Leading Sectors and World Powers George Modelski, William R. Thompson, 1996 The idea that political and economic power moves in coordinated cycles has long intrigued political scientists and political economists for if a pattern exists in the rise and fall of international political power a model explaining this pattern gains predictive qualities In *Leading Sectors and World Powers* George Modelski and William R Thompson venture beyond previous attempts to explain why major powers rise fall and fight about their changing status to establish an explicit connection between war economic innovation and world leadership They argue that surges in economic innovation which in turn are tied to global war determine leadership in the global system Modelski and Thompson base their theory on the coordination of long cycles phases of world order and decay punctuated by intensive bouts of global war and K waves cycles delineating the wax and wane of leading industrial sectors They contend that K waves appear in paired sets correlated to long cycle shifts in political power Modelski and Thompson conclude by discussing the nature and timing of the next K wave long cycle peak commenting on the relevance of it for U S industrial policy and speculating on the possibility of evolving away from this pattern in the near future

The New World Power Robert E. Hannigan, 2013-07-17 From the era of the Spanish American war onward the United States found itself increasingly involved in the affairs of countries beyond North America *The New World Power* offers an interpretive framework for understanding U S foreign policy during the first two decades of America s emergence as a world power Robert E Hannigan describes the aspirations of American leaders explores the bedrock social views and ideological framework they held in common and shows how the approach of U S policymakers overseas mirrored their attitudes toward domestic progressivism While the vast bulk of work on U S foreign policy has been concerned with the period from World War II to the present this comprehensive examination of American policy at the turn of the twentieth century is of vital importance to the comprehension of subsequent events Hannigan relates U S foreign policy to domestic society in ways that are new in particular he examines how issues of class race and gender were combined in the ideology held by policy makers and how this shaped their approaches to foreign affairs His study reveals a fundamental unity to U S activity throughout the period not only toward the Caribbean and China regions that have been the traditional focus of historians but toward the rest

of North and South America as well. It also relates these regional activities to American policy toward the British Empire, European great power rivalries and international institutions, arbitration and law culminating in a reinterpretation of U.S. involvement in World War I. Based on exhaustive research in the writings of presidents, secretaries of state and key diplomats and advisers, *The New World Power* draws parallels between the methods by which policy makers sought to shape international society and the methods by which many of them hoped to secure the conditions they wanted within the United States. Most important, the book describes how an international search for order constituted the fundamental strategy by which American leaders sought to ensure for the United States a position of what they saw as wealth and greatness in the coming twentieth century world.

A Futurist for the 21st Century: The Macrohistory of Lawrence Taub

(1936-2018) Jan Krikke, Lawrence Taub, Sohail Inayatullah, Takuya Mirata, Bill Kelly, Masanori Kanda, 2024-09-27 This book is intended as an introduction and a tribute to the visionary work of American futurist Lawrence Taub, author of *The Spiritual Imperative*, *Sex Age and the Last Caste*. Whether you are a seeker of wisdom, a student of history or simply curious about humanity's collective journey, Taub provides a new framework for looking at the past, the present and the future through new eyes. At the heart of Taub's work is his concept of societal castes, interpreted not as rigid social hierarchies but as evolving stages of human development. These stages progress from basic survival and the pursuit of power and wealth to the eventual realization of spiritual purpose. Taub's thought-provoking macrohistory blends history, psychology and spiritual philosophy to chart a path for individuals and societies grappling with the complexities of life in the 21st century.

International Law, Global Relations, World Powers Andreas Sofroniou, 2017-01-25 International law, sometimes called the law of nations, has evolved over the last 400 years. The three major sources of international law according to Article 38 of the Statute of the International Court of Justice are international conventions or treaties, international customs and the general principles of law as recognized by civilized nations. The Permanent Court of Arbitration was established by the Hague Conferences of 1899 and 1907, and the Permanent Court of International Justice was set up in 1921 and succeeded in 1946 by the International Court of Justice. Since World War II, international organizations such as the UN and its related bodies have contributed to the expansion and increased scope of international law to include political and strategic affairs, economic, social, communications and environmental matters. By the 1990s, international law had shown its durability and flexibility by expanding to cover new areas of world relations and its efficacy through the machinery of the UN.

The Great Powers and Global Struggle, 1490-1990 Karen A. Rasler, William R. Thompson, 2021-10-21 In *The Great Powers and Global Struggle*, Karen A. Rasler and William R. Thompson focus on two themes: the rise and fall, as well as the relative decline, of major world powers over the past five hundred years, and the way in which these processes have set the stage for the outbreak of global war. Their interdisciplinary approach encompasses political science, economics, sociology, geography and history. The most significant wars occur when regional leaders, historically in Western Europe, challenge global leaders. By studying the wars of Napoleon

Louis XIV Phillip II and the Italian Indian Ocean wars of the sixteenth century through World Wars I and II to the present the authors challenge the long held idea that prosperity leads to over consumption and underinvestment and thus decline a theory traceable to ancient times that remains the principal explanation for global decline today Arguments about global structural change and its implications abound but rarely is the abstract translated into concrete historical terms with emphases on specific actors and empirical documentation Rasler and Thompson reinterpret the past five hundred years of major power warfare and provide extensive tests of the eighteen generalizations critical to their argument They conclude that those who argue that global war and repositioning are no longer a concern among the major powers lack critical understanding of the behavior that contributes to such conflict
