Scrap Iron Destroyers:

V & W Destroyers John Henshaw, 2020-04-30 The revolutionary battleship Dreadnought of 1906 brought together in one package the new technology of oil fired boilers and steam turbines and all big gun armament in doing so she rendered all other capital ships then afloat completely obsolete Ten years later the V they set a completely new and higher standard of technology and were a cut above anything that had come before They were however less revolutionary than evolutionary and in this new book John Henshaw takes the reader through all the developmental stages with a detailed history of the step by step lessons that were learnt not all of which were fortuitous In one package the Royal Navy finally acquired a hull that possessed not just good sea keeping capability but one that was able to carry heavier armament without any adverse effects Range and speed were commensurate with their size while the super firing guns fore and aft could be deployed in all weathers for a four gun broadside The V W design set the trend for all destroyer design for the next two decades and indeed the basic layout of destroyers stayed the same long beyond that The formula of a raised foredeck and superfiring guns fore and aft continued in the Royal Navy until the Battle Class of 1944 and in the United States Navy until the Fletcher Class of 1943 That the V Ws served on through World War II in various forms is a testament to the soundness of the basic concept their adaptability and strength The V stood for Venerable because they certainly proved that and W for Watershed because they were truly a turning point in destroyer design The narrative is superbly illustrated with forty five detailed profile and deck plans for which the author is so well known of the principal early British destroyer types and illustrates all the V Ws through to the end of World War II including some conversions that were considered but never completed The book also looks at the influence of the basic design on the destroyers of other navies This new book which will appeal both to naval historians and modelmakers brings together under one cover a narrative that is comprehensive in its scope well researched and elegantly supported with detailed line drawings and selected photographs for the period 1890 1945 **Scrap Iron**

Flotilla, The Mike Carlton, 2022-08-02 When the Second World War broke out in September 1939 the British asked Australia for help With some misgivings the Australian government sent five destroyers to beef up the British Royal Navy in the Mediterranean HMAS Vendetta Vampire Voyager Stuart and Waterhen were old ships small with worn out engines Their crews used to joke they were held together by string and chewing gum when the Nazi propaganda minister Joseph Goebbels heard of them he sneered that they were a load of scrap iron Yet by the middle of 1940 these destroyers were valiantly escorting troop and supply convoys successfully hunting for submarines and indefatigably bombarding enemy coasts Sometimes the weather could be their worst enemy from filthy sandstorms blowing off Africa to icy gales from Europe that whipped up mountainous seas and froze the guns Conditions on board were terrible no showers or proper washing facilities cramped and stinking sleeping quarters unpleasant meals of spam and tinned sausages often served cold in a howling squall And always the bombing the bombing And the fear of submarines When Nazi Germany invaded Greece the Allied armies

including Australian Divisions reeled in retreat The Australian ships were among those who had to rescue thousands of soldiers Then came the Siege of Tobruk Australian troops holding out in that small Libyan port city The Australian destroyers ran the Tobruk Ferry bringing supplies of food medicine and ammunition into the shattered port by night and taking off wounded soldiers But the four destroyers now left were struggling suffering from constant engine breakdowns with crews beleaguered by two years of bombings wild seas and the endless fear of being sunk In late 1941 the ships were finally sent home staggering back to Australia proudly calling themselves the Scrap Iron Flotilla in defiance of the Goebbels sneer That flotilla is now an immortal part of Australian naval legend and this is its story **The Silent Watchers** Bennet

Copplestone,2018-09-21 Reproduction of the original The Silent Watchers by Bennet Copplestone **The Silent Watchers. England's Navy During the Great War** Bennet Copplestone,2020-09-28 My boyhood was spent in Devon the land of Drake and the home of the Elizabethan Navy A deep passion for the Sea Service is in my blood though owing to family circumstances I was not able to indulge my earliest ambition to become myself one of the band of brothers who serve under the White Ensign My elder brother lived and died afloat Two of my sons happier than their father are privileged to play their parts in the great ships of the Fleets So that though not in the Service I am of it by ties of blood and by ties of the earliest association Whenever I have sought to penetrate its mysteries and to interpret them to my fellow countrymen my motive has never been that of mere idle curiosity The Royal Navy wields and has always wielded a great material force but the secret of its strength lies not in the machines with which it has equipped itself in the various stages of its development Vast and terrible as are the ships and the guns they would be of little worth if their design and skilful employment were not inspired by that spiritual force compounded of tradition training devotion and discipline which I call the Soul of the Navy In the design of its weapons in its mastery of their use above all in its consummate seamanship the Royal Navy has in all ages surpassed its opponents but it has done these things not through some fortuitous gift of the Sea Gods but because of the never failing development of its own spirit It has always been at a great price in the sacrifice of ease and in the outpouring of the lives of men that the Navy has won for itself and for us the freedom of the seas Those who reckon navies in ships and guns in weight of metal and in broadside fire while leaving out of account the spirit and training and devotion of the men can never understand the Soul of the Navy For all these material things are the expression of the Soul they are not the Soul itself The Navy is still the old English Navy of the southern maritime counties of England It has become the Navy of Great Britain the Navy of the British Empire but in spirit and to a large extent in hereditary personnel it remains the English Navy of the Narrow Seas Many counties play a great part in its equipment but to me it is always the Navy of my own land of Devon officers and men are the lineal successors of those bold West Country seamen who in their frail barks ranged the wide seas hundreds of years ago and first taught to us and to the world the meaning of the expression sea communications The Great War Herbert Wrigley Wilson,Sir John Alexander Hammerton,1916 **Four Brothers in the Pacific War** Chris

C W Malins RN,2016-01-08 Charles Wickham Malins was destined for a life at sea from an early age joining the Britannia Royal Naval College at Dartmouth in 1927 at the age of thirteen he was already a Commissioned Officer of His Majesty s Royal Navy before the outbreak of War in 1939 He was what the Navy calls a e Salthorsee officer he did not specialise but went on to become a hugely experienced sea officer and then commander of small ships rising from minesweepers to destroyers It

was in destroyers that he took part in some of the key actions involving these dynamic much admired ships In between taking part in the famous e Pedestale convoy that saved Malta in 1942 e Tickye as he was always known Malins participated in the sinking of numerous enemy submarines and the Arctic convoys to supply Soviet Russia winning a DSO a DSC and bars in the process His story written in early retirement modestly recounts the life of an outstanding Naval Officer from an era when the Royal Navy symbolised all that was best and greatest about Great Britain The transition from the pre War peacetime cruise of HMS Enterprise to the sudden and often violent demands of dramatic sea service which he experienced throughout almost the full length of the War need to be read to be believed The quiet matter of fact narrative of his memoir provides both an intimate and affectionate insight to the e Old Navye and its people The book is copiously illustrated with the author s own photos

Destroyer Battles Robert C. Stem,2008-09-18 Fast manoeuvrable and heavily armed destroyers were the most aggressive surface warships of the twentieth century Although originally conceived as a defensive screen to protect the main battlefleet from torpedo attack the gamekeeper soon turned poacher and became primarily a weapon of offence As such they were involved in many hard fought battles using both torpedoes and guns especially with enemy vessels of the same kind This book recounts some of the most significant spectacular or unusual actions in the history of destroyer warfare from the first employment of torpedo craft during the Russo Japanese War to the recent terrorist attack on USS Cole With individual chapters devoted to each incident the book may be read as a series of dramatic narratives but each reflects a development in the tactics or technology so taken as a whole the book amounts to a complete history of the destroyer from an unusual and previously neglected angle

Scrap Iron Destroyers Lewis James Lind,Alan Payne,1976 **British and Commonwealth Warship Camouflage of WWII** Malcolm George Wright,2014-09-15 During the Second World War navies developed low visibility camouflage for their ships on both the vertical and horizontal surfaces in order reduce visibility by blending in with the sea or confuse the identity of a ship by applying more obtrusive patters In this new book by maritime artist Mal Wright both the official and unofficial paint schemes that adorned ships of the Royal Navy and Commonwealth are depicted in detail along with discussion on changes of armament and electronics that effected the outward appearance of each ship Starting with destroyers from WW1 still in service during WW2 the book progressively covers ships below cruisers class by class to provide a detailed and easy to use guide to paint schemes in use In some cases individual ships are shown in the several schemes they wore thus providing a source that covers various periods of service With 740 full colour illustrations all of named vessels this book concentrates information into a single volume to provide a one stop reference source and for the first time in a single volume it covers not just the well known ships but also escort vessels minesweepers trawlers coastal craft and auxiliaries in sequential format Many schemes would be difficult for the reader to have found other than with the most intensive research so that historians collectors modelmakers and wargamers will find this unique reference source absolutely invaluable
