Modern Garden:

The Modern Garden Pierluigi Serraino, 2024-10-01 Visionary landscape architecture and garden design at mid century in North America is captured by the greats of the era including Julius Shulman and Ezra Stoller in many previously unpublished photographs The treasures of mid century American architecture have long been celebrated Less appreciated has been the landscape design that provides the framing for these masterworks But more than frame landscape architecture is an art worthy of the spotlight particularly at mid century when the notion that gardens are outdoor spaces for people to live in was championed and brought to the fore now gardens and landscapes are not just external attributes to the house but a continuation of it and its living spaces in a relationship of symbiosis with its pools and terraces its winding lawns and its partly enclosed room like spaces flanked by brick or stone or plantings in a range of colors and forms Approximately seventy five mostly residential projects are thoroughly documented and recounted Landscape architects whose work is featured include Thomas Church Lawrence Halprin and Garrett Eckbo among others Highlights include the dramatic surrounds of Richard Neutra s Perkins House in its Pasadena hillside setting and Frank Lloyd Wright s Marin County Civic Center where environment and building comeingle in an extraordinary modernist vision of the future made real This book is both a wishful gesture toward a realignment of building with nature and a must have for anyone with a visceral appreciation for a designed environment understood as an integrated whole Ultimately the book underlines the fundamental importance of gardens and landscape design intended in the widest possible sense for the quality of living of all individuals

The Medieval and Early Modern Garden in Britain

Patricia Skinner, Theresa Tyers, 2018-04-09 What was a garden in medieval and early modern British culture and how was it imagined How did it change as Europe opened up to the wider world from the 16th century onwards In a series of fresh approaches to these questions the contributors offer chapters that identify and discuss newly discovered pre modern garden spaces in archaeology and archival sources recognize a gendered language of the garden in fictional descriptions fictional here being taken to mean any written text regardless of its purpose and offer new analysis of the uses to which gardens real and imagined might be put Chapters investigate the definitions forms and functions of physical gardens explore how the material space of the garden was gendered as a secluded space for women and as a place of recreation examine the centrality of garden imagery in medieval Christian culture and trace the development of garden motifs in the literary and artistic imagination to convey the sense of enclosure transformation and release The book uniquely underlines the current environmental turn in the humanities and increasingly recognizes the value of exploring human interaction with the landscapes of the past as a route to health and well being in the present

Gardens in the Modern Landscape

Christopher Tunnard, 2014-07-23 Between 1937 and 1938 garden designer Christopher Tunnard published a series of articles in the *British Architectural Review* that rejected the prevailing English landscape style. Inspired by the principles of Modernist art and Japanese aesthetics, Tunnard called for a new technique in garden design that emphasized an integration of form and purpose. The functional garden avoids the extremes both of the sentimental expressionism of the wild garden and the intellectual classicism of the formal garden; he wrote it embodies rather a spirit of rationalism and through an aesthetic and practical ordering of its units provides a friendly and hospitable milieu for rest and recreation. Tunnard's magazine pieces were republished in book form as *Gardens in the Modern Landscape* in 1938 and a revised second edition was issued a decade later. Taken together, these articles constituted a manifesto for the modern garden, its influence evident in the work of such figures as Lawrence Halprin, Philip Johnson, and Edward Larrabee Barnes. Long out of print, the book is here reissued in a facsimile of the 1948 edition accompanied by a contextualizing foreword by John Dixon Hunt. *Gardens in the Modern Landscape* heralded a sea change in the evolution of twentieth-century design and it also anticipated questions of urban sprawl, historic preservation, and the dynamic between the natural and built environments. Available once more to students, practitioners, and connoisseurs, it stands as a historical document and an invitation to continued innovative thought about landscape architecture.

The Poem and the Garden in Early Modern England Deborah Solomon, 2022-12-30 This book draws attention to the pervasive artistic rivalry between Elizabethan poetry and gardens in order to illustrate the benefits of a trans-media approach to the literary culture of the period. In its blending of textual studies with discussions of specific historical patches of earth, *The Poem and the Garden* demonstrates how the fashions that drove poetic invention were as likely to be influenced by a popular print convention or a particular garden experience as they were by the formal genres of the classical poets. By moving beyond a strictly verbal approach in its analysis of creative imitation, this volume offers new ways of appreciating the kinds of comparative and competitive methods that shaped early modern poetics. Noting shared patterns both conceptual and material in these two areas not only helps explain the persistence of botanical metaphors in sixteenth-century books of poetry but also offers a new perspective on the types of contrastive illusions that distinguish the Elizabethan aesthetic. With its interdisciplinary approach, *The Poem and the Garden* is of interest to all students and scholars who study early modern poetics, book history, and garden studies.
