Seven Victorian Architects:

Seven Victorian Architects Jane Fawcett, 1977 Historicism a reliance on inspiration by styles of the past was the dominant aspect of Victorian architecture The individual architect's response to earlier styles however varied widely and one of the hallmarks of a creative career was the architect's handling of his chosen precedents This study presents the largely unpublished work of seven English architects tracing influences on their individual styles and provides a cross section of some of the most characteristic themes and qualities of Victorian architecture The seven architects included are William Burn Philip and P C Hardwick Sydney Smirke J I Pearson G F Bodley Alfred Waterhouse and Edwin Lutyens Social technological and functional aspects of architecture during this period are explored from several viewpoints in the works of these individual practitioners In addition to the expected country houses and churches other building types included are railway terminals libraries docks shopping areas museums hospitals and working class housing *Seven Victorian*

Holland, 1982 *Shaping the Surface* Stephen Kite, 2022-11-17 *Shaping the Surface* explores the history of modern British architecture through the lens of surface materiality and decoration Picking up on a trait that art historian Nikolaus Pevsner first identified as a national mania for beautiful surface quality this book makes a new contribution to architectural history and visual culture in its detailed examination of the surfaces of British architecture from the middle of the 19th century up to

the turn of the 21st century Tracing this continuing sensibility to surface all the way through to the modern era it explores how and why surface and materiality have featured so heavily in recent architectural tradition examining the history of British architecture through a selection of key cultural moments and movements from Romanticism and the Arts and Crafts to Brutalism High Tech Post Modernism Neo Vernacular and the New Materiality Embedded within the narrative is the question of whether such national characters can exist in architecture at all and indeed the extent to which it is possible to identify a British architectural consciousness in an architectural tradition characterised by its continuous importation of theories ideas materials and people from around the globe Shaping the Surface provides a deep critique and meditation on the importance of surface and materiality for architects designers and historians everywhere in Britain and beyond while it also serves as a thematic introduction to modern British architectural history with in depth readings of the works of many key British architects artists and critics from Ruskin and William Morris to Alison and Peter Smithson Eduardo Paolozzi Richard Rogers and Caruso St John

Angell, Pink Dandelion, 2013-09-26 Quakerism began in England in the 1650s George Fox credited as leading the movement had an experience of 1647 in which he felt he could hear Christ directly and inwardly without the mediation of text or minister Convinced of the authenticity of this experience and its universal application Fox preached a spirituality in which potentially all were ministers all part of a priesthood of believers a church levelled before the leadership of God Quakers are a fascinating religious group both in their original peculiarity and in the variety of reinterpretations of the faith since The way they have interacted with wider society is a basic but often unknown part of British and American history This handbook charts their history and the history of their expression as a religious community This volume provides an indispensable reference work for the study of Quakerism It is global in its perspectives and interdisciplinary in its approach whilst offering the reader a clear narrative through the academic debates In addition to an in depth survey of historical readings of Quakerism the handbook provides a treatment of the group's key theological premises and its links with wider Christian thinking Quakerism's distinctive ecclesiastical forms and practices are analysed and its social economic political and ethical outcomes examined Each of the 37 chapters considers broader religious social and cultural contexts and provides suggestions for further reading and the volume concludes with an extensive bibliography to aid further research

century abbey **Continental Crosscurrents** J. B. Bullen, 2005-08-25 Continental Crosscurrents is a series of case studies reflecting British attitudes to continental art during the nineteenth and the early twentieth centuries It stresses the way in which the British went to the continent in their search for origins or their pursuit of sources of purity and originality This cult of the primitive took many forms it involved a reassessment of medieval German and Italian art and offered new ways of interpreting Venetian painting it opened up new readings of architectural history and the discovery of the Romanesque it generated a debate about the value of returning to religious subjects in art and it raised the question of the relationship between modern art and Byzantine art in the early twentieth century J B Bullen s original study presents some exciting findings Few critics have noticed how much in advance of his time was Coleridge s passion for medieval art Ruskin s debt in the Stones of Venice to Victor Hugo s Notre Dame de Paris has hardly been noted and Browning s involvement with the debate on the morality of Christian art is explored more extensively than previously Three chapters are devoted to the role of British criticism in identifying the Romanesque style in architecture and differentiating it from the Gothic They trace the concept as it arose in criticism at the beginning of the nineteenth century its employment in the remarkable buildings of Edmund Sharpe and Sara Losh and the way in which it reached a climax in Waterhouse s enigmatic choice of Romanesque for the Natural History Museum in London The collection concludes with two continental episodes from the history of modernism One is the explosive British reaction to the primitivism of Gauguin the other involves the identifying of one of the characters in D H Lawrence s novel Women in Love Curious evidence suggests that the malevolent figure of Loerke was based on a German sculptor whom Lawrence met in Italy before the First World War **Visionaries and Planners** Stanley Buder, 1990 In this book Stanley Buder examines the Garden City movement from its origins in mid nineteenth century England to its subsequent development and elaboration in twentieth century America The Garden City movement emphasized green belts around cities but was not identified exclusively with suburban development Much of the city planning which formed the basis for the Garden City movement was based upon designing the ideal community But this sense of idealism was soon lost with the transfer of the movement to America and indeed it was unable to sustain itself in the communities of its origin in England Romanticism and the Museum E. Peacocke, 2014-11-25 Romanticism and the Museum argues that museums were integral to Britain s understanding of itself as a nation in the wake of the French Revolution It features Wordsworth Scott Edgeworth and literary periodicals featuring Byron and Horace Smith
