**Combining Service and Learning in Higher Education** ,1999 The Policy Debate In the past decade colleges and universities have made greater efforts to involve students in community service particularly service learning a special form of community service designed to promote student learning and development Proponents of service learning believe that it stimulates academic performance increases students understanding of the responsibilities of living in a democratic society and encourages students to become involved in the social problems facing their communities Hundreds of college and university presidents most of the major higher education associations and a number of highly influential scholars actively support the development of service learning programs on college campuses At the same time service learning has its critics particularly among faculty many of whom are skeptical of its benefits Critics contend that service waters down the curriculum further weakening the quality of higher education and that the time students spend

volunteering in community agencies as part of a course might be better spent in the library or laboratory

**Service-Learning in Higher Education** Caifeng Lan, Phylis Lan Lin, Mark R. Wiegand, Antoinette R. Smith-Tolken, 2014  
This is the sixth book about service learning in higher education published by the University of Indianapolis Press. This book series has provided a forum for service learning practitioners, researchers, administrators, and theorists to present insights, experiences, best practices, and models in the application of this pedagogy to student learning, with a particular emphasis on the expanding sense of community through local, national, and international service learning experiences. The growing base of literature from this series of books and from other resources has provided evidence for the effectiveness of service learning on student outcomes. Publishing books such as this one is important because the exploration of preparing students for careers, the development of professional behaviors and skills, and of a formal assessment of the behavioral outcomes associated through faculty and community partner role models and mentors is a fruitful area of future study in service learning pedagogy. The workplace environment of the 21st century will demand that students come prepared with an understanding of professional roles and with the ability to interact with comprehensive interdisciplinary teams. This understanding can be achieved through the transformative nature of well-structured service learning experiences that become increasingly broad in conceptualizing what constitutes community.

Though service learning was initially developed in the United States, the concept is rooted in Chinese literatures and values. This book will help readers understand how service learning is being used as a pedagogy with Chinese values and philosophy in Chinese education, filling a niche within the worldwide literature of service learning.
