Wayne,2010-10-11 A comprehensive examination of American women scientists across the sciences throughout the 20th century providing a rich historical context for understanding their achievements and the way they changed the practice of science Much more than a Who s Who this exhaustive two volume encyclopedia examines the significant achievements of 20th century American women across the sciences in light of the historical and cultural factors that affected their education employment and research opportunities With coverage that includes a number of scientists working today the encyclopedia shows just how much the sciences have evolved as a professional option for women from the dawn of the 20th century to the present American Women

of Science since 1900 focuses on 500 of the 20th century's most notable American women scientists many overlooked undervalued or simply not well known In addition it offers individual features on 50 different scientific disciplines Women in Astronomy etc as well as essays on balancing career and family girls and science education and other sociocultural topics Readers will encounter some extraordinary scientific minds at work getting a sense of the obstacles they faced as the scientific community faced the questions of feminism and gender confronting the nation as a whole *American Women in Science: 1950 to the Present* Martha J. Bailey, 1998-11 *American Women in Science 1950 to the Present* A Biographical Dictionary surveys more than 300 women who have made significant contributions to major fields of scientific endeavor since 1950 Each concise A to Z biography includes information on the woman's background employment history honors and publications and places her achievements in the appropriate scientific and social contexts All entries are indexed by name profession and subject making this an outstanding reference for anyone interested in the scientific achievements of women

Women Scientists in America Margaret W. Rossiter, 2012-02-21 The third volume of Margaret W. Rossiter's landmark survey of the history of American women scientists focuses on their pioneering efforts and contributions from 1972 to the present Central to this story are the struggles and successes of women scientists in the era of affirmative action Scores of previously isolated women scientists were suddenly energized to do things they had rarely if ever done before form organizations and recruit new members start rosters and projects put out newsletters confront authorities and even fight and win lawsuits Rossiter follows the major activities of these groups in several fields from engineering to the physical biological and social sciences and their campaigns to raise consciousness see legislation enforced lobby for passage of the Equal Rights Amendment and serve as watchdogs of the media This comprehensive volume also covers the changing employment circumstances in the federal government academia industry and the nonprofit sector and discusses contemporary battles to increase the number of women members of the National Academy of Science and women presidents of scientific societies In writing this book Rossiter mined nearly one hundred previously unexamined archival collections and more than fifty oral histories With the thoroughness and resourcefulness that characterize the earlier volumes she recounts the rich history of the courageous and resolute women determined to realize their scientific ambitions **Women Scientists in America**

Margaret W. Rossiter, 1982 Winner of the Berkshire Conference of Women Historians Prize In volume one of this landmark study focusing on developments up to 1940 Margaret Rossiter describes the activities and personalities of the numerous women scientists astronomers chemists biologists and psychologists who overcame extraordinary obstacles to contribute to the growth of American science This remarkable history recounts women's efforts to establish themselves as members of the scientific community and examines the forces that inhibited their active and visible participation in the sciences

American Women Scientists Moira Davison Reynolds, 2004-10-26 For most of the 20th century American women had little encouragement to become scientists In 1906 there were only 75 female scientists employed by academic institutions in

the entire country Despite considerable barriers determined women have however decidedly distinguished themselves Three examples Astronomer Annie Jump Cannon discovered five novas and over 300 other stars Mathematician and computer scientist Grace Hopper helped invent the COBOL language Anesthesiologist Virginia Apgar devised the now universally used Apgar score to make a rapid evaluation of a newborn s condition just after delivery Of the 23 American women scientists covered six were awarded Nobel prizes Each biography is accompanied by a photograph A bibliography and an index complete the work
