Consumption and Gender in the Early Seventeenth-Century Household Jane Whittle, Elizabeth Griffiths, 2012-03 In this vivid reconstruction of life in a seventeenth century gentry household the authors delve into the details of everyday life how did a large wealthy household in the English countryside acquire the goods and services it needed and wanted Was household consumption an exclusively female sphere or did men play an important role too *Navigating the American West* Thomas A. Permar, 2015-03-14 If you've ever stared in awe at the Rocky Mountains and wondered how early travelers could possibly traverse those peaks then this is the book for you In a time of smartphones GPS devices and voice automated navigation systems it's difficult to imagine crossing unknown deserts mountains and prairies with just a few ancient techniques and the heavens above This history of movement across the American West brings three centuries of travel to life It shows how four different cultures in four different areas migrated across this harsh and beautiful land the native travelers on foot Spanish conquistadors on horseback Frenchmen by canoe and American settlers by wagon In this history the who where and when take a back seat to the fascinating how How did they find their way from place to place How did they measure time distance and direction traveled How did they provide themselves with food water and shelter the barest necessities of human existence Travel the myth and reality of the raw land that made the American West Discover the depth of human bravery determination and ingenuity And enjoy the adventure

Encyclopedia of nineteenth-century photography John Hannavy, 2008 The first comprehensive encyclopedia of world photograph up to the beginning of the twentieth century It sets out to be the standard definitive reference work on the subject for years to come Scientific Instruments, 1949

The World in a Crucible Sally Newcomb, 2009-01-01 Geology coalesced as a discipline in the early part of the nineteenth century with the coming together of many strands of investigation and thought The theme of experimentation and or instrument aided observation is absent from most recent accounts of that time which rely on an admixture of theory and field observations informed by close examination of minerals James Hutton emerged as the person who had it right with suggestion of a central heat source for Earth while Abraham Gottlob Werner and his Neptunist supporters were derided as being blinded by overarching belief as opposed to sober application of observed facts However despite several claims that Hutton had won the day primary literature from both England and the Continent reveals that the question was by no means settled for decades after Hutton derided information derived from looking into a little crucible This Special Paper makes the case that it was just those parameters of heat pressure solution and composition discovered in the laboratory that prevented resolution of the overriding questions about rock origin *A History of Western Science* Rienk Vermij, 2023-12-11 A History of Western Science The Basics offers a short introduction to the history of Western science that is accessible to all through avoiding technical language and mathematical intricacies A coherent narrative of how science

developed in interaction with society over time is also provided in this comprehensive guide The first part discusses the period up to 1700 with a focus on the conceptual shift and new ideas about nature that occurred in early modern Europe Part two focusses on the practical and institutional aspects of the scientific enterprise and discusses how science established itself in Western society post 1700s while part three discusses how during the same period modern science has impacted our general view of the world and reviews some of the major discoveries and debates Key topics discussed in the book include Natural philosophy medicine and mathematics in the ancient and medieval worlds The key figures in the history of science Galileo Descartes Isaac Newton Darwin and Einstein as well as lesser known men and women who have developed the field The development of scientific instruments the transformation of alchemy into chemistry weights and measures the emergence of the modern hospital and its effects on medicine and the systematic collection of data on meteorology volcanism and terrestrial magnetism The big questions the origins of humans the nature of reality and the impact of science As a jargon free and comprehensive study of the history of Western science this book is an essential introductory guide for academics and researchers of the history of science as well as general readers interested in learning more about the field
