The Scourging of Iraq Geoffrey Leslie Simons, 1998 *Punishment, Justice and International Relations* Anthony F. Lang Jr., 2009-10-16 This volume argues that a wide range of policies in the international system today economic sanctions military intervention and counter terrorism policy are part of a punitive ethos that has arisen since the end of the Cold War

A Strategic Understanding of UN Economic Sanctions Golnoosh Hakimdavar, 2013-10-08 Economic Sanctions are increasingly used as a legal non military technique of combating abusers of international peace However it remains unclear how the success or failure of these sanctions is measured This book examines the seldom explored United Nations economic sanctions deliberation process and exposes systematic problems in the measurement of the success or failure of these sanctions Centering on the key concepts of peace and security the author brings the reader's attention to the discrepancies that exist in the process of decision making implementation and evaluation of UN imposed economic sanctions She engages international law and development methods to provide proof for the lack of consensus in measures of success and failure which in turn suggests that sanction implementation on a uniform domestic front are unattainable This thorough analysis concludes with suggestions for improving the sanctions process only to clear the path for negating them as a whole and suggest alternative non coercive measures for mitigating conflict situations and threats to peace and security

The Iraqi Predicament Tareq Y. Ismael,Jacqueline S. Ismael,2004-03-20 On February 15 2003 over 6 million people around the world marched in protest against a threatened war on Iraq In the light of these remarkable events and the

conflict that followed it is now more important than ever to properly assess Iraq's role in world politics. This book provides a history of Iraq, an assessment of its position in the broader political landscape and a moving account of the day to day reality experienced by the Iraqi people. The authors look at Iraq's and Saddam Hussein's relations and influence in the region of the greater Middle East. They examine the role of the UN sanctions and warfare explaining the impact this has had on Iraq's civil population and related humanitarian questions. They assess American policy towards Iraq and how this has changed since September 11 setting it within the broader context of America's involvement in the Middle East. Finally they look at social policy within Iraq explaining how the internal welfare system has collapsed since the Gulf War and examining the continuing effects of depleted uranium.

Targeting Civilians in War Alexander B. Downes, 2011-05-15. Accidental harm to civilians in warfare often becomes an occasion for public outrage from citizens of both the victimized and the victimizing nation. In this vitally important book on a topic of acute concern for anyone interested in military strategy, international security or human rights, Alexander B. Downes reminds readers that democratic and authoritarian governments alike will sometimes deliberately kill large numbers of civilians as a matter of military strategy. What leads governments to make such a choice? Downes examines several historical cases: British counterinsurgency tactics during the Boer War, the starvation blockade used by the Allies against Germany in World War I, Axis and Allied bombing campaigns in World War II and ethnic cleansing in the Palestine War. He concludes that governments decide to target civilian populations for two main reasons: desperation to reduce their own military casualties or avert defeat, or a desire to seize and annex enemy territory. When a state's military fortunes take a turn for the worse, he finds, civilians are more likely to be declared legitimate targets to coerce the enemy state to give up. When territorial conquest and annexation are the aims of warfare, the population of the disputed land is viewed as a threat and the aggressor state may target those civilians to remove them. Democracies historically have proven especially likely to target civilians in desperate circumstances. In *Targeting Civilians in War*, Downes explores several major recent conflicts including the 1991 Persian Gulf War and the American led invasion of Iraq in 2003. Civilian casualties occurred in each campaign but they were not the aim of military action. In these cases, Downes maintains, the achievement of quick and decisive victories against overmatched foes allowed democracies to win without abandoning their normative beliefs by intentionally targeting civilians. Whether such restraint can be guaranteed in future conflicts against more powerful adversaries is however uncertain. During times of war, democratic societies suffer tension between norms of humane conduct and pressures to win at the lowest possible costs. The painful lesson of *Targeting Civilians in War* is that when these two concerns clash, the latter usually prevails.

Rethinking the 21st Century Doctor Amy Eckert, Laura Sjoberg, 2013-07-04 Rethinking the 21st Century brings much needed context and perspective to the security problems we face today In recent years the Bush Doctrine that the security threats we now face are entirely unprecedented has echoed around the world Global security and stability is now challenged not only by states and nuclear war but by insurgency disease environmental degradation and military privatisation Yet this creates a deep sense of disconnect in the way we perceive politics and can be dangerously stark and ahistorical The chapters here show that far from being a clean break the new problems faced today might actually have old solutions What can Locke tell us about terrorists What does Bentham have to say about sanctions What are the ethics of outsourcing war to private companies By looking back to decades and even centuries of ethical analysis and political theory this book provides fascinating insight into all these questions

The Ethics of Armed Humanitarian Intervention Don E. Scheid, 2014-04-24 The question of military intervention for humanitarian purposes is a major focus for international law the United Nations regional organizations such as NATO and the foreign policies of nations Against this background the 2011 bombing in Libya by Western nations has occasioned renewed interest and concern about armed humanitarian intervention AHI and the doctrine of Responsibility to Protect RtoP This volume brings together new essays by leading international philosophical and political thinkers on the moral and legal issues involved in AHI and contains both critical and positive views of AHI Topics include the problem of abuse and needed limitations the future viability of RtoP and some of its problematic implications the possibility of AHI providing space for peaceful political protest and how AHI might be integrated with post war justice It is an important collection for those studying political philosophy international relations and humanitarian law
