Houghton, 2014-10-29 It is now forty years Walter Houghton writes since Lytton Strachey decided that we knew too much about the Victorian era to view its culture as a whole Recently the tide has turned and the Victorians have been the subject of sympathetic period pieces critical and biographical works and extensive studies of their age but the Victorian mind itself remains blurred for us a bundle of various and often paradoxical ideas and attitudes Mr Houghton explores these ideas and attitudes studies their interrelationships and traces their simultaneous existence to the general character of the age His inquiry is the more important because it demonstrates that to look into the Victorian mind is to see some of the primary sources of the modern mind British Museum Catalogue of printed Books , 1890 Catalogue of Books in the Library of the Philosophical Society of Glasgow Royal Philosophical Society of Glasgow. The Journal of Education ,1880-05 **The Best Books: H, Natural science. H*, Medicine and surgery. I, Arts and trades** William Swan Sonnenschein,1926 Tennyson's Scepticism Aidan Day,2005-09-20 Tennyson is not known for his scepticism This book argues that he should be It proposes a revaluation of the way in which his work is read Tennyson has always been understood as a poet who is committed primarily to endorsing spiritual values But this study argues that much of his poetry is driven by a metaphysical scepticism that is associated in part with rational perspectives deriving from Enlightenment thought The scepticism in Tennyson s poetry partakes in the complex generation of the modern that was taking place in his era One of the purposes of the study is to demonstrate that a cultural studies approach to Tennyson trivialises his intellectual subtlety and complexity Making extensive critical use of Tennyson s manuscript drafts this study provides close readings of Tennyson s earlier shorter poems together with the principal works of his maturity including In Memoriam Maud and The Lover s Tale and will be a valuable resource for Tennyson students and scholars worldwide

Energy, Regional Science and Public Policy M. Chatterji,P. van Rompuy,2012-12-06 For the last three decades space

has become a significant dimension in social science analysis In many developed countries economic growth is slowing down and in some cases restrained due to environmental considerations and the real question is the optimum spread of development over space rather than the growth over time In the developing countries limited and uneven distribution of population and resources and the existence of heterogeneous groups highlighted the need of balanced regional development The energy crisis and the realization that energy resources are very limited and unequally distributed have further emphasized its importance The expected impact and relocation due to energy shortages will have a crucial spatial dimension since manufacturing and service activities dependent on energy are concentrated in a few metropolitan regions connected by transportation communication and cultural factors Regional environment is also dependent on the spatial juxtaposition of activities and energy use The papers included in this volume address some of these considerations They were presented in the International Conference on Regional Science Energy and Environment held at Katholieke Universiteit te Leuven Belgium on May 1975 A second volume titled Environment Regional Science and Interregional Modeling published also by Springer Verlag contains research papers related to environment and space This book does not concern all facets of the energy situation In fact contributions on major oil producing countries U S S R East European and developing countries are not represented
