Making the Fascist Self Mabel Berezin, 2018-10-18 In her examination of the culture of Italian fascism Mabel Berezin focuses on how Mussolini's regime consciously constructed a nonliberal public sphere to support its political aims Fascism stresses form over content she believes and the regime tried to build its political support through the careful construction and manipulation of public spectacles or rituals such as parades commemoration ceremonies and holiday festivities The fascists believed they could rely on the motivating power of spectacle and experiential symbols In contrast with the liberal democratic notion of separable public and private selves Italian fascism attempted to merge the public and private selves in political spectacles creating communities of feeling in public piazzas Such communities were only temporary Berezin explains and fascist identity was only formed to the extent that it could be articulated in a language of pre-existing cultural identities In the Italian case those identities meant the popular culture of

Roman Catholicism and the cult of motherhood Berezin hypothesizes that at particular historical moments certain social groups which perceive the division of public and private self as untenable on cultural grounds will gain political ascendance Her hypothesis opens a new perspective on how fascism works Theorizing Rituals Jens Kreinath, Michael Strausberg, 2006 Volume two of Theorizing Rituals mainly consists of an annotated bibliography of more than 400 items covering those books edited volumes and essays that are considered most relevant for the field of ritual theory Instead of proposing yet another theory of ritual the bibliography is a comprehensive monument documenting four decades of theorizing rituals Animals in Ritual and Economy in a Roman Frontier Community Maaïke Groot, 2008 Religion Opfer Ritus Ern hrung *Postsecular Poetics* Rebekah Cumpsty, 2022-08-11 This book is the first full length study of the postsecular in African literatures Religion secularism and the intricate negotiations between the two codified in recent criticism as postsecularism are fundamental conditions of globalized modernity These concerns have been addressed in social science disciplines but they have largely been neglected in postcolonial and literary studies To remedy this oversight this monograph draws together four areas of study it brings debates in religious and postsecular studies to bear on African literatures and postcolonial studies The focus of this interdisciplinary study is to understand how postsecular negotiations manifest in postcolonial African settings and how they are represented and registered in fiction Through this focus this book reveals how African and African diasporic authors radically disrupt the epistemological and ontological modalities of globalized literary production often characterized as secular and imagine alternatives which incorporate the sacred into a postsecular world Ritual, Heritage and Identity Christiane Brosius, Karin M. Polit, 2020-11-29 This book explores the importance of ritual and ritual theory to discourses of authenticity and originality thereby deepening our insight into concepts of cultural heritage identity and nation in a globalised world The volume is the first interdisciplinary attempt to understand the significance of rituals and related performative traditions in the creation of grounded cultural identities home and heritage as geographically experienceable locations It assembles perspectives from social and cultural anthropology performance studies education and arts that can deal with the politics of revitalisation and preservation of ritualised traditions While some chapters in this book emphasise on the ritualisation of cultural heritage by concentrating on power relations and politics as well as actual processes of identification especially for marginalised ethnic groups or migrant communities others explore how rituals as intangible heritage are strategically employed by different groups all over the world to make their claims public and to improve and negotiate their position on a local national or global platform This book recognises ritualised performances as transnational and cross cultural phenomena which are not only tied to and defined via national territories and identities but which also demand new theoretical and methodological approaches towards the discussion of rituals and heritage The Ashgate Research Companion to Anthropology Andrew J. Strathern, 2016-03-03 This companion provides an indispensable overview of contemporary and classical issues in social and cultural anthropology Although anthropology has expanded greatly over time
