Cavalcanti, 2007-10-30 Christian conservatism has changed drastically in the last 25 years From the working class faith of small autonomous rural churches or storefront sanctuaries to the megachurches of the suburbs and the halls of power Congress and the White House the faith is no longer at the margins of American religion Rather it is a dominant force in the American public square For the first time in its history Christian conservatism boasts an expanded network of born again clubs and services that closely follow secular trends in the American consumer market A veritable Christian suburbia has been created that parallels its secular counterpart This Christian conservative co optation of suburbia is unprecedented in the history of the movement Their embrace of modernity and middle class lifestyle is a stark contrast to Christian conservatives who avoided engaging with modernity earlier in the 20th century How did conservative Christianity change and how is this change affecting its relationship with the larger society Influenced by middle class values power and education Christian conservatism has opted to engage with modern political life allying itself with the Republican Party and developing an extensive political agenda of its own This book documents the transformation of Christian conservatism into a middle class faith and argues that the changes experienced by Christian conservatism are part of a larger religious realignment in American Christianity Conservative Christianity once home primarily to working class religious communities greatly benefited from the migration of conservative Christians from other denominations as a result of the 1960s Cultural Revolution The final goal of the movement is of course the creation of a biblically based society one whose laws are defined by a conservative reading of the Scriptures and whose public mores are more akin to its newly gained middle class status The push to restore a Christian America raises questions about the conservative Christian faith Cavalcanti answers those questions as he traces the growth of the movement and its goals Modernity, Aesthetics, and the Bounds of Art Peter J. McCormick, 2019-05-15 Illuminating the tensions between theory history and interpretation in contemporary aesthetics Peter McCormick traces here the intellectual history of our understanding of the relationship between philosophy and the arts

Militarization and the Global Rise of Paramilitary Culture Brad West, Thomas Crosbie, 2021-10-12 This edited book demonstrates a new multidimensional comprehension of the relationship between war the military and civil society by exploring the global rise of paramilitary culture Moving beyond binary understandings that inform the militarization of culture thesis and examining various national and cultural contexts the collection outlines ways in which a process of

paramilitarization is shaping the world through the promotion of new warrior archetypes It is argued that while the paramilitary hero is associated with military themes their character is in tension with the central principals of modern military organization something that often challenges the state s perceived monopoly on violence As such paramilitization has profound implications for institutional military identity the influence of paramilitary organizations and broadly how organised violence is popularly understood Conceived in Modernism Aimee Armande Wilson,2017-06-29 Offers a new perspective on the politics of contraception by showing that Anglo American birth control rhetoric has roots in modernism

Understanding James, Understanding Modernism David H. Evans,Laci Mattison,Paul Ardoin,S. E. Gontarski,2017-04-20 Psychologist philosopher teacher writer William James stood closer than any other thinker to the center of the confluence of intellectual and artistic forces that defined the culture of modernism The outstanding feature of this volume lies in its intent to investigate James s influence on both American and International Modernism It provides on the one hand a multifaceted introduction to students of history philosophy and culture and on the other a compendium of some of the most up to date thinking on this central figure James s first book *Principles of Psychology* 1890 immediately established James as the leading psychologist of his time at a moment in history when psychology seemed to offer the promise of finding some definitive answers to eternal philosophical conundra James s innovations would register a clear effect on much modernist art most evidently in the stylistic prose experiments of James Joyce Virginia Woolf and their imitators James s tentative skepticism concerning the concept of consciousness as such and the post Cartesian ego that was its foundation also anticipates the questioning of the subject that would be the theme of much modern and indeed postmodern thought The contributors to this volume explore James s most essential texts as well as his influence on contemporary writers artists and thinkers The final section is a glossary of James s key terms with entries written by leading experts Theses in Progress in Commonwealth Studies ,2002 **Africa Today** ,1999 **The Palgrave Handbook of Theatre Censorship** Anne Etienne,Graham Saunders,2024-11-29 This book incorporates a wide theoretical cultural literary and historical engagement in exploring the tension between dramatic productions and the forms of censorship they encounter from creation to reception The Palgrave Handbook of Theatre Censorship offers global new insights into censorship practices examining attempts at repression motivated either by fears that audiences gathering together to watch live dramatic events will lead to sedition and mass uprisings or by moral or religious squeamishness requiring the establishment of institutional systems of censorship to curb or suppress the stage As such the Handbook aims to initiate redefinitions of what we understand or experience as censorship Who knew theatre could still carry so many threats or be so widely provocative and dangerous This is an extraordinary and often eye opening set of thirty six individually insightful wide ranging and oftentimes disturbing essays each of which offers unique insights into theatre censorship practices and their impact within a specific political and moral culture There is a particular emphasis on the recent and current and the authors speak with first hand knowledge and from direct experience

not only about the restrictions but also how artists sometimes negotiate and evade these What makes the book so especially fascinating and illuminating is seeing so many examples juxtaposed together This enables the reader to hear the essays and the cultures talking to and alongside each other The collection repeatedly breaks fresh ground and the editors deserve enormous credit for gathering and effectively curating so many reports from the front line Steve Nicholson Emeritus Professor University of Sheffield UK Anne Etienne and Graham Saunders s book is a wide ranging incisive and compelling collection of reflections and case studies on the theatre industry s relationship to censorship and self censorship from a historical and contemporaneous perspective An impressive array of authors have been assembled for this volume representing among them views on the subject from Spain Denmark Norway Zimbabwe South Africa Germany Italy Indonesia Iran Portugal Turkey Brazil Japan Ireland Australia Russia England and more The book is by turns surprising in its curatorial and narrative design and wonderfully effective at delineating the complex and thorny paths that create socio political cultures where the censorship and self censorship of theatre artists thrives and or is efficaciously contested and rebelled against Of note is a through line of argument in the book around less overt modes of surveillance that police artists imaginations and thereby the work they create and produce At a time in the world where many governments are increasingly seeking to limit artistic expression this book is a necessary reminder of the many freedoms that have been fought for in theatres around the globe and how the power of being unsilenced must never be taken for granted Caridad Svich Playwright Translator This is a truly excellent collection of incisive studies It is wide ranging impressively global in scope with an illuminating balance of the historical and the contemporary In its impressive and well realised ambition demonstrated by the well focused intelligence and academic flair of its many contributors this collection is both magisterial and vital It is an essential contribution to censorship studies fascinating and inspiring a must read for anyone interested in the subject Aleks Sierz Theatre critic and author of *Rewriting the Nation* British Theatre Today 2011 *Good Nights Out* A History of British Theatre Since the Second World War 2021 *TŃLŃS, the Times Literary Supplement* ,1996 *Urban Africa* Abdou Maliqalim Simone, Abdelghani Abouhane, 2005-05-17 Amidst emergent cultural formations in Dakar Addis Ababa Cape Town Kisangani Jos Zaria Cairo and Marakesh this collection focuses on diverse ways Africans negotiate novel spatial practices political economic processes and social relations that entangle place identity and power in urban sites While historically familiar patterns linking the country and city remain these sedimentations are reworked through the incessant remaking of virtual real and moral economies where African agency animates diverse urban formations African cities are made meaningful through the geographically uneven dynamics of globalization that articulate with locally specific histories cultural practices and political contingencies Art Deco Chicago Robert Brueggemann, 2018-10-02 An expansive take on American Art Deco that explores Chicago s pivotal role in developing the architecture graphic design and product design that came to define middle class style in the twentieth century Frank Lloyd Wright s lost Midway Gardens the iconic Sunbeam Mixmaster

and Marshall Field's famed window displays despite the differences in scale and medium each belongs to the broad current of an Art Deco style that developed in Chicago in the first half of the twentieth century This ambitious overview of the city's architectural product industrial and graphic design between 1910 and 1950 offers a fresh perspective on a style that would come to represent the dominant mode of modernism for the American middle class Lavishly illustrated with 325 images the book narrates Art Deco's evolution in 101 key works carefully curated and chronologically organized to tell the story of not just a style but a set of sensibilities Critical essays from leading figures in the field discuss the ways in which Art Deco created an entire visual universe that extended to architecture advertising household objects clothing and even food design Through this comprehensive approach to one of the 20th century's most pervasive modes of expression in America Art Deco Chicago provides an essential overview of both this influential style and the metropolis that came to embody it **The**

Mediterraneans Ina-Maria Greverus, Regina Römhild, 2001 This collection of articles supplements the previous issue on The Mediterraneans Transborder Movements and Diasporas vol 9 2000 no 2 Both publications resonate with a shift in how Mediterranean cultures and societies are constructed in anthropological research and discourse today Anthropology finds itself challenged by forms of social life and experience that are neither wholly traditional nor unambiguously modern by social actors who in their own practices and attitudes are breaking down the divide between tradition and modernity We are studying cultures that we can no longer mistake for those traditional communities whose invention anthropology was complicit with In dealing with this challenge a potentially transnational dialogue between anthropologists of various backgrounds has emerged a dialogue that we especially hope to foster and support with this edition of AJEC *Pedagogical*

Experiments in Architecture for a Changing Climate Tülay Atak, Luis Callejas, Jonathan Scelsa, Jørgen Johan Tandberg, 2024-01-22 This book presents a series of pedagogical experiments translating climate science environmental humanities material research ecological practices into the architectural curriculum Balancing the science and humanities it exposes recent pedagogical experiments from renowned educators while also interrogating a designer's agency between science and speculation in the face of climate uncertainty The teaching experiments are presented across four sections Abstraction Organization Building and Narrative exposing core parts of an architect's education and how educators can simultaneously provide fundamental skills and constructive literacy while instigating environmental sensibilities Chapters cover issues such as an unstable hydrosphere water infrastructure remediating materials methods of disassembly and adaptive reuse as well as constructing new aesthetic categories of climate change and implementing oral histories of construction among many others Written and edited by expert design educators actively engaged in experimenting in new forms of pedagogy this book will be of great use to architecture instructors at all levels looking to renew their teaching practices to more directly address the climate emergency It will also appeal to those academics across the built environment interested in the ways design can affect and adapt to climate change **Subject Guide to Books in Print**, 1997
