**Seven Myths of the Spanish Conquest** Matthew Restall, 2004-10-28 Here is an intriguing exploration of the ways in which the history of the Spanish Conquest has been misread and passed down to become popular knowledge of these events. The book offers a fresh account of the activities of the best known conquistadors and explorers including Columbus Cortés and Pizarro. Using a wide array of sources, historian Matthew Restall highlights seven key myths, uncovering the source of the inaccuracies and exploding the fallacies and misconceptions behind each myth. This vividly written and authoritative book shows, for instance, that native Americans did not take the conquistadors for gods and that small numbers of vastly outnumbered Spaniards did not bring down great empires with stunning rapidity. We discover that Columbus was correctly seen in his lifetime and for decades after as a briefly fortunate but unexceptional participant in efforts involving many southern Europeans. It was only much later that Columbus was portrayed as a great man who fought against the ignorance of his age to discover the new world. Another popular misconception that the Conquistadors worked alone is shattered by the revelation that vast numbers of black and native allies joined them in a conflict that pitted native Americans against each other. This and other factors, not the supposed superiority of the Spaniards, made conquests possible. The Conquest, Restall shows, was more complex and more fascinating than conventional histories have portrayed it. **Seven Myths of the Spanish Conquest** offers a richer and more nuanced account of a key event in the history of the Americas.

**Seven Conquests** Poul Anderson, 1984 *Conquest of the Land Through Seven Thousand Years* Walter Clay Lowdermilk, 1975 Dr. Lowdermilk, the assistant director of the newly created United States Soil Erosion Service, wrote this classic report on agriculture and soil erosion in 1939. He studied the record of agriculture in countries that have been under cultivation since the earliest recorded times to see what the US could learn to avoid another Dust Bowl. He discovered that soil erosion, deforestation, overgrazing, neglect, and conflicts between cultivators and herdsmen have helped topple empires and wipe out entire civilizations. At the same time, he learned that careful stewardship of the earth's resources through terracing, crop rotation, and other soil conservation measures has enabled other societies to flourish for centuries.

**The Early Islamic Conquests** Fred Donner, 2014-07-14 In this contribution to the ongoing debate on the nature and causes of the Islamic conquests in Syria and Iraq during the sixth and seventh centuries, Fred Donner argues for a necessary distinction between the causes of the conquests, the causes of their success, and the causes of the subsequent Arab migrations to the Fertile Crescent. Originally published in 1982, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.
