Bulletin of the Library Association of Portland Library Association (Portland, Or.),1916 *Our Library* Library Association (Portland, Or.),Library Association of Portland,1916 *The Cambridge History of Eighteenth-century Philosophy* Knud Haakonssen,2006 This two volume set presents a comprehensive and up to date history of eighteenth century philosophy The subject is treated systematically by topic not by individual thinker school or movement thus enabling a much more historically nuanced picture of the period to be painted British Moralists being selections from writers principally of the eighteenth century Lewis Amherst Selby-Bigge,1897 *List of the Books of Reference in the Reading Room of the British Museum* William Brenchley Rye,1889 *List of Books Forming the Reference Library in the Reading Room of the British Museum* British Museum. Bibliography of Art and Architecture in the Islamic World (2 Vol. Set) Susan Sinclair,C. H. Bleaney,Pablo García Suárez,2012 Following the tradition and style of the acclaimed Index Islamicus the editors have created this new Bibliography of Art and Architecture in the Islamic World The editors have surveyed and annotated a wide range of books and articles from collected volumes and journals published in all European languages except Turkish between 1906 and 2011 This comprehensive bibliography is an indispensable tool for everyone involved in the study of material culture in Muslim societies **The Literary World** ,1883 The Publishers' Circular and Booksellers' Record ,1926 *The Scientific Journal* Alex Csiszar,2018-06-25 Not since the printing press has a media object been as celebrated for its role in the advancement of knowledge as the scientific journal From open communication to peer review the scientific journal has long been central both to the identity of academic scientists and to the public legitimacy of scientific knowledge But that was not always the case At the dawn of the nineteenth century academies and societies dominated elite study of the natural world Journals were a relatively marginal feature of this world and sometimes even an object of outright suspicion The Scientific Journal tells the story of how that changed Alex Csiszar takes readers deep into nineteenth century London and Paris where savants struggled to reshape scientific life in the light of rapidly changing political mores and the growing importance of the press in public life The scientific journal did not arise as a natural solution to the problem of communicating scientific

discoveries Rather as Csiszar shows its dominance was a hard won compromise born of political exigencies shifting epistemic values intellectual property debates and the demands of commerce Many of the tensions and problems that plague scholarly publishing today are rooted in these tangled beginnings As we seek to make sense of our own moment of intense experimentation in publishing platforms peer review and information curation Csiszar argues powerfully that a better understanding of the journal s past will be crucial to imagining future forms for the expression and organization of knowledge
