**How Wars End** Dan Reiter, 2009-08-17 Why do some countries choose to end wars short of total victory while others fight on sometimes in the face of appalling odds *How Wars End* argues that two central factors shape war termination decision making information about the balance of power and the resolve of one's enemy and fears that the other side's commitment to abide by a war ending peace settlement may not be credible Dan Reiter explains how information about combat outcomes and other factors may persuade a warring nation to demand more or less in peace negotiations and why a country might refuse to negotiate limited terms and instead tenaciously pursue absolute victory if it fears that its enemy might renege on a peace deal He fully lays out the theory and then tests it on more than twenty cases of war termination behavior including decisions during the American Civil War the two world wars and the Korean War Reiter helps solve some of the most enduring puzzles in military history such as why Abraham Lincoln issued the Emancipation Proclamation why Germany in 1918 renewed its attack in the West after securing peace with Russia in the East and why Britain refused to seek peace terms with Germany after France fell in 1940 *How Wars End* concludes with a timely discussion of twentieth century American foreign policy framing the Bush Doctrine's emphasis on preventive war in the context of the theory

Subculture Dick Hebdige, 2013-10-08 First Published in 2002 It is easy to see that we are living in a time of rapid and radical social change It is much less easy to grasp the fact that such change will inevitably affect the nature of those disciplines that both reflect our society and help to shape it Yet this is nowhere more apparent than in the central field of what may in general terms be called literary studies *New Accents* is intended as a positive response to the initiative offered by such a situation Each volume in the series will seek to encourage rather than resist the process of change To stretch rather than reinforce the boundaries that currently define literature and its academic study
