Cultural Change And The New Europe Thomas M. Wilson, 2019-03-08. Politicians can negotiate currency disputes, redraw national boundaries, and raise trade tariffs, but what unforeseen problems may be caused by the melding of societal boundaries and the lowering of cultural tariffs? Originating from a range of nationalities and ethnic groups, the contributors to this volume focus on cultural and social processes of Environment, labour and capitalism at sea.

Penny McCall Howard, 2017-04-28. This book explores how fishers make the sea productive through their labour using technologies ranging from wooden boats to digital GPS plotters to create familiar places in a seemingly hostile environment. It shows how their lives are affected by capitalist forces in the markets they sell to, forces that shape even the relations between fishers on the same boat. Fishers frequently have to make impossible choices between safe seamanship and staying afloat economically, and the book describes the human impact of the high rate of deaths in the fishing industry. The book makes a unique contribution to understanding human-environment relations, examining the places fishers create and name at sea, as well as technologies and navigation practices. It combines phenomenology and political economy to offer new approaches for analyses of human-environment relations and technologies.

Brown, 2019-10-17 Exposes the mechanisms by which conservative Christianity dominated British culture during 1945-65 and their subsequent collapse The Ecology of Pastoralism P. Nick Kardulias, 2015-04-15 In *The Ecology of Pastoralism* diverse contributions from archaeologists and ethnographers address pastoralism's significant impact on humanity's basic subsistence and survival focusing on the network of social political and religious institutions existing within various societies dependent on animal husbandry Pastoral peoples both past and present have organized their relationships with certain animals to maximize their ability to survive and adapt to a wide range of conditions over time Contributors show that despite differences in landscape environment and administrative and political structures these societies share a major characteristic high flexibility Based partially on the adaptability of various domestic animals to difficult environments and partially on the ability of people to establish networks allowing them to accommodate political social and economic needs this flexibility is key to the survival of complex pastoral systems and serves as the connection among the varied cultures in the volume In *The Ecology of Pastoralism* a variety of case studies from a broad geographic sampling uses archaeological and contemporary data and offers a new perspective on the study of pastoralism making this volume a valuable contribution to current research in the area Europe Since 1945 Bernard A. Cook, 2014-01-27 *Europe Since 1945* An Encyclopedia is a comprehensive reference work of some 1 700 entries in two volumes Its scope includes all of Europe and the successor states to the former Soviet Union The volumes provide a broad coverage of topics with an emphasis on politics governments organizations people and events crucial to an understanding of postwar Europe Also includes 100 maps and photos **Dissent, Revolution and Liberty Beyond Earth** Charles Cockell, 2016-03-10 This volume provides an in depth discussion on the central question how can people express and survive dissent and disagreement in confined habitats in space The discussion is an important one because it could be that the systems of interdependence required to survive in space are so strong that dissent becomes impossible John Locke originally said that people have a right to use revolution to overthrow a despotic regime But if revolution causes violence and damage that causes depressurisation with the risk of killing many people is it even permissible to have a revolution How then are people to express their liberty or dissatisfaction with their rulers The emergence of structures of dissent and disagreement is an essential part of the construction of a framework of liberty in space revolution is just the extreme example and thus the topic

deserves in depth and immediate attention Even today the way in which we assemble organisations and corporations for the government and private exploration of space must take into account the need for mechanisms to allow people to express dissent *Humans* Alice Beck Kehoe,2013-12-02 First Published in 1998 Routledge is an imprint of Taylor Francis an informa company **Disaster Culture** Gregory Button,2016-06-03 Drawing on decades of research on the most infamous human and environmental calamities Button shows how states corporations and other actors attempt to create meaning and control social relations in post disaster struggles for the redistribution of power Journal of Scottish Historical Studies ,2005 **Landscapes of Protest in the Scottish Highlands after 1914** Iain J.M. Robertson,2016-04-15 In November 1918 the implementation of agrarian change in the Scottish Highlands threatened another wave of unemployment and eviction for the land working population which led to widespread and varied social protest Those who had been away on war service and their families faced returning to exactly the same social and economic conditions in the Scottish Highlands they had hoped they had left behind in the struggle to make a land fit for heroes Widespread and varied social protest rapidly followed It argues that previously there has been a failure to capture fully the geography chronology typology and rate of occurrence of these events The book not only offers new insights and a greater understanding of what was happening in the Highlands in this period but illustrates how a range of forms of protest were used which demand attention not least for the fact that these events unlike most of the earlier Land Wars period were successful There are functioning townships in the Highlands today that owe their existence to the land invasions of the 1920s The book innovatively concentrates on formulating explanation and interpretation from within and looks to the crofting landscape as base means and motive to disturbance and interpretation It proposes that protest is much more convincingly understood as an expression of environmental ethics from the bottom up coming increasingly into conflict with conservationist views expressed from the top down It focuses on individual case studies in order to engage more convincingly with an important evidential base that of popular memory of land disturbances and to adopt a frame and lens through which to explore the fluid and contingent nature of protest performances Based upon the belief that in the study of landscapes of social protest the old shibboleth of space as solely passive setting and symbolic register is no longer tenable is paid here to nature culture interactions to vernacular ecological b
