Security In Europe:

Security in Europe Robert Edwards Hunter,1969 Problems of Security and Cooperation in Europe L.

Acimovic,1981-02-18 *Security in 21st Century Europe* Andrew Cottey,2025-05-01 The nature of security in Europe has been transformed in recent years Security in 21st Century Europe argues that the defining feature of contemporary European security is the existence of a security community underpinned by the twin institutions of the EU and NATO but that today the European security community NATO and the EU face a growing array of external challenges and their ability to respond to those challenges is increasingly being called into question Offering a systematic assessment of security in contemporary Europe this third edition examines the changing character of European security and assesses the extent of the threats posed by recent challenges as well as the policy dilemmas involved in responding to these challenges It explores Europe s engagement with core thematic issues in European security including military intervention nuclear weapons terrorism and non military security Providing both a substantive contribution to academic thinking on European security and a overview of debates on contemporary European security this new edition offers 3 new chapters on migration climate change and cybersecurity Coverage of all recent major developments related to European security including the Syrian civil war and the regional destabilization arising from it Russia Ukraine crisis the rise of populism the migration crisis the acceleration of China s rise Security in 21st Century Europe combines theory and detailed empirical analysis exploring both how different theoretical perspectives can help us think about European security and concrete empirical developments in European security policies and institutions This text is the perfect companion for advanced undergraduate and Master s level courses on European security whether within courses in Security studies European studies or International Relations

Security in 21st Century Europe Andrew Cottey,2012-11-19 Fully revised and updated the second edition of this leading textbook provides a systematic assessment of security in contemporary Europe The book examines the changing character of security and assesses the extent of the threats posed by different challenges as well as the policy dilemmas involved in responding to these concerns The nature of security in Europe has been transformed in recent years Andrew Cottey argues that this is a result of two key developments the emergence of a security community a zone of peace where war is inconceivable across much of Europe and the presence of new security threats such as terrorism and energy dependence Set in the context of the rising power of non Western states and the continuing fall out from the global economic crisis this text provides a comprehensive analysis of Europe s new security challenges Europe s traditional problem of war between states is being displaced by a new and equally daunting set of security challenges While major war within Europe remains unlikely the 2008 Georgia war and the 2011 Libya war were reminders that violent conflicts are still prevalent on Europe s periphery and can pose major challenges for European governments NATO and the EU At the same time terrorism nuclear proliferation as well as non military problems like mass migration and climate change threaten Europe s security

This text is the perfect companion for advanced undergraduate and Master's level courses on European security whether within courses in Security studies European studies or International Relations New to this Edition New framework for analysing European security Highly topical issues covered including Arab Spring rise of BRIC countries terrorism and European energy dependence *Remapping Security on Europe's Northern Borders* Jussi P. Laine, Ilkka Liikanen, James W. Scott, 2021-05-03 This book critically analyses the changing EU Russian security environment in the wake of the Ukraine crisis with a particular focus on northern Europe where the EU and the Russian Federation share a common border Russian involvement in conflict situations in the EU's immediate neighbourhood has drastically impacted the European security environment leading to a resurgence of competitive great power relations The book uses the EU Russia interface at the borders of Finland and the European North as a prism through which interwoven external and internal security challenges can be explored Security is considered in the broadest sense of the term as the authors consider how the security environment is reflected politically socially and culturally within European societies The book analyses changing political language and concepts institutional preparedness border governance human security migration and wider challenges to societal resilience Ultimately the book investigates into Finland's preparedness to address new global security challenges and to find solutions to them on an everyday level This book will be an important guide for researchers and upper level students of security border studies Russian and European studies as well as to policy makers looking to develop a wider contextualized understanding of the challenges to stability and security in different parts of Europe **Strategic Cultures in Europe** Heiko Biehl, Bastian Giegerich, Alexandra Jonas, 2013-04-09 European countries work together in crisis management conflict prevention and many other aspects of security and defence policy Closer cooperation in this policy arena seems to be the only viable way forward to address contemporary security challenges Yet despite the repeated interaction fundamental assumptions about security and defence remain remarkably distinct across European nations This book offers a comparative analysis of the security and defence policies of all 27 EU member states and Turkey drawing on the concept of strategic culture in order to examine the chances and obstacles for closer security and defence cooperation across the continent Along the lines of a consistent analytical framework international experts provide case studies of the current security and defence policies in Europe as well as their historical and cultural roots European Security in a Global Context Thierry Tardy, 2010-06-09 This new edited volume examines contemporary European security from three different standpoints It explores security dynamics first within Europe second the interaction patterns between Europe and other parts of the world the United States Africa the Middle East China and India and finally the external perceptions of European security The first part of the book analyses the European security landscape The roles of EU NATO and the OSCE are given particular attention as is the impact of their evolution or enlargement on the European security architecture and European security dynamics In this context Russia's repositioning as a major power appears as a shaping factor of

contemporary European geopolitics The second part presents European security from an external perspective and considers interactions between Europe and other states or regions Security trends and actors in Europe are examined from an American Chinese and Indian perspective while Europe Africa and Europe Middle East relations are also addressed This book will be of great interest to students of European Security European politics and IR in general A Human Security Doctrine for Europe Marlies Glasius, Mary Kaldor, 2006-01-16 A Human Security Doctrine for Europe explores the actual needs of individual people in conflict areas rather than using a conventional institutional or geo political perspectives This new volume proposes that Europe should develop a new kind of human security capability that involves the military the police and civilians all working together to enforce law rather than to fight wars It argues that threats such as weapons of mass destruction or terrorism can only be countered if we address the insecurity of people in all parts of the world Many people in the world lead intolerably insecure lives In large parts of Africa the Balkans Central Asia and the Middle East men and women live in daily fear of violent attacks kidnapping rape extortion robbery or trafficking The existence of large military apparatuses does not create security indeed as in Iraq the use of regular military forces may only make things worse This stimulating study includes two chapters setting out the changed global context and proposing new approaches to security five regional studies on the Balkans the Great Lakes Region the Middle East the South Caucasus and West Africa four studies on different aspects of EU security policy including the legal setting the role of women operational principles and the role of the new member states four operational studies on capabilities resources and institutional embedding Written by a diverse team of international experts this book will be of strong interest to students and researchers of security studies peace studies human rights and international relations *The Routledge Handbook of European Security Law and Policy* E. Conde, Zhaklin V. Yaneva, Marzia Scopelliti, 2019-10-11 The Handbook of European Security Law and Policy offers a holistic discussion of the contemporary challenges to the security of the European Union and emphasizes the complexity of dealing with these through legislation and policy Considering security from a human perspective the book opens with a general introduction to the key issues in European Security Law and Policy before delving into three main areas Institutions policies and mechanisms used by Security Defence Policy and Internal Affairs form the conceptual framework of the book at the same time an extensive analysis of the risks and challenges facing the EU including threats to human rights and sustainability as well as the European Union's legal and political response to these challenges is provided This Handbook is essential reading for scholars and students of European law security law EU law and interdisciplinary legal and political studies *China, Europe and International Security* Frans-Paul van der Putten, Chu Shulong, 2012-07-26 This book examines the roles played by China and Europe in the domain of international security in the 21st century Bringing together Chinese and European expertise on the Sino European Security relationship this book positions Europe both the EU and the major national actors and China in a global security context It offers not merely an elaboration of the theme of bilateral security relations but also
