Scorched Earth Fred A. Wilcox, 2011-09-13 *Scorched Earth* is the first book to chronicle the effects of chemical warfare on the Vietnamese people and their environment where even today more than 3 million people including 500 000 children are sick and dying from birth defects cancer and other illnesses that can be directly traced to Agent Orange dioxin exposure Weaving first person accounts with original research Vietnam War scholar Fred A Wilcox examines long term consequences for future generations laying bare the ongoing monumental tragedy in Vietnam and calls for the United States government to finally admit its role in chemical warfare in Vietnam Wilcox also warns readers that unless we stop poisoning our air food and water supplies the cancer epidemic in the United States and other countries will only worsen and he urgently demands the chemical manufacturers of Agent Orange to compensate the victims of their greed and to stop using the Earth's rivers lakes and oceans as toxic waste dumps Vietnam has chosen August 10 the day that the US began spraying Agent Orange on Vietnam as Agent Orange Day to commemorate all its citizens who were affected by the deadly chemical *Scorched Earth* will be released upon the third anniversary of this day in honor of all those whose families have suffered and continue to suffer from this tragedy

Scorched Earth Jonathan Crary, 2022-04-12 Refusing the digital world of late capitalism In this uncompromising essay Jonathan Crary presents the obvious but unsayable reality our digital age is synonymous with the disastrous terminal stage of global capitalism and its financialisation of social existence mass impoverishment ecocide and military terror *Scorched Earth* surveys the wrecking of a living world by the internet complex and its devastation of communities and their capacities for mutual support This polemic by the author of *24/7* dismantles the presumption that social media could be an instrument of radical change and contends that the networks and platforms of transnational corporations are intrinsically incompatible with a habitable earth or with the human interdependence needed to build egalitarian post capitalist forms of life

Scorched Earth Emmanuel Kreike, 2022-10-25 A global history of environmental warfare and the case for why it should be a crime The environmental infrastructure that sustains human societies has been a target and instrument of war for centuries resulting in famine and disease displaced populations and the devastation of people's livelihoods and ways of life *Scorched Earth* traces the history of scorched earth military inundations and armies living off the land from the sixteenth to the twentieth century arguing that the resulting deliberate destruction of the environment environicide constitutes total war and is a crime against humanity and nature In this sweeping global history Emmanuel Kreike shows how religious war in Europe transformed Holland into a desolate swamp where hunger and the black death ruled He describes how Spanish conquistadores exploited the irrigation works and expansive agricultural terraces of the Aztecs and Incas triggering a humanitarian crisis of catastrophic proportions Kreike demonstrates how environmental warfare has continued unabated into the modern era His panoramic narrative takes readers from the Thirty Years War to the wars of France's Sun King and from the Dutch colonial wars in North America and Indonesia to the early

twentieth century colonial conquest of southwestern Africa Shedding light on the premodern origins and the lasting consequences of total war *Scorched Earth* explains why ecocide and genocide are not separate phenomena and why international law must recognize environmental warfare as a violation of human rights *Scorched Earth*, 2018 The Scorched Earth Drew Karpysbyn, 2014-08-19 New York Times bestselling author Drew Karpysbyn has long thrilled readers with his kinetic fast paced storytelling style Now he returns with *The Scorched Earth* the second novel in his acclaimed series about four young people who will either save the world or bring about its destruction The Children of Fire four mortals touched by the power of Chaos each embody one aspect of a fallen and banished immortal champion Keegan the wizard Scythe the warrior Cassandra the prophet Vaaler the king Grown to adulthood the Children are in search of the ancient Talismans that can stop the return of Daemron the Slayer ancient enemy of the Old Gods But in acquiring Daemron's Ring they unleashed a flood of Chaos magic on the land leaving death destruction and a vengeful queen in their wake Now beset on all sides by both mortal and supernatural enemies they realize that their strength and faith will be tested as never before And their greatest trial will be finding Daemron's Sword the last of the ancient Talismans before the entire mortal world is engulfed in the war and Chaos that will herald the return of the Slayer Praise for *The Scorched Earth* Drew Karpysbyn's doom laden spin on myth and magic invigorates ancient archetypes in the second entry of the Chaos Born trilogy The journey is complicated by unnerving ambiguity grim imagery and pessimistic overtones as if Michael Moorcock's decadence were filtered through J R R Tolkien's heroism Publishers Weekly If you're a fan of fantasy and looking to try something new this series continues to shine Karpysbyn writes deep intriguing characters set in a strange world of unique magic It's a place where magic is dangerous but essential Roqoo Depot An enjoyable read I recommend this for all fantasy fans Book Reviews Giveaways *Scorched Earth* David L. Robbins, 2009-12-16 From David L Robbins bestselling author of *The End of War* and *War of the Rats* comes a novel of searing intensity and uncompromising vision Part mystery part legal thriller it is a story of crime and punishment set in a small southern town during one brutal hot and unforgiving summer that lays bare the potential of the human heart to hate and ultimately to heal *Scorched Earth* The inhabitants of Good Hope Virginia haven't felt the cooling effects of rain in weeks The crops are withering The ground is parched There is no relief in sight With the town a tinderbox waiting to explode all it takes is a spark to ignite all the prejudice the rage and the secrets that are so carefully kept hidden And then in the midst of the terrible heat a tragedy occurs A baby is born and dies in her mother's arms The child Nora Carol is buried quickly and quietly the next day in a church graveyard It should have ended right there but it didn't for Nora Carol is of mixed race The white deacons of Good Hope's Victory Baptist Church trying to protect the centuries old traditions of their cemetery have the body exhumed That night the church is set ablaze and the sole witness is the only suspect Elijah Waddell Nora Carol's father Nat Deeds a former prosecutor and an exile of Good Hope is pressed into service as Elijah's attorney With a politically savvy prosecutor and a vindictive sheriff aligned against him Nat knows it will be nearly

impossible to get Elijah acquitted But Elijah refuses to accept a plea As the evidence mounts Nat begins to suspect there is something his client isn't telling him and the next revelation turns Good Hope into a powder keg a body is found in the ashes of the church Now Elijah is accused of murder and the case is no longer a matter of winning or losing but of life or death The only way Nat can save his client is to scratch and claw for any shred of evidence even if he has to bend the law to find it As the summer heat intensifies and passions reach their boiling point Nat must navigate through the incendiary secrets kept by friends and neighbors by the guilty and the innocent to an act of justice that has nothing to do with the law

Scorched Earth Robert D. Nault, **The Chinese People at War** Diana Lary, 2010-07-26 Diana Lary one of the foremost historians of the period tells the tragic history of China's War of Resistance and its consequences from the perspective of those who went through it Using archival evidence only recently made available interviews with survivors and extracts from literature she creates a vivid and highly disturbing picture of the havoc created by the war the destruction of towns and villages the displacement of peoples and the accompanying economic and social disintegration As the author suggests in a new interpretation of modern Chinese history far from stemming the spread of communism from the USSR which was the Japanese pretext for invasion the horrors of the war and the damage it created nurtured the Chinese Communist Party and helped it to win power in 1949

Scorched Earth Warren Murphy, 1996 [The Complete Idiot's Guide to 20th-century History](#) Alan Axelrod, 1999 Provides an overview of the people events and ideas that shaped the twentieth century covering wars and political conflicts innovations in technology and the contributions of such great minds as Sigmund Freud and Albert Einstein

Honolulu District, 1997 **The Law of Armed Conflict and the Use of Force** Frauke Lachenmann, Rüdiger Wolfrum, 2017 This volume collects articles on the law of armed conflict and the use of force from the Max Planck Encyclopedia of Public International Law to facilitate easy access to content from the leading reference work in international law

Customary International Humanitarian Law Jean-Marie Henckaerts, Louise Doswald-Beck, 2005 In 1996 the International Committee of the Red Cross alongside a range of renowned experts embarked upon a major international study into current state practice in international humanitarian law in order to identify customary law in this area This book is the result of that study a comprehensive analysis of the customary rules of international humanitarian law applicable in international and non international armed conflicts Given that important treaties in this area have not yet been universally ratified this is a publication of major importance carried out at the express request of the international community In so doing this study identifies the common core of international humanitarian law binding on all parties to all armed conflicts

Scorched Earth Rocky Barker, 2013-09-24 In 1988 forest fires raged in Yellowstone National Park destroying more than a million acres As the nation watched the land around Old Faithful burn a longstanding conflict over fire management reached a fever pitch Should the U S Park and Forest Services suppress fires

immediately or allow some to run their natural course When should firefighters be sent to battle the flames and at what cost In *Scorched Earth* Barker an environmental reporter who was on the ground and in the smoke during the 1988 fires shows us that many of today's arguments over fire and the nature of public land began to take shape soon after the Civil War As Barker explains how the government responded to early fires in Yellowstone and to private investors in the region led ultimately to the protection of 600 million acres of public lands in the United States Barker uses his considerable narrative talents to bring to life a fascinating but often neglected piece of American history *Scorched Earth* lays a new foundation for examining current fire and environmental policies in America and the world Our story begins when the West was yet to be won with a colorful cast of characters a civil war general and his soldiers America's first investment banker railroad men naturalists and fire fighters all of whom left their mark on Yellowstone As the truth behind the creation of America's first national park is revealed we discover the remarkable role the U S Army played in protecting Yellowstone and shaping public lands in the West And we see the developing efforts of conservation's great figures as they struggled to preserve our heritage With vivid descriptions of the famous fires that have raged in Yellowstone the heroes who have tried to protect it and the strategies that evolved as a result Barker draws us into the very heart of a debate over our attempts to control nature and people This entertaining and timely book challenges the traditional views both of those who arrogantly seek full control of nature and those who naively believe we can leave it unaltered And it demonstrates how much of our broader environmental history was shaped in the lands of Yellowstone

Final Solutions Benjamin A. Valentino, 2013-01-14 Benjamin A Valentino finds that ethnic hatreds or discrimination undemocratic systems of government and dysfunctions in society play a much smaller role in mass killing and genocide than is commonly assumed He shows that the impetus for mass killing usually originates from a relatively small group of powerful leaders and is often carried out without the active support of broader society Mass killing in his view is a brutal political or military strategy designed to accomplish leaders most important objectives counter threats to their power and solve their most difficult problems In order to capture the full scope of mass killing during the twentieth century Valentino does not limit his analysis to violence directed against ethnic groups or to the attempt to destroy victim groups as such as do most previous studies of genocide Rather he defines mass killing broadly as the intentional killing of a massive number of noncombatants using the criteria of 50 000 or more deaths within five years as a quantitative standard *Final Solutions* focuses on three types of mass killing communist mass killings like the ones carried out in the Soviet Union China and Cambodia ethnic genocides as in Armenia Nazi Germany and Rwanda and counter guerrilla campaigns including the brutal civil war in Guatemala and the Soviet occupation of Afghanistan Valentino closes the book by arguing that attempts to prevent mass killing should focus on disarming and removing from power the leaders and small groups responsible for instigating and organizing the killing

Korean War Comic Books Leonard Rifas, 2021-04-30 Comic books have presented fictional and fact based stories of the Korean War as it was being fought and afterward

Comparing these comics with events that inspired them offers a deeper understanding of the comics industry America's forgotten war and the anti comics movement championed by psychiatrist Fredric Wertham who criticized their brutalization of the imagination Comics both newsstand offerings and government propaganda used fictions to justify the unpopular war as necessary and moral This book examines the dramatization of events and issues including the war's origins germ warfare brainwashing Cold War espionage the nuclear threat African Americans in the military mistreatment of POWs and atrocities

Masters of Terror Gerry Van Klinken, Richard Tanter, Desmond Ball, 2006-06-16 The terror campaign by pro Indonesian armed groups before during and after East Timor's independence referendum in 1999 was a blatant challenge to the international community as many of the acts of murder political intimidation destruction and mass deportation took place before the eyes of the world Yet still the ultimate responsibility has been denied and obscured Masters of Terror provides an authoritative analysis and documentation of the brutal operations carried out by the Indonesian army and its East Timorese allies The authors carefully assemble detailed accounts of the actions of the major Indonesian officers and East Timorese militia commanders accused of gross human rights violations This indispensable work explores a horrific frontal attack on democracy and calls for the establishment of an international tribunal for crimes against humanity in East Timor

Cosmopolitan Belongingness and War Matthew Leep, 2021-05-01 In *Cosmopolitan Belongingness and War* Matthew Leep develops a cosmopolitan account of war that blends sharp inquiry into interspecies politics with original poetry on animals loss and war Informed by the works of Jacques Derrida this book is not only a somber and sobering exploration of the loss of animal lives during the Iraq War from the initial US invasion to later struggles with ISIS but also an imaginative tracing of animal experiences in spectral poetic moments By emphasizing elegies poetic space and multispecies belonging Leep envisions the cosmopolitan text as a hybrid form of critical and poetic engagement with animal others An insightful mix of cosmopolitan poetics poetry and analysis of the Iraq War in its multispecies entanglements *Cosmopolitan Belongingness and War* connects contemporary concerns with political violence memory and interspecies politics to imagine a more spectral posthumanist and poetic cosmopolitanism Interdisciplinary in scope this book will engage scholars of international relations political theory US foreign policy animal studies poetry and Derrida as well as those interested in human animal relations in perilous times

Rainbow of Mysteries Norman C. Habel, 2012 Have you ever wondered how you can connect with the sacred in nature or whether there is anything sacred in nature Has the Christian tradition obscured the sacredness of nature Is the Bible alive to the wonder of creation How can we sustain a sense of mystery and an appreciation of the sacred in nature In the biblical Flood narrative the rainbow was the sign of God's covenant promise to never again to destroy the Earth with flood waters The rainbow served to remind God of God's own bond with Earth My rainbow says Habel represents my covenant promise to explore my bonds with Earth my spiritual connections with creation Each colour represents an often overlooked aspect of creation and inspires the reader to consider our place in nature Using poetry and prose Norman Habel

journeys deep into his personal experiences of the sacred in nature from his initial sense of alienation from Earth to his eventual homecoming Along the way he investigates seven wonders of nature and their spiritual dimensions or mysteries He explores biblical texts that praise or suppress creation and examines each mystery through the lens of ecology and his own experiences Ultimately his goal is to discern how to sustain each mystery and its spiritual dimension The book includes a suggested workshop outline and seven rites to explore mystery in nature
