Young, Christine N. Michael, Jennifer A. Smolinski, 2019-07-15 What role does student engagement play in educational achievement on the post secondary campus And what factors affect each student's ability and motivation to engage with the full college experience both in and outside of the classroom It is now widely acknowledged that post secondary institutions must not only focus on facilitating the

transition from high school to college but that they must also make a concerted effort to listen to the needs and experiences of their students in order to achieve maximal involvement within the college environment. Students need to be captivated by at least one element of their college experience whether that be in the classroom or extracurricular activities in order to form a bond with their institution and feel motivated and attached enough to put in the hard work until graduation. Campuses that capture their students' interests and passions provide spaces for them to develop as individuals and opportunities to form meaningful professional and personal relationships have a far greater chance of both retaining their students to graduation and helping them develop as whole human beings who will contribute. This book studies the many facets of student engagement as it attempts to define student engagement, differentiating it from involvement, and covers seminal theories of college student engagement. The contributions to this volume discuss the powerful role that relationships play in helping students identify their interests and talents and other examples of best practice when it comes to creating engaging classroom experiences such as collaborative projects with peers, study abroad, and learning that is situated in real life problems that are of importance to the student.

Assessing Civic Engagement Dawn Geronimo Terkla, Lisa S. O'Leary, 2015-01-12 How does one assess community service, civic engagement, and the impact of service learning on a college campus? This volume reviews contemporary research, measurement instruments, and practices in the assessment of civic engagement in higher education, including meta-analyses of students, faculty, institutions, and higher education systems at large, targeted case studies of campus-specific practices, and efficient and effective ways to gauge the influence of civic engagement on higher education policy, practices, and outcomes. It includes quantitative and qualitative approaches to measuring the effort, importance, and impact of students' and institutions' involvement in community service, community engagement, civic engagement, and service learning on a college campus. The research ranges between decisions made either as part of institutional agendas, curricular enhancements, or student life initiatives and student and professor involvement in civic engagement activities and supportive attitudes. This is the 162nd volume of the Jossey-Bass quarterly report series. Timely and comprehensive, *New Directions for Institutional Research* provides planners and administrators in all types of academic institutions with guidelines in such areas as resource coordination, information analysis, program evaluation, and institutional management.

Community-University Engagement: A Process for Building Democratic Communities Tami L. Moore, 2014-04-29 As the emphasis on economic development through community university engagement intensifies educators and policy makers must learn to think differently about the engagement process This is particularly true when a narrowly defined group of leaders sets the engagement agenda and those who are traditionally underrepresented continue to be marginalized in the conversations about their own futures Emphasizing the importance of community as a context for engagement and building strong relationships over time Moore calls on institutional leaders to intentionally facilitate broad participation by all members of a community in discussions about how and in what direction the community will develop This is the second issue of the 40th volume of the Josse Bass series *ASHE Higher Education Report* Each monograph is the definitive analysis of a tough higher education issue based on thorough research of pertinent literature and institutional experiences Topics are identified by a national survey Noted practitioners and scholars are then commissioned to write the reports with experts providing critical reviews of each manuscript before publication **Community Engagement in the Online Space** Dennis, Michelle, Halbert, James, 2023-02-17 Since the advent of the internet online communities have emerged as a way for users to

oversight of the executive branch have contributed to the loss of institutional capacity to address public problems and to declining public confidence in political institutions. These trends coincide with problematic rhetoric and growing scrutiny from public officials on how colleges and universities educate students on public issues, particularly those centered on class, race, ethnicity, and social justice. Issues of free speech and expression have been further nationalized following a high profile hearing of the House Committee on Education and the Workforce that questioned the presidents of Harvard, Massachusetts Institute of Technology, and University of Pennsylvania about antisemitism on their campuses, and as campus protests regarding the Israeli-Palestinian conflict have been met with heavy-handed responses. These episodes serve as loud warning shots to colleges and universities across the country. Academic freedom and freedom of speech, core tenets of a liberal education, are at risk. Can higher education step up and meet the moment? Collectively, contributors to this volume, who come from a broad range of institutions, experiences, and perspectives, provide critical research and analyses as well as innovative approaches for how higher education can fulfill its public role and contribute to building the democratic societies we need.

Leading America's Branch Campuses Samuel Schuman, 2009-06-16 Branch campuses are a growing and vital segment of the American higher education community. But these campuses and the particular challenges of leading them have received far less attention than other types of institutions. Leading America's Branch Campuses remedies this by providing focused, pragmatic advice by experienced branch campus professionals across a very broad range of leadership issues. These include areas such as curriculum, system relations, fund raising, student affairs, athletics, public relations, faculty issues, communication, internal and external program creation, strategic planning, campus organization, and assessment. Chapter contributors include campus presidents, chancellors, provosts, deans, program directors, and faculty members. They represent two-year, baccalaureate, and graduate institutions and span the nation from Florida to Washington State. Dr. Schuman's style is direct and jargon-free, and he emphasizes practical issues more than abstract theories.
