

Flamingo Power Plant

Flamingo Power Plant is a 1,000 MW natural gas combined cycle power plant located in the northern part of the state of Nevada. The plant is owned and operated by NV Energy. The plant is a combined cycle gas turbine (CCGT) plant, which means it uses a gas turbine to generate power, and then uses the exhaust from the gas turbine to drive a steam turbine, which also generates power. This process allows the plant to generate power more efficiently than a traditional coal-fired power plant. The plant is a major source of electricity for the state of Nevada, and is a key part of the state's energy infrastructure.
