Various Authors

Scientific Organisations Towards A Productive Climate:

Organisational Transformation and Scientific Change Richard Whitley, Jochen Glaser, 2014-06-06 The first part of this book deals with the transformation of universities as strategic organisational actors in some cases creating them as such while the second shows how governance and authority shifts are affecting the kinds of research goals being pursued by academics in different public science systems

The Oxford Handbook of Organizational Climate and Culture Benjamin Schneider, Karen M. Barbera, 2014 This Handbook is a unique compendium of thinking research and practice on organizational climate and culture integrating scholarship from both fields into one major work Authors explore these themes in context of contemporary practice with comprehensive case studies of 3M McDonald s the Mayo Clinic PepsiCo and Tata

Creative Knowledge Environments Sven Hemlin, Carl Martin Allwood, Ben R. Martin, 2004-01-01 Although there is an ever increasing demand for new technology and innovations in the economy and society in general we currently know little about the conditions for stimulating creativity in relation to research and innovative activity This book fills a significant gap in the literature by examining the environmental factors that encourage creative working processes for research and innovation

OECD Food and Agricultural Reviews Innovation, Productivity and Sustainability in Food and Agriculture Main Findings from Country Reviews and Policy Lessons OECD, 2019-10-03 Markets that function well within a stable regulatory and policy environment are key to improving the productivity and sustainability of the food and agriculture sector This report contains the main findings and policy lessons gained from a series of wide ranging country reviews on how government policies can improve sectoral productivity and sustainability through their impact on innovation structural change natural resource use and climate change Improving the policy environment would require rolling back those policies that distort markets the most and retain farmers in uncompetitive and low income activities harm the environment stifle innovation slow structural and generational change and weaken resilience

The Oxford Handbook of Project Management Peter W. G. Morris, Jeffrey K. Pinto, Jonas Söderlund, 2012-07-19 The Oxford Handbook of Project Management presents and discusses leading ideas in the management of projects Positioning project management as a domain much broader and more strategic than simply execution management this Handbook draws on the insights of over 40 scholars to chart the development of the subject over the last 50 years or more as an area of increasing practical and academic interest It suggests we could be entering an emerging third wave of analysis and interpretation following its early technical and operational beginnings and the subsequent shift to a focus on projects and their management Topics dealt with include the historical evolution of the subject its theoretical base professionalism business and societal context strategy organization governance innovation overruns risk information management procurement relationships and trust knowledge management practice and teams This handbook is of particular relevance to those interested in the research issues underlying project management

Filtration Research Daniel N. Tallman,John E. Pahlman,1987 Creating Interdisciplinarity Lisa R. Lattuca,2001

Interdisciplinarity a favorite buzzword of faculty and administrators has been appropriated to describe so many academic pursuits that it is virtually meaningless With a writing style that is accessible fluid and engaging Lisa Lattuca remedies this confusion with an original conceptualization of interdisciplinarity based on interviews with faculty who are engaged in its practice Whether exploring the connections between apparently related disciplines such as English and women s studies or

such seemingly disparate fields as economics and theology Lattuca moves away from previous definitions based on the degrees of integration across disciplines and instead focuses on the nature of the inquiry behind the work She organizes her findings around the processes through which faculty pursue interdisciplinarity the contexts institutional departmental and disciplinary in which faculty are working and the ways in which those contexts relate to and affect the interdisciplinary work Her findings result in useful suggestions for individuals concerned with the meaning of faculty work the role and impact of disciplines in academe today and the kinds of issues that should guide the evaluation of faculty scholarship

International Perspectives On Psychological Science, II: The State of the Art Paul Bertelson,Paul Eelen,Gery d'Ydewalle,2013-05-24 The essays appearing in these two volumes are based on Keynote Vol 1 and State of the Art Vol 2 Lectures delivered at the XXVth International Congress of Psychology in Brussels July 1992 The Brussels Congress was the latest in a series of conferences which are organized at regular intervals under the auspices of the International Union of Psychological Science IUPsyS the main international organization in the field of Scientific Psychology The first of those

meetings took place in Paris in 1889. An important function of the International Congresses is to promote communication between different specializations in Psychology. Speakers were therefore asked to present lectures and discussions in their own fields of study in a way that would be accessible to fellow psychologists active in other fields. State of the Art lecturers were specifically asked to prepare a tutorial review on a topic which in the view of the Program Committee had recently given rise to particularly important developments. These contributions are included in Volume Two. Keynote lecturers were left free to address whatever subject they felt was of greatest interest. The chapters in Volume 1 are preceded by the Presidential Address by Mark R. Rosenzweig.
