food and troubled financial markets These crises are linked to each other and to water resources management Unresolved they may lead to increasing political insecurity and conflict Water is required to meet our fundamental needs and rising living standards and to sustain our planets fragile ecosystems Pressures on the resource come from a growing and mobile population social and cultural change economic development and technological change Adding complexity and risk is climate change with impacts on the resource as well as on the sources of pressure on water The challenges though substantial are not insurmountable The Report shows how some countries have responded Progress in providing drinking water is heartening with the Millennium Development Goal target on track in most regions But other areas remain unaddressed and after decades of inaction the problems in water systems are enormous and will worsen if left unattended Leaders in the water sector can inform decisions outside their domain and manage water resources to achieve agreed socioeconomic objectives and environmental integrity Leaders in government the private sector and civil society determine these objectives and allocate human and financial resources to meet them Recognizing this responsibility they must act now Two volume set 336 96 pages case studies Includes CD ROM Published jointly with UNESCO Publishing Security in a Changing World Volker Franke,2002 *The United Nations and Changing World Politics* David P. concentrate on the links between climate change and agricultural production and do not extend to an analysis of the wider food system which underpins food security this book addresses the broader issues based on a novel food system concept and stressing the need for actions at a regional rather than just an international or local level It reviews new thinking which has emerged over the last decade analyses research methods for stakeholder engagement and for undertaking studies at the regional level and looks forward by reviewing a number of emerging hot topics in the food security GEC debate which help set new agendas for the research community at large Published with Earth System Science Partnership GECAFS and SCOPE
