Working-Class Women in Irish Literature and Theatre Clara Mallon, Salomé Paul, 2025-07-25 Working Class Women in Irish Literature and Theatre critically engages with works of theatre both by and about working class women historically and presently Addressing professional and community theatre productions from both textual and performative perspectives this volume focuses on works of theatre by practitioners directors playwrights and performance artists across rural and urban contexts Irish theatre has a long history of signifying social class Yet the representations of working class women in Irish theatrical history also encompass several problematic issues starting with the fact that these depictions were created by male writers like J M Synge and Seán O'Casey to name but a few Nonetheless the theatre's emphasis on embodied performance and its ability to reach its public in an unmediated way has attracted working class engagement perhaps more than other art forms in Ireland Contemporary playwrights in the Republic and the north of Ireland have tirelessly striven to illuminate working class women's lived experiences and have reframed the characterisation of working class women by drawing out the intersection of social class with sexualities ethnic minorities and racial identities This edited collection also includes the voices of directors playwrights and performers who identify with a working class social background offering first hand accounts of their lived experience in the theatre industry

Social Policy Review Nick Manning, 1991 COVID-19 and Social Change in Spain Carlos de Castro, Andrés Pedreño, Marta Latorre, 2022-11-18 Originating in the popular Sociología en Cuarentena blog this volume provides a detailed and multifaceted analysis of the social impact of the COVID 19 pandemic in Spain This book originates in the great upheaval caused by the COVID 19 pandemic when the unprecedented announcement of global lockdowns paralysed the world and put social relations on hold In response a loose collective of sociologists historians and philosophers from various Spanish universities began to share their reflections on the pandemic on the Sociología en Cuarentena blog This book takes some of

those thoughts and delves deeper into the recurring themes as they relate to the Spanish experience of the pandemic The chapters in the first part of the book address the social and political context of the various measures put in place by the government to deal with the health economic and social effects of the pandemic Subsequently several chapters examine how the pandemic led to important reflections on uncertainty and authority in processes of scientific knowledge production Other chapters analyse the effects of the pandemic on demographics the organisation of care the education system the organisation of work and the recognition of essential workers immigration policies and the digitalisation of society Collectively the contributions call into question the narrative of exceptionalism that views the pandemic as a singular event that is uniquely responsible for the present situation of uncertainty and instability They also draw attention to the fragility of social prestige and trust in neglected and weakened public institutions as well as identifying a growing socio political polarisation that may be highly significant in the future This collection will appeal to students and researchers with an interest in contemporary Spain and the socio political effects of the COVID 19 pandemic
