Ana I. Marrades Puig

Mujeres Sin Sombra Maternidad Y Tecnologia:

Mujeres sin sombra Silvia Tubert, 1991 El vertiginoso desarrollo de las tecnologías reproductivas que afecta a cuestiones tan esenciales como la reproducción la maternidad la paternidad en suma la transmisión de la herencia biológica y cultural de la humanidad y la constitución del sujeto psíquico exige que nos detengamos a reflexionar sobre sus condiciones de posibilidad y sus implicaciones Este libro nos proporciona información sobre una cuestión que apenas ha sido estudiada en España y que los medios de difusión han contribuido a distorsionar debido a su carácter propagandístico Se trata de un análisis tan riguroso como sitúa a las tecnologías reproductivas en el contexto histórico de la tecnologización de la gestión de la vida y del discurso social y médico sobre la maternidad y la esterilidad articulándolo con la dimensión subjetiva del deseo La circulación de representaciones entre el imaginario individual y los mitos colectivos es el fundamento de un enfoque complejo y original que conjuga una diversidad de discursos heterogéneos que proceden del psicoanálisis la antropología la mitología y la literatura

Figuras de la madre Carmen Alda, 1996 La maternidad Mira Yahveh me ha hecho estirar Anna Goldman Amirav La Madre la Tierra Nicole Loraux Historicidad de las figuras de la madre Ser madre en la cuna de la democracia o el valor de la paternidad Ana Iriarte Madres y nodrizas Ivonne Knibiehler Del mito de los orígenes a las figuras singulares El mito de los orígenes Silvia Vegetti Finzi Un proceso sin sujeto Simona de Beauvoir Sobre la maternidad Linda M G Zerilli Las madres de Virginia Woolf Esther Sánchez Pardo González De la familia a la polis Posiciones amorales y relaciones tóxicas Luciana Percovich Aparecer con vida Martha Inés Rosenberg Las madres en la era tecnológica Maternidad y técnicas de reproducción asistida una perspectiva psicoanalítica C Alda R Bayo Borrás

Luces y sombras del derecho a la maternidad Ana I. Marrades Puig, 2002 La maternidad ha sido y es objeto de protección por parte de constituciones y textos legislativos nacionales e internacionales lo que demuestra que estamos ante un hecho al que los Estados conceden una especial importancia pero al parecer no la suficiente para reconocerlo como un derecho La autora pretende adentrarse en los entresijos de esta problemática intentando confirmar la existencia de un derecho a la maternidad frente al deber de ser madre un deber que ha sido impuesto a las mujeres a lo largo de la historia causando graves perjuicios en el ejercicio de sus otros derechos Para ello se plantea un análisis jurídico de los elementos que lo configuran y explora los motivos las razones o las necesidades que justifican su reconocimiento por lo que necesariamente tiene que beber en otras áreas del conocimiento Y por ello esta obra resulta especialmente interesante no sólo por la originalidad de su tesis sino porque acude a la Historia a la Sociología a la Psicología y a la Medicina manteniendo sin apartarse del Derecho y sus fuentes una visión interdisciplinar

La vida de las mujeres en las ciudades Chris Booth, Jane Darke, Susan Yeandle, 1998-11-04 Qué significa la ciudad para las mujeres Qué esquemas de discriminación y violencia se dan en ella Cómo participan en la planificación de sus servicios Una documentada reflexión sobre la experiencia vital de las mujeres en las ciudades el tradicional espacio público masculino frente al hogar o espacio privado femenino controlado por el poder patriarcal Presentes de mil modos en la vida urbana las mujeres

encuentran en ella un espacio de independencia y autonomía pero también un tnel de pobreza y miedo La ciudad planificada históricamente por varones puede ser un espacio para el cambio si en su organización se deja participar a las mujeres Un libro esencial para quienes tienen interés por los estudios de género y de mujeres y para profesionales de planificación y sociología urbana

Changing Sexualities and Parental Functions in the Twenty-First Century Candida Se Holovko, 2018-03-26 Recent societal changes have challenged long-established concepts in psychoanalysis including the Oedipus complex parental functions and male and female psychosexuality Postmodern families based on sexual and emotional exchanges independent of gender now include homoerotic couples who adopt children or who create them through assisted fertilisation as well as single-parent families and blended families A number of highly renowned Latin American psychoanalysts have drawn attention to the urgency of revising theoretical and clinical concepts in the light of these new scenarios In this book they open up ideas which cover familiar territory of current concerns in psychoanalytic work as well as other little-explored areas with the emphasis on evolving sexualities and new experiences of parenthood The first section revisits psychoanalytic theories particularly parental functions in the area of sexuality and gender The following section discusses new family configurations and vicissitudes of the desire to have a child in men and women with the authors presenting some psychic consequences for parents in therapy who have turned to assisted fertilisation

Knowledges, Practices and Activism from Feminist Epistemologies Eulalia Pérez-Sedeño, Lola S. Almendros, S. García Dauder, Esther (Mayoko) Ortega Arjonilla, 2019-03-27 Science Technology and Gender studies STG include the different approaches to feminist epistemologies their current debates and also the theoretical analysis of different scientific controversies around

cases that involve women's bodies and health sex gender and techno scientific practices These studies are linked to the demand for another type of hybrid knowledge that revalorizes the practices the embodied experience and care as well as the subject positions traditionally excluded from the scientific community The diversity of voices has allowed a plural knowledge in techno scientific practices to emerge as well as the identification of gender class sexuality race functional diversity inequalities for example This has made possible a bioethical reflection which is not understood as abstract normative principles but linked to the practices and lived experience Divided into three parts this edited volume presents original and insightful research on STG from feminist epistemologies The first part addresses fundamental theoretical questions that feminist epistemologies raise and how they confront complex social problems such as gender based violence The second part deals with research practices or processes explicitly showing the relationship between science and policy Finally the third part presents some case studies that show the multidimensionality of the problems and the depth and richness of these analyses The contributions included in the volume present original and in depth research on local case studies within Spain Not only challenging the hegemonic and global perspectives on different issues this volume also opens up and enables discussion of these global narratives This edited volume is a useful tool for researchers and university students in multiple fields such as gender studies feminist epistemologies STS cultural history or transgender studies **Unforeseeable**
