Quebec Canada This conference explores four major areas of research including thyroid physiology thyroid hormones contemporary developments in peptide hormone chemistry and biochemistry and special studies of insulin particularly in man This book is organized into four parts encompassing 14 chapters Part I deal with the factors controlling thyroid stimulation and special studies of the mode of action of thyroid hormones including antithyroid drugs Part II describes the mode of action of steroid hormones and hormonal steroids based on the effects on normal and neoplastic tissues This part also looks into a definitive segment of research in endocrinology with the metabolism of the steroid hormones in vivo and in vitro The discussion of an important clinical condition involving adrenocortical steroid production is given in the chapter concerned with congenital adrenal hyperplasia Parts III and IV explore the synthesis of peptide hormones and insulin These parts also tackle the gastrointestinal hormone biochemistry the

detection of at least two insulin like activities in human serum and the particular control of insulin activity in man This book is directed primarily toward endocrinologists *List of Journals Indexed in Index Medicus* National Library of Medicine (U.S.),1997 Issues for 1977 1979 include also Special List journals being indexed in cooperation with other institutions Citations from these journals appear in other MEDLARS bibliographies and in MEDLING but not in Index medicus

Jefferies,2004-01-04 The Third Edition of this popular book brings up to date the material that so many readers found helpful in the previous editions The text has been revised and reorganized with current chapters focusing on the history of cortisol use sources of confusion regarding cortisol therapy the significance of normal adrenocortical function generally accepted uses of physiological dosage viral infections miscellaneous clinical conditions and future directions for research and therapy The author provides explanation and confirmation of the rationale for the effectiveness and safety of the uses of physiological dosages of cortisol in the treatment not only of patients with rheumatoid arthritis and other autoimmune disorders but also of patients with chronic allergies chronic fatigue syndrome gonadal dysfunction infertility shingles acne hirsutism respiratory infections and other less common disorders It is a known fact that the influenza virus attacks the human body by impairing the production of the adrenocorticotrophic hormone ACTH which in turn impairs the production of cortisol the only hormone that is absolutely essential for life In addition within the past two years a new infection has developed in central China and has been labeled Severe Acute Respiratory Syndrome SARS The ACTH hormone and the SARS epidemic is addressed and it is hoped that this type of cortisol therapy will not only be helpful in the treatment of the various disorders mentioned but will lead to a better understanding of the factors that contribute to the development of these disorders and ultimately contribute towards their prevention **General Catalogue of Printed Books** British Museum. Bibliography of Medical Reviews ,1976 *Histamine and Anti-Histaminics* ,2013-11-27 It was an agreeable though strenuous task to edit a book with so many distinguished contributors on a subject to which I have given half of my life In 1959 when Prof O EICHLER invited me to edit a book on Histamine and Anti histaminics as a supplement to HEFFTER S Handbuch I thought the task could be done in three years Now five years are gone and only half is fulfilled Though so far as the Histamine part of the book is concerned the initial plan has been followed very closely we had to leave the Anti histaminics for another volume of unpredictable dimensions In 1924 eight pages inserted in a Chapter on M utterkorn by ARTHUR R CUSHING were considered enough in vol II Part II pg 1319 1326 of the Handbuch Now 922 pages did not suffice to cover all the aspects of the subject Especially in the last few years the subject has expanded in so many directions that the antihistaminic part had to be excluded from the present volume Possibly another thousand pages will be necessary to cover what remains of the subject In planning the book we made great use of the excellent and classical mono graph by W FELDBERG and E SCHILF on Histamin published by Julius Springer in 1930 Biology of Radioiodine L. K. Bustad,2013-10-22 Biology of Radioiodine presents the proceedings of the Hanford Symposium on the Biology of Radioiodine by the U S Atomic Energy Commission and the Hanford Laboratories of the General Electric Company held in Richland Washington on July 17 19 1963 This book discusses the biochemistry and physiology of radioiodine Organized into 53 chapters this compilation of papers begins with an overview of the comprehensive research program on radioiodine This text then examines the risk in the occupations involving exposure to radiation Other chapters consider the properties of different radioiodines including fission yield half life radiations and precursors in the fission product decay series This book discusses as well the empirical relationships relating the transfer of radioiodine from air to grass The final chapter deals with biomedical considerations when large quantities of radioiodine are released in the environment This book is a valuable resource for biologists physiologists biochemists and scientists
