The Future of the World Jenny Andersson, 2018-07-25 The Future of the World is devoted to the intriguing field of study which emerged after World War Two futurism or futurology Jenny Andersson explains how futurist scholars and researchers imagined the Cold War and post Cold War world and the tools and methods they would use to influence and change that world Futurists were a motley crew of Cold War warriors nuclear scientists journalists and peace activists Some argued it should be a closed sphere of science defined by delimited probabilities They were challenged by alternative notions of the future as a potentially open realm Futurism also drew on an eclectic range of repertoires some of which were deduced from positivist social science mathematics and nuclear physics and some of which sprung from alternative forms of knowledge in science fiction journalism or religion These different forms of prediction laid very different claims to how accurately futures could be known and what kind of control could be exerted over what was yet to come The Future of the World carefully examines these different engagements with the future and inscribes them in the intellectual history of the post war period Using unexplored archival collections The Future of the World reconstructs the Cold War networks of futurologists and futurists

aspects of his work in the spotlight A recurring theme however is the attraction and repulsion between the Roman Catholic Church and modernity in Europe between 1750 and 2000 The ambivalent relationship with modernity is therefore the leitmotiv of the first part of this volume whereas the second part focuses on the repositioning of the Church and the tensions between religion ideology and politics In this way the volume reflects Lamberts s fascination for the history of political institutions as well as his research on Christian democracy The contributions address in a comparative way and from a transatlantic viewpoint this broad period of time in history which gave rise to different social movements and different models of society in Belgium and elsewhere Contributors Winfried Becker Universit t Passau Bruno B thouart Universit du Littoral C te d Opale Hans Blom Universiteit van Amsterdam Alfredo Canavero Universit degli Studi di Milano Philippe Chenaux Pontificia Universit Lateranense Roma Andrea Ciampani LUMSA Roma Jo Deferme KU Leuven Jan De Maeyer KADOC KU Leuven Henk De Smaele Universiteit Antwerpen Carine Dujardin KADOC KU Leuven Jean Dominique Durand Universit Lyon 3 Michael Gehler Jean Monnet Chair Universit t Hildesheim Institut f r Neuzeit und Zeitgeschichtsforschung Wien Susana Monreal Universidad Cat lica del Uruguay Patrick Pasture KU Leuven Patrick M W Taveirne The Chinese University of Hong Kong Peter Van Kemseke Europese Commissie KU Leuven Vincent Viaene Attach bij het Huis van Koning Filip Els Witte Vrije Universiteit Brussel The Nature of Politics Roger D. that human factors are of paramount importance in understanding the process of risk production The book sets a state of art around the flood issue from the description of the phenomena to the management of risk dikes dams reducing vulnerability management of crisis The chapters are written by specialists but are accessible to the mainstream scientist Each chapter exposes knowledge methodologies scientific locks and the prospects of each discipline on the theme of floods **Subject Catalog** Library of Congress,1978 **The Dream of Christian Nagasaki** Reinier H. Hesselink,2015-12-21 Nagasaki on the west coast of the Japanese island of Kyushu is known in the West for having been the target of an atomic bomb attack on August 9 1945 Less well known is that the city was founded by Europeans Jesuit missionaries who arrived in the area in the second half of the 16th century The Jesuits had come to convert the Japanese After baptizing a Japanese lord or daimyo of the area they established Nagasaki in 1571 to provide the Portuguese a safe harbor in his domain Profits for the daimyo and the Japanese who converted to Christianity soon followed This book is the first comprehensive history in any language of the rise and fall of Christian Nagasaki 1560 1640 The author provides a narrative of the city s early years from both the European and Japanese perspectives **Governing Diasporas in International Relations** Francesco Ragazzi,2017-07-20 This book analyzes how states extend their sovereignty beyond their territories through the language of diasporas An increasing number of states are interested in supporting managing or controlling their populations abroad something they define as their diaspora Yet what does it mean for governments to formulate claims of sovereignty over populations who reside outside the very borders that legitimate them This book argues that diaspora should be understood as a performative discourse that enables transnational political practices that could otherwise not be justified in a normative structure of world politics dominated by the imperatives of territorial sovereignty The empirical analysis focuses on the former Yugoslavia and contemporary Croatia The first part of the book examines the history of the relations between Croats abroad and their homeland from the emergence of the question of emigration as a problem of government in the late nineteenth century until the years preceding the formation of the contemporary Croatian state The second part explores how in the 1990s the merging of bureaucratic categories and state practices into the category of diaspora was instrumental in mobilizing Croats abroad during the 1991 1995 war in reshuffling the balance between Serbs and Croats in the citizenry and in the de facto annexation of parts of neighboring Bosnia Herzegovina in the immediate aftermath of the war This book will be of much interest to students of critical security studies international political sociology diaspora studies border studies and International Relations in general
