MAXnotes cover the essentials of what one should know about each work, including an overall summary, character lists, an explanation and discussion of the plot, the work's historical context, illustrations to convey the mood of the work, and a biography of the author. Each chapter is individually summarized and analyzed and has study questions and answers.

Mary Shelley's Frankenstein Harold Bloom, 2013-09 Perhaps best recognized for the horror films it has spawned, Frankenstein, written by 19-year-old Mary Shelley, was first published in 1818. Frankenstein warns against the irresponsible use of science and technology and makes readers reconsider who the world's monsters really are and how society contributes to creating them. Ideal for research or general interest, this resource furnishes students with a collection of the most insightful critical essays available on this Gothic thriller, selected from a variety of literary sources.

Mary Shelley: 'Frankenstein' Essaka Joshua, 2007-01-01 Frankenstein is one of the most popular novels from the Romantic period. This accessible study, written by a specialist in Romantic literature, examines Frankenstein within its literary and philosophical contexts. It looks closely at the range of genres from which the novel emerged, offering textual analysis of key passages from this and related texts. There is a summary of criticism on the novel, a discussion of the historical background, and a wide-ranging exploration of the literary sources. The study focuses on the moral questions that arise from the novel, investigating the range of questions that Shelley raises and offering an analysis of her answers.

The Body in Autobiography and Autobiographical Novels Menotti Lerro, 2018-10-12 This volume explores a web of complex relationships between body and mind, discussing the efforts of individuals from a wide variety of backgrounds to define, to achieve, or to reject the normal, and in some cases to put something else in its place. After considering the problems arising from other people's perceptions of non-standard bodies, the book turns to gender: is it written upon the body established at birth, determined only by physical traits and distinguished by material things such as clothes, or is it written within the body, defined through the subject's own feelings? It considers what happens when males consider themselves female and females consider themselves male. It concludes with the analysis of four books by different authors with different sexual orientations. Two of these volumes might be considered genuine autobiographies, while the other two are novels which include numerous

autobiographical features that reflect the authors own thoughts *Machines in Our Hearts* Kirk Jeffrey,2003-04-01 Today hundreds of thousands of Americans carry pacemakers and implantable cardioverter defibrillators ICDs within their bodies These battery powered machines small computers in fact deliver electricity to the heart to correct dangerous disorders of the heartbeat But few doctors patients or scholars know the history of these devices or how heart rhythm management evolved into a multi billion dollar manufacturing and service industry *Machines in Our Hearts* tells the story of these two implantable medical devices Kirk Jeffrey a historian of science and technology traces the development of knowledge about the human heartbeat and follows surgeons cardiologists and engineers as they invent and test a variety of electronic devices Numerous small manufacturing firms jumped into pacemaker production but eventually fell by the wayside leaving only three American companies in the business today Jeffrey profiles pioneering heart surgeons inventors from the realms of engineering and medical research and business leaders who built heart rhythm management into an industry with thousands of employees and annual revenues in the hundreds of millions As Jeffrey shows the pacemaker first implanted in 1958 and the ICD 1980 embody a paradox of high tech health care these technologies are effective and reliable but add billions to the nation s medical bill because of the huge growth in the number of patients who depend on implanted devices to manage their heartbeats *Mesmerists, Monsters, and Machines* Martin Willis,2006 Using key canonical science fiction narratives *Mesmerists Monsters and Machines* examines the intersection of the literary and scientific cultures of the 19th century

Literature, Neurology, and Neuroscience: Historical and Literary Connections ,2013-11-25 This well established international series examines major areas of basic and clinical research within neuroscience as well as emerging and promising subfields This volume on the neurosciences neurology and literature vividly shows how science and the humanities can come together and have come together in the past Its sections provide a new broad look at these interactions which have received surprisingly little attention in the past Experts in the field cover literature as a window to neurological and scientific zeitgeists theories of brain and mind in literature famous authors and their suspected neurological disorders and how neurological disorders and treatments have been described in literature In addition a myriad of other topics are covered including some on famous authors whose important connections to the neurosciences have been overlooked e g Roget of Thesaurus fame famous neuroscientists who should also be associated with literature and some overlooked scientific and medical men who helped others produce great literary works e g Bram Stoker s *Dracula* There has not been a volume with this coverage in the past and the connections it provides should prove fascinating to individuals in science medicine history literature and various other disciplines This book looks at literature medicine and the brain sciences both historically and in the light of the newest scholarly discoveries and insights *The Literary Imagination from Erasmus Darwin to H.G. Wells* Michael R. Page,2016-03-09 At the close of the eighteenth century Erasmus Darwin declared that he would enlist the imagination under the banner of science beginning Michael Page argues a literary narrative on questions of evolution

ecology and technological progress that would extend from the Romantic through the Victorian periods Examining the interchange between emerging scientific ideas specifically evolution and ecology new technologies and literature in nineteenth century Britain Page shows how British writers from Darwin to H G Wells confronted the burgeoning expansion of scientific knowledge that was radically redefining human understanding and experience of the natural world of human species and of the self The wide range of authors covered in Page s ambitious study permits him to explore an impressive array of topics that include the role of the Romantic era in the molding of scientific and cultural perspectives the engagement of William Wordsworth and Percy Shelley with questions raised by contemporary science Mary Shelley s conflicted views on the unfolding prospects of modernity and how Victorian writers like Charles Kingsley Samuel Butler and W H Hudson responded to the implications of evolutionary theory Page concludes with the scientific romances of H G Wells to demonstrate how evolutionary fantasies reached the pinnacle of synthesis between evolutionary science and the imagination at the close of the century

Reading Genesis in the Long Eighteenth Century Ana M. Acosta,2016-12-05 In a reassessment of the long accepted division between religion and enlightenment Ana Acosta here traces a tissue of readings and adaptations of Genesis and Scriptural language from Milton through Rousseau to Wollstonecraft and Mary Shelley Acosta s interdisciplinary approach places these writers in the broader context of eighteenth century political theory biblical criticism religious studies and utopianism Acosta s argument is twofold she establishes the importance of Genesis within utopian thinking in particular the influential models of Milton and Rousseau and she demonstrates that the power of these models can be explained neither by traditional religious paradigms nor by those of religion or philosophy In establishing the relationship between biblical criticism and republican utopias Acosta makes a solid case that important utopian visions are better understood against the background of Genesis interpretation This study opens a new perspective on theories of secularization and as such will interest scholars of religious studies intellectual history and philosophy as well as of literary studies

Popular Fiction and Brain Science in the Late Nineteenth Century Anne Stiles,2011-12-22 In the 1860s and 1870s leading neurologists used animal experimentation to establish that discrete sections of the brain regulate specific mental and physical functions These discoveries had immediate medical benefits David Ferrier s detailed cortical maps for example saved lives by helping surgeons locate brain tumors and haemorrhages without first opening up the skull These experiments both incited controversy and stimulated creative thought because they challenged the possibility of an extra corporeal soul This book examines the cultural impact of neurological experiments on late Victorian Gothic romances by Robert Louis Stevenson Bram Stoker H G Wells and others Novels like Dracula and Dr Jekyll and Mr Hyde expressed the deep seated fears and visionary possibilities suggested by cerebral localization research and offered a corrective to the linearity and objectivity of late Victorian neurology

Falling Into Matter Elizabeth R. Napier,2012-01-01 Falling into Matter examines the complex role of the body in the development of the English novel in the eighteenth century Elizabeth R Napier argues that despite an

increasing emphasis on the need to present ideas in corporeal terms early fiction writers continued to register spiritual and moral reservations about the centrality of the body to human and imaginative experience Drawing on six works of early English fiction Daniel Defoe's Robinson Crusoe Jonathan Swift's Gulliver's Travels Samuel Richardson's Clarissa Henry Fielding's Tom Jones Elizabeth Inchbald's A Simple Story and Mary Shelley's Frankenstein Napier examines how authors grappled with technical and philosophical issues of the body questioning its capacity for moral action its relationship to individual freedom and dignity and its role in the creation of art Falling into Matter charts the course of the early novel as its authors engaged formally stylistically and thematically with the increasingly insistent role of the body in the new genre

Biotechnology: Scientific Advancement Versus Public Safety Conrad B Quintyn, 2022-10-07 In this book Dr Quintyn considers whether genetic engineering will exacerbate social injustices and or lead to public safety issues As designer babies mature will they feel a sense of superiority or pass on mutations that negatively affect future generations Should we ignore the risk of zoonotic animal diseases because they offer potential benefits for reducing organ shortages Scientific advancement if not guided responsibly and with public input can be detrimental to public safety This book is unique as it encompasses many biotechnologies within the definition of biotechnology It gives a balanced view of biotechnology its promise as evidenced in repairing mutations i e genetic editing and its dangers evidenced in creating unintentionally dangerous microbes or unregulated germline editing and cloning Additionally this book includes animals in biotechnological research because the success advances techniques and science of genetic engineering could not have occurred without using animals and microorganisms insects plants as model organisms A comprehensive description of the CRISPR system in bacteria and the exploitation of this knowledge in creating the CRISPR Cas9 technology is also incorporated in this read The author's overall goal is to discuss other biotechnology that is being used to improve and put at risk the health environment and safety of humans giving the book a competitive edge Furthermore the book provides a provocative side in challenging scientists to consider the current belief governing research and development which is that scientific advancement and public safety create a false dichotomy

Connections and

Collisions Lois E. Rubin, 2005-06 This anthology of scholarship on Jewish women writers is the first to focus on what it is to be a woman and a Jew and to explore how the two identities variously support and oppose each other The collection is part of a growing scholarship that reflects the enormous output of writing by Jewish women since the second wave of the women's movement in the 1970s

Media, Technology, and Literature in the Nineteenth Century Margaret Linley, 2016-04-29 Operating at the intersection where new technology meets literature this collection discovers the relationship among image sound and touch in the long nineteenth century The chapters speak to the special mixed media properties of literature while exploring the important interconnections of science technology and art at the historical moment when media was being theorized debated and scrutinized Each chapter focuses on a specific visual acoustic or haptic dimension of media while also calling attention to the relationships among the three Famous works such as Wordsworth's *I wandered lonely as a cloud* and Shelley's *Frankenstein* are discussed alongside a range of lesser known literary scientific and pornographic writings Topics include the development of a print culture for the visually impaired the relationship between photography and narrative the kaleidoscope and modern urban experience Christmas gift books poetry painting and music as remediated forms the interface among the piano telegraph and typewriter Ernst Heinrich Weber's model of rationalized tactility and how the shift from visual to auditory telegraphic instruments amplified anxieties about the place of women in nineteenth century information networks Full of surprising insights and connections the collection offers new impetus for stimulating historical conversations and debates about nineteenth century media while also contributing fresh perspectives on new media and remediation today
