Intelligence Reframed

Howard E Gardner, 2000-09-18 Harvard psychologist Howard Gardner has been acclaimed as the most influential educational theorist since John Dewey His ideas about intelligence and creativity explicated in such bestselling books as *Frames of Mind* and *Multiple Intelligences* over 200 000 copies in print combined have revolutionized our thinking In his groundbreaking 1983 book *Frames of Mind* Howard Gardner first introduced the theory of multiple intelligences which posits that intelligence is more than a single property of the human mind That theory has become widely accepted as one of the seminal ideas of the twentieth century and continues to attract attention all over the world Now in *Intelligence Reframed* Gardner provides a much needed report on the theory its evolution and revisions He offers practical guidance on the educational uses of the theory and responds to the critiques leveled against him He also introduces two new intelligences existential intelligence and naturalist intelligence and argues that the concept of intelligence should be broadened but not so absurdly that it includes every human virtue and value Ultimately argues Gardner possessing a basic set of seven or eight intelligences is not only a unique trademark of the human species but also perhaps even a working definition of the species Gardner also

offers provocative ideas about creativity leadership and moral excellence and speculates about the relationship between multiple intelligences and the world of work in the future *Educating Christian Teachers for Responsive Discipleship* Peter P. DeBoer, 1993 Five members of the Calvin College Center for Christian Scholarship 1991 1992 team present some creative and constructive proposals for changes that could occur in the teacher education programs of hundreds of church related colleges Theoretically committed to a biblical vision of responsive discipleship the authors sketch out 1 a curricular theory that encourages many sided encounters with created reality which stimulate varieties of student responses that should arise ultimately from a commitment of the heart 2 a collaborative model of teacher education that urges congruent values to be held by the local school school district and the teacher education college and 3 a curriculum that arises in part out of the laboratory of the classroom through the interaction of teacher and student in a school organized to develop collegiality among teachers and students where through the use of evaluative portfolios student teachers learn to be reflective practitioners of the art and craft of teaching Co published with the Institute for Christian Studies *On Cultivating Faith and Science* Janez Juhant, Bojan Žalec, 2007 The ethical distress of the post modern world stimulates and directs us to reflect our ethical and cultural grounds Man is a transcendent being He cannot reach or put in order immediate goods he needs if he is not prepared to acknowledge the grounds of his person and develop the virtues of prudence love hope faith wisdom justice courage temperance etc These are ethical questions concerning different worldviews and cannot be solved only by scientific methods Many people who in the past did not care for religion as such now take seriously religious personal and societal aspects of humane life The fundamental crucial questions of man are ethical questions They are in various ways related or perplexed with the question of faith and of science *Moving to Online* Ernest W. Brewer, Jacquelyn O. DeJonge, Vickie J.
