political ideologies economic systems and cosmological orientations in comparative historical perspective In doing so this interdisciplinary anthology seeks to inspire new avenues of research on the past present and future of the gridded worlds of urban life Gridded Worlds is primarily tailored to scholars working in the fields of urban history world history urban historical geography architectural history urban design and the history of urban planning and it will also be of interest to art historians area studies scholars and the urban studies community more generally Making Places In The Prehistoric World Joanna Bruck,Melissa Goodman,2023-04-28 First published in 1999 This groundbreaking volume addresses issues central to the study of prehistoric settlement including group memory the transmission of ideology and the impact of mobility and seasonality on the construction of social identity Building on these themes the contributors point to new ways of understanding the relationship between settlement and landscape by replacing Capitalist models of spatial relations with more intimate histories of place Twentieth Century Land Settlement Schemes Roy Jones,Alexandre M.A. Diniz,2018-10-17 Land settlement schemes sponsored by national governments and businesses such as the Ford Corporation and the Hudson s Bay Company took place in locations as diverse as the Canadian Prairies the Dutch polders and the Amazonian rainforests This novel contribution evaluates a diverse range of these initiatives By 1900 any land that remained available for agricultural settlement was often far from the settlers homes and located in challenging physical environments Over the course of the twentieth century governments corporations and frequently desperate individuals sought out new places to settle across the globe from Alberta to Papua New Guinea This book offers vivid reports of the difficulties faced by many of these settlers including the experiences of East European Jewish refugees New Zealand soldier settlers and urban families from Yorkshire This book considers how and why these settlement schemes succeeded found other pathways to sustainability or succumbed to failure and even oblivion In doing so the book indicates pathways for the achievement of more economically socially and environmentally sustainable forms of human settlement in marginal areas This engaging collection will be of interest to individuals in the fields of historical geography environmental history and development studies Vernacular Architecture in the 21st Century Lindsay Asquith,Marcel Vellinga,2006-03-10 The issues surrounding the function and meaning of vernacular architecture in the twenty first century are complex and extensive Taking a distinctively rigorous theoretical approach this book considers these issues from a number of perspectives broadening current debate to a wider multidisciplinary audience These collected essays from the leading experts in the field focus on theory education and practice in this essential sector of architecture and help to formulate solutions to the environmental disaster management and housing challenges facing the global community today **Spatial Theories for the Americas** Fernando Luiz Lara,2024-11-19 To study the built environment of the Americas is to wrestle with an inherent contradiction While the disciplines of architecture urban design landscape and planning share the fundamental belief that space and place matter the overwhelming majority of canonical knowledge and the vernacular used to describe these disciplines comes from another

very different continent With this book Fernando Luiz Lara discusses several theories of space drawing on cartography geography anthropology and mostly architecture and proposes counterweights to five centuries of Eurocentrism The first part of Spatial Theories for the Americas offers a critique of Eurocentrism in the discipline of architecture problematizing its theoretical foundation in relation to the inseparability of modernization and colonization The second part makes explicit the insufficiencies of a hegemonic Western tradition at the core of spatial theories by discussing a long list of authors who have thought about the Americas To overcome centuries of Eurocentrism Lara concludes will require a tremendous effort but nonetheless we have the responsibility of looking at the built environment of the Americas through our own lenses Spatial Theories for the Americas proposes a fundamental step in that direction
