## **Security Dynamics Of Demographic Factors:**

*The Security Dynamics of Demographic Factors*, 2000 This report presents a framework for understanding the implications of global demographic trends for international and U S national Security One of its goals is to spark discussion between demographers and national security analysts The document should be of interest to security analysts demographers foreign policymakers and general audiences interested in the implications of demographic trends for international security policy This research was jointly sponsored by the Population Matters project in RAND s Labor and Population Program and by the RAND Arroyo Center A principal goal of Population Matters is to inform both public and specialist audiences about the findings of demographic research and their implications for policy The Population Matters project is funded by grants from the William and Flora Hewlett Foundation the Rockefeller Foundation and the David and Lucile Packard Foundation The Arroyo Center is a federally funded research and development center sponsored by the United States Army This work inspired by prior research on alternative security futures conducted in the Strategy Doctrine and Resources Program of the Arroyo Center drew only from sources in the public domain The principal aim of this report is to provide a framework for understanding the influence of demographic factors on international security issues Specifically three major questions are addressed what current demographic trends pose international security concerns What are the security implications of these trends what are the implications for U S foreign defense and intelligence policies

**Environmental Change and Security Project Report**, 2002 Population Puzzle Laura E. Huggins, Hanna Skandera, 2013-09-01 Drawing from government reports think tank studies scholarly journals magazines newspapers and books this insightful overview offers a range of contrasting viewpoints and policy perspectives on the major issues concerning world population growth with particular emphasis on the impact of population trends on the United States Germany's New Security Demographics Wenke Apt, 2013-12-04 Military recruitment will become more difficult in times of demographic aging The question arises whether demographic change will constrain the capacity of aging states like Germany to conduct foreign policy and pursue their national security interests Since contemporary military operations still display a strong human element particular scrutiny is given to the empirical analysis of the determinants of military propensity and military service among youth An additional human capital projection until 2030 illustrates how the decline in the youth population will interact with trends in educational attainment and adolescent health to further complicate military recruitment in the future A concluding review of recruiting practices in other NATO countries provides insight in best practice policy options to reduce the military s sensitivity to demographic change Following this approach the book gives prominence to a topic that has thus far been under represented in the greater discussion of demographic change today namely the demographic impact on international affairs and strategic calculations **Dire Demographics** Julie DaVanzo, Clifford Anthony Grammich, 2001 Presents a Rand study of population trends in the Russian Federation The Graying of the Great Powers Richard Jackson, Neil Howe, 2008-05-23 The

demographic trends of the twenty first century will challenge the geopolitical assumptions of both the left and the right

**BOOK JACKET      *Walking the Tightrope*** Jaïr van der Lijn, 2006 The media generally tend to focus in particular on the failures of U N peacekeeping operations In *Walking the Tightrope* Jaïr Van Der Lijn draws a different conclusion He argues once a peace agreement has been signed the efforts of the U N peacekeeping operations do contribute to durable peace By analyzing the U N peacekeeping operations in Cambodia Mozambique Rwanda and El Salvador in a structured focused comparison this book shows how U N operations do have a contribution to make      *Global Demographic Change and Its Implications for Military Power* Martin C. Libicki, Howard J. Shatz, Julie E. Taylor, 2011-07-18 What is the impact of demographics on the prospective production of military power and the causes of war This monograph analyzes this issue by projecting working age populations through 2050 assessing the influence of demographics on manpower national income and expenditures and human capital and examining how changes in these factors may affect the ability of states to carry out military missions      *China and International Security* Donovan C. Chau, Thomas M. Kane, 2014-04-17 The first work of its kind this strategic assessment of China s national security reveals the nation s intentions capabilities and threats and their implications for the United States and the world As China continues to develop the strategic means to advance its national interests in Asia and around the world assessing its role in international security is the greatest strategic challenge now faced by the United States and its allies *China and International Security* facilitates this critically important understanding analyzing topics that range from strategic geography and orientation to gender ratios Using detailed case studies and sharing expert insights the work provides historical internal and contemporary analyses that reveal the nature and character of China s national security This three volume set is written for scholars students and policymakers The volumes offer in depth articles penned by intelligence professionals and journalists as well as entries by scholars in fields as diverse as international politics history and strategic studies While other works may attempt to predict the future of China s rise or the nature of China s future bilateral relationships none so thoroughly examines the totality of China s domestic regional and international security and their implications      ***Demographics and the Changing National Security Environment***, 2000 Demographic factors seldom directly cause conflict between nations They can however exacerbate existing tensions and increase the risk of violent conflict Long term fertility trends urbanization migration and changes in the ethnic composition and age profile of populations can influence the likelihood and nature of conflict among and within nations Brian Nichiporuk explores these issues in *The Security Dynamics of Demographic Factors* seeking to answer three questions in particular First which demographic trends pose international security concerns Second what are the security implications of these trends Third what should the United States do% in response to these issues The future international security environment of course will be determined by complex interactions between geographical alignments technologic%al advances economic developments environmental trends and demographic factors This research does not address all these complex interactions

but it does note the direction in which demographic factors can affect security issues

**Environmental Security** Elizabeth L. Chalecki, 2013-01-24 This timely volume presents the key concepts issues and debates surrounding environmental security illustrating through a range of examples and cases how global environmental matters and international security are closely linked Issues of climate change dwindling resources natural disaster and disease that comprise environmental security are at the forefront of global politics and the media today Environmental Security A Guide to the Issues is a primer for anyone attuned to these threats This well reasoned thought provoking volume establishes and updates the connection between global environmental problems and international security describing existing theories of environmental security and illustrating them with evidence from present day global ecological realities Specifically the book shows readers how both shortages and abundance of natural resources such as fresh water oil and natural gas and diamonds and timber can contribute to conflict and insecurity It also discusses how agriculture and fisheries issues affect food security with international ramifications how global ecosystem shifts like climate change are affecting both the earth and the movement of people on it and how war and preparation for war can affect the natural environment Finally the book explores how nations can and must cooperate with each other to confront and manage these threats

**Human Security and Migration in Europe's Southern Borders** Susana Ferreira, 2018-12-13 This book examines the management of migratory flows in the Mediterranean within an international security perspective The intense migratory flows registered during the year 2015 and the tragedies in the Mediterranean Sea have tested the mechanisms of the Union's immigration and asylum policies and its ability to respond to humanitarian crises Moreover these flows of varying intensities and geographies represent a threat to the internal security of the EU and its member states By using Spain and Italy as case studies the author theorizes that the EU given its inability to adopt and implement a common policy to effectively manage migratory flows on its Southern border uses a deterrence strategy based on minimum common denominators

**Demography and Security** Laurent Murawiec, David Adamson, 2001 Demographic shifts are a cause an effect and a forerunner of geopolitical shocks and transformations Examining these shifts is an important step in any strategic assessment of the global security environment Unfortunately the demographic community and the strategic and defense communities seldom interact Providing venues for such interactions is therefore important For this purpose RAND sponsored a workshop on Demography and National Security in Paris at the initiative of RAND's Population Matters program in November 2000 The workshop brought together French American and other European demographers senior representatives from the French Ministry of Defense and researchers economists and experts in geopolitics Revealing differences emerged both between demographers and national security experts and also between American and French participants Different objects of concern surfaced and contrasting views of phenomena were debated For example immigration and its social cultural and political impacts tended to be seen in an altogether different light on the two sides of the Atlantic Americans were more likely to focus on the geopolitical implications

outside U S borders while Europeans focused on its domestic implications      Promoting Reproductive Security in Developing Countries Maurice I. Middleberg, 2005-12-29 Promoting Reproductive Security in Developing Countries provides a comprehensive approach to developing and implementing reproductive health programs in the developing world It fills a major gap in the literature by responding to the global need for a detailed guide to comprehensive reproductive health services Promoting Reproductive Security in Developing Countries furnishes an innovative conceptual model reproductive security and offers an in depth analysis of major reproductive health issues The need for skilled dedicated professionals is great Those who choose to pursue the discipline are promised an endlessly rewarding and absorbing profession that will touch upon the most intimate aspects of life while reverberating globally This book will be of great interest to public health professionals on both a local and global level international policy makers and relief workers      *Population Decline and the Remaking of Great Power Politics* Susan Yoshihara, Douglas A. Sylva, 2012 Remarkably most conventional wisdom about the shifting balance of world power virtually ignores one of the most fundamental components of power population The studies that do consider international security and demographic trends almost unanimously focus on population growth as a liability In contrast the distinguished contributors to this volume security experts from the Naval War College the American Enterprise Institute and other think tanks contend that demographic decline in key world powers now poses a profound challenge to global stability The countries at greatest risk are in the developed world where birthrates are falling and populations are aging Many have already lost significant human capital capital that would have helped them innovate and fuel their economy man their armed forces and secure a place at the table of world power By examining the effects of diverging population trends between the United States and Europe and the effects of rapid population aging in Japan India and China this book uncovers increasing tensions within the transatlantic alliance and destabilizing trends in Asian security Thus it argues relative demographic decline may well make the world less and not more secure Publisher      *Migration, Globalisation and Human Security* David T. Graham, Nana K. Poku, 2005-08-04 Migration Globalisation and Human Security looks at a range of security and human security issues related to the displacement of civilian populations and shows how the tenuous existence of migrants can lead to a myriad of human security threats Providing major theoretical analyses of recent migration trends and in depth case studies this book shows that a redefinition of the notion of human security is now needed

**Warlords Rising** Troy S. Thomas, Stephen D. Kiser, William D. Casebeer, 2005-01-01 As non state armed groups gain greater access to resources and networks through global interconnectivity they have come to dominate the terrain of illegal trade in drugs guns and humans Warlords Rising arms those confronting the mounting non state challenge by delivering an innovative interdisciplinary framework of analysis designed to improve understanding of non state adversaries in order to affect their development and performance      **Food security and social assistance in Sudan during armed conflict: Evidence from the first round of the Sudan Rural Household Survey (November 2023-January 2024)** Kirui, Oliver

K.,Ahmed, Mosab,Siddig, Khalid,Taffesse, Alemayehu Seyoum,Abushama, Hala,Dorosh, Paul A.,Krishnaswamy, Siddharth,Monetta, Cinzia,Clough, Alice,Gualtieri, Alberto,Leaduma, Amos,2024-07-01 The conflict in Sudan has severely impacted the food security landscape in rural areas with profound implications for household diets coping strategies and overall food insecurity levels Data from a national rural household phone survey conducted between October 2023 and January 2024 highlights the dire food consumption patterns the prevalence of food insecurity and the reliance on reduced coping strategies among the rural population of Sudan As of the end of 2023 nearly 40 percent of rural households were consuming inadequate diets with West Kordofan South Kordofan North Darfur East Darfur and Sennar states experiencing the highest prevalence of poor food consumption 34 33 29 and 24 percent respectively The primary components of diets were cereals and oils with nutrient rich foods such as meats and fruits consumed less frequently highlighting a critical gap in nutritional adequacy The situation has resulted in households across Sudan resorting to a range of coping strategies to try to meet their food needs such as buying less preferred or less expensive food on average 4 days out of 7 limiting portion sizes or reducing the number of daily meals The five coping mechanisms that were examined in the analysis were found to be implemented with approximately similar frequencies across rural Sudan However the situation was particularly dire in West Darfur South Kordofan and Khartoum the states recording the highest prevalence of consumption of inadequate diets and the highest reduced Coping Strategy Index rCSI scores

**Democratic Uprisings in the New Middle East** Mahmood Monshipouri,2016-01-08 As Egypt retreats from its newly elected government and Syria moves from one crisis to another this book s reflection on the Arab Spring could not be more timely Monshipouri s account of the role of emotion solidarity and online activism is informed by several trips to the region that continue to this day The uprisings were fueled by a demographic surge of young people unable to find employment and frustrated by the lack of freedom and now the elected regime has been ousted for failing to address these continuing circumstances While modern technologies and social media may have brought new politics to the streets organization on the ground trumps the enthusiasm of young protesters when it comes to shaping a country s political future How to turn elections into democracy in these post conflict societies continues to be a daunting task especially in countries with a longstanding history of military involvement in politics now experiencing a resurgence This book addresses all of these subjects in an engaging and accessible narrative Key features of the text

*State of the World 2005* Michael Renner,Linda Starke,Worldwatch Institute,2005 Tackles the pressing issue of international security and its ramifications on the health of our planet
