Research in the Creative and Media Arts Desmond Bell, 2019-04-01 In *Research in the Creative and Media Arts* Desmond Bell looks at contemporary art and design practice arguing that research activity is now a vital part of the creative dynamic Today creative arts and media students are expected to develop a range of research competencies and critical capacities in their creative project work This book plots the basis for a research culture in the creative and media arts It provides an illuminating genealogy of artistic research revealing the intimate connections between art and science over the centuries and identifying some of the founding figures of practice based artistic research Bell explores the research that artists undertake through a number of case studies talking to a range of contemporary artists and media makers about their

Interdisciplinarity Andrew Barry, Georgina Born, 2013-06-26 The idea that research should become more interdisciplinary has become commonplace According to influential commentators the unprecedented complexity of problems such as climate change or the social implications of biomedicine demand interdisciplinary efforts integrating both the social and natural sciences In this context the question of whether a given knowledge practice is too disciplinary or interdisciplinary or not disciplinary enough has become an issue for governments research policy makers and funding agencies Interdisciplinarity in short has emerged as a key political preoccupation yet the term tends to obscure as much as illuminate the diverse practices gathered under its rubric This volume offers a new approach to theorising interdisciplinarity showing how the boundaries between the social and natural sciences are being reconfigured It examines the current preoccupation with interdisciplinarity notably the ascendance of a particular discourse in which it is associated with a transformation in the relations between science technology and society Contributors address attempts to promote collaboration between on the one hand the natural sciences and engineering and on the other the social sciences arts and humanities From ethnography in the IT industry to science and technology studies environmental science to medical humanities cybernetics to art science the collection interrogates how interdisciplinarity has come to be seen as a solution not only to enhancing relations between science and society but the pursuit of accountability and the need to foster innovation Interdisciplinarity is essential reading for scholars students and policy makers across the social sciences arts and humanities including anthropology geography sociology science and technology studies and cultural studies as well as all those engaged in interdisciplinary research It will have particular relevance for those concerned with the knowledge economy science policy environmental politics applied anthropology ELSI research medical humanities and art science

English Mechanic and Mirror of Science and Art , 1893 **The Eclectic Magazine of Foreign Literature, Science, and Art** , 1889 **Mathematics in the Visual Arts** Ruth Scheps, Marie-Christine Maurel, 2020-12-09 Art and science are not separate universes This book explores this claim by showing how mathematics geometry and numerical approaches contribute to the construction of works of art This applies not only to modern visual artists but also to important artists of the

past To illustrate this this book studies Leonardo da Vinci who was both an engineer and a painter and whose paintings can be perfectly modeled using simple geometric curves The world gains intelligibility through elegant mathematical frameworks from the projective spaces of painting to the most complex phase spaces of theoretical physics A living example of this interdisciplinarity would be the sculptures of Jean Letourneur a specialist in both chaos sciences and carving as evidenced in his stonework This book also exemplifies the geometry and life of forms through contemporary works of art including fractal art which have never before been represented in this type of work Works Jeremy Bentham,1843 The London Literary Gazette and Journal of Belles Lettres, Arts, Sciences, Etc ,1855 **American Journal of Science and Arts** ,1873 **The Literary Gazette and Journal of Belles Lettres, Arts, Sciences, &c** ,1833
