Revisiting Women's Cinema Lingzhen

Wang, 2020-12-14 In *Revisiting Women's Cinema* Lingzhen Wang ponders the roots of contemporary feminist stagnation and the limits of both commercial mainstream and elite minor cultures by turning to socialist women filmmakers in modern China. She foregrounds their sociopolitical engagements, critical interventions, and popular artistic experiments offering a new conception of socialist and postsocialist feminisms, mainstream culture, and women's cinema. Wang highlights the films of Wang Ping and Dong Kena in the 1950s and 1960s and Zhang Nuanxin and Huang Shuqin in the 1980s and 1990s to unveil how they have been profoundly misread through extant research paradigms entrenched in Western Cold War ideology, post-second wave cultural feminism, and post-Mao intellectual discourses. Challenging received interpretations, she elucidates how socialist feminism and culture were conceptualized and practiced in relation to China's search not only for national independence and economic development but also for social emancipation, proletarian culture, and socialist internationalism. Wang calls for a critical reevaluation of historical materialism, socialist feminism, and popular culture to forge an integrated emancipatory vision for future transnational feminist and cultural practices.

Science and Homosexualities Vernon A. Rosario, M.D., 2013-01-11 *Science and Homosexualities* is the first anthology by historians of science to examine European and American scientific research on sexual orientation since the coining of the word homosexual almost 150 years ago. This collection is particularly timely given the enormous scientific and popular interest in biological studies of homosexuality and the importance given such studies in current legal, legislative, and cultural debates concerning gay civil rights. However, scientific and popular literature discussing the biology of sexual orientation have been short-sighted in representing it as objective new scientific work. This volume demonstrates that the quest for the biological cause of homosexuality and other sexualities is as old as the term itself. These essays explore the active role experimental subjects played in shaping scientific theories of homosexuality and cultural perceptions of sexuality and sexual identity. Finally, this anthology studies the way in which this doctor-patient interaction shaped not only scientific theories of homosexuality but also cultural perceptions and self-identities as well. Papers in Comparative Studies, 1989 *Nature, Ethics and Gender in German Romanticism and Idealism* Alison

Stone, 2018-10-25 This book provides an account of the development of ideas about nature from the Early German Romantics into the philosophies of nature of Schelling and Hegel In clear and accessible language Alison Stone explains how the project of philosophy of nature took shape and made sense in the post Kantian context She also shows how ideas of nature were central to the philosophical and literary projects of the Early German Romantics with attention to Friedrich Schlegel Novalis and Holderlin Stone advances a distinctive original perspective on Romantic and Idealist accounts of nature and their ethical implications regarding human nature relations and intra human political relations especially but not only around gender and race The book demonstrates how these approaches to nature have contemporary relevance to a range of current debates such as those over naturalism the environmental crisis and the politics of gender race and colonialism *From Eve to*

Evolution Kimberly A. Hamlin, 2014-05-08 *From Eve to Evolution* provides the first full length study of American women s responses to evolutionary theory and illuminates the role science played in the nineteenth century women s rights movement Kimberly A Hamlin reveals how a number of nineteenth century women raised on the idea that Eve s sin forever fixed women s subordinate status embraced Darwinian evolution especially sexual selection theory as explained in *The Descent of Man* as an alternative to the creation story in *Genesis* Hamlin chronicles the lives and writings of the women who combined their enthusiasm for evolutionary science with their commitment to women s rights including Antoinette Brown Blackwell Eliza Burt Gamble Helen Hamilton Gardener Charlotte Perkins Gilman and Elizabeth Cady Stanton These Darwinian feminists believed evolutionary science proved that women were not inferior to men that it was natural for mothers to work outside the home and that women should control reproduction The practical applications of this evolutionary feminism came to fruition Hamlin shows in the early thinking and writing of the American birth control pioneer Margaret Sanger Much scholarship has been dedicated to analyzing what Darwin and other male evolutionists had to say about women but very little has been written regarding what women themselves had to say about evolution *From Eve to Evolution* adds much needed female voices to the vast literature on Darwin in America
