The Making of British Anthropology, 1813-1871 Efram Sera-Shriar, 2016-08-03 Victorian anthropology has been derided as an armchair practice distinct from the scientific discipline of the twentieth century. But the observational practices that characterized the study of human diversity developed from the established sciences of natural history, geography and medicine. Sera Shriar argues that anthropology at this time went through a process of innovation which built on scientifically grounded observational study. Far from being an evolutionary dead end, nineteenth century anthropology laid the foundations for the field based science of anthropology today.
