Modern Greenhouse Methods Ian Walls,1982-01-01 *Good agricultural practices for greenhouse vegetable production in the South East European countries* Food and Agriculture Organization of the United Nations,2018-05-29
FAO Plant Production and Protection Papers Greenhouse crop production is an increasing trend throughout the world with some 405 000 ha of greenhouses spread across Europe This publication builds on know how and experience from the South East European region to serve as a guide for trainers and a technical reference for producers and other stakeholders

Tennessee Valley Greenhouse Vegetable Workshop ,1975 **Recent Advances in Research and Development for Vegetable Crops Under Protected Cultivation** Giao Nguyen ,Zora Singh,2024-08-05
Protected cropping shelters crops from extreme climatic conditions by modifying the internal growing conditions in their favor The technology has widely been used for vegetable crops in different climates such as temperate tropical subtropical arid and semi arid regions As climate change is projected to become more severe in the near future the resulting adverse weather conditions such as higher temperatures more frequent heatwaves more variable rainfall patterns and cyclones will affect vegetable production in turn affecting crop growth yield produce quality and economic return of growers The demand for protected cultivation will increase to ensure sustainable production and a stable supply of fresh horticultural produce Vegetable Production and Practices Gregory E Welbaum,2015-01-30
Successful vegetable production in a modern competitive market requires an understanding of many more factors than the biology of crops and the production techniques involved This major new textbook brings the science and practice of vegetable production right up to date by addressing modern culture techniques and the recent challenges of consumer demand facing producers today It introduces vegetable production from the perspective of producing high quality produce that satisfies the needs of the modern consumer Beginning with the basics of how vegetables are grown using high and low input methods including organic and sustainable production techniques the book goes on to introduce and discuss many topics covered less comprehensively in older texts including Good Agricultural Practices to improve quality reduce biological contamination and secure food safety water management cropping systems plasticulture protected culture and mineral nutrition Vegetable Production and Practices also introduces the use of molecular biology for genetic improvement of crops Issues specific to individual vegetable crops are addressed by family including their diseases harvesting quality attributes and other issues of increasing importance to consumers including the role of vegetables in human health Professor Gregory E Welbaum has a long history of teaching successful courses in horticulture at Virginia Tech and other universities in the US and worldwide Vegetable Production Practices has been specifically designed to accompany courses in vegetable crop production so is ideally suited to inspire students in crop and horticultural sciences as well as provide a useful reference for experienced practitioners **Achieving sustainable greenhouse cultivation**
Professor Leo F. M. Marcelis,Dr Ep Heuvelink,2019-09-10 Reviews advantages and disadvantages of different protected

cultivation systems from greenhouses and net houses to aquaponic and vertical farming systems Detailed assessment of current research on optimising the two main variables in protected cultivation the aerial environment and root development Particular focus on systems control to optimise product quality and environmental impact
