Making the Modern Reader Barbara M. Benedict, 2018-12-04 Inquiring into the formation of a literary canon during the Restoration and the eighteenth century Barbara Benedict poses the question Do anthologies reflect or shape contemporary literary taste She finds that there was a cultural dialectic at work miscellanies and anthologies transmitted particular tastes while in turn being influenced by the larger culture they helped to create Benedict reveals how anthologies of the time often created a consensus of literary and aesthetic values by providing a bridge between the tastes of authors editors printers booksellers and readers *Making the Modern Reader* the first full treatment of the early modern anthology is in part a history of the London printing trade as well as of the professionalization of criticism Benedict thoroughly documents the historical redefinition of the reader once a member of a communal literary culture the reader became private and introspective morally and culturally shaped by choices in reading She argues that eighteenth century collections promised the reader that culture could be acquired through the absorption of literary values This process of cultural education appealed to a middle class seeking to become discriminating consumers of art By addressing this neglected genre Benedict contributes a new perspective on the tension between popular and high culture between the common reader and the elite This book will interest scholars working in cultural studies and those studying noncanonical texts as well as eighteenth century literature in general Originally published in 1996 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Scottish Invention of English Literature Robert Crawford, 1998-06-28 The Scottish Invention of English Literature explores the origins of the teaching of English literature in the academy It demonstrates how the subject began in eighteenth century Scottish universities before being exported to America and other countries The emergence of English as an institutionalised university subject was linked to the search for distinctive cultural identities throughout the English speaking world This book explores the role the discipline played in administering restraints on the expression of indigenous literary forms and shows how the growing professionalisation of English as a subject offered a breeding ground for academics and writers with an interest in native identity and cultural nationalism This book is a comprehensive account of the historical origins of the university subject of English literature and provides a wealth of new material on its particular Scottish provenance

The Cambridge Companion to Mary Wollstonecraft Claudia L. Johnson, 2002-05-30 A collected volume which addresses all aspects of Wollstonecraft s momentous and tragically brief career

The Burke-Wollstonecraft Debate Daniel I. O'Neill, 2010-11 Many modern conservatives and feminists trace the roots of their ideologies respectively to Edmund Burke 1729 1797 and Mary Wollstonecraft 1759 1797 Here according to the author Burke is misconstrued if viewed as mainly providing a warning about the dangers of attempting to turn utopian visions into political reality

Reading Children Patricia Crain, 2016-06-13 Reading Children offers a history of the relationship between children and books in Anglo American modernity exploring early children s literature pedagogical practices property lessons inherent in children s book ownership and the emergence of childhood itself as a literary property

Called to Civil Existence Enit Karafili Steiner, 2014-01-05 Mary Wollstonecraft's *A Vindication of the Rights of Woman* 1792 a continuation of her earlier *Vindication of the Rights of Men* 1790 was the first feminist treatise to emerge within a broader context of liberationist human rights theory *Rights of Woman* remains however relevant and instructive The essays included here show that Wollstonecraft's legacy is still with us today as the balancing act between a society where sexual distinction translates into gender prejudice and a utopian order where sexual difference ceases to be a structuring element of social economic and political bias Engaging Wollstonecraft's famous argument from a variety of critical perspectives a range of contemporary scholars offer new trajectories in this volume for the study of Wollstonecraft's historic work and its relevance to our time

Romantic Generations Lene Østermark-Johansen, 2003 Unlike the first two volumes of *ANGLES* on the English Speaking World this special issue does not originate in a set of conference papers The idea of compiling a collection of essays on Romanticism emerged from the unusually strong concentration on Romantic studies among the graduate students of the English Department a couple of years ago This volume places their work in the context of distinguished international scholars of greater seniority scholars who have become academic contacts through conferences and assessment committees and whose contributions I am very pleased to be able to include alongside the works of local contributors The Romantic generations of the title of this volume thus strike a number of different chords generations of scholars in Romantic studies conventional divisions of Romantic poets into first second and possibly third generations the self generative aspect of Romanticism the awareness of poetic reputation and the image and afterlife of the poet The collection spans just over a hundred years from the 1780s to the 1890s and while not in any way attempting to define Romanticism or raise issues of periodization the volume allows for the continued existence of Romantic features right until the end of the nineteenth century Poetry looms large in this issue of *ANGLES* apart from Ian Duncan's essay on Hume Scott and the Rise of Fiction all the other essays are in some way concerned with the Romantic poet and his poetry The Romantic poet is thus represented as a collector and editor of ballads as a political radical and printmaker as other to himself essentially ignorant of the process of poetic composition as a rival and collaborator with other poets or as a poet long dead the subject of successive generations of poetic lament The boundaries between poetry and the visual arts is explored in a couple of the essays indeed the rivalry between portraiture and literature pervades no less than three of the contributions and no matter whether the subject of inquiry is the image of the poet or the image of the poet's mother the Romantic poet displays a high degree of self consciousness with respect to both literary and visual media Romantic generations generate both selves and others in poetry and portraiture
