Shepherd, 2021-03-30 *The Politics of Transnational Actors in Latin America* Power from Afar explores the important issues of transnational actors and their influence on institutions and people in Latin America raising profound questions of accountability social justice and sovereignty The text focuses on four particularly significant groups that transcend national

boundaries the Catholic Church transnational corporations transnational drug networks and transnational human rights networks By comparing each of their impacts on the region Frederick M Shepherd explores larger questions about transnational power and how it has deeply penetrated the nations of Latin America The book s analysis delves into attempts made over the last 100 years by citizens social movements and governments to reassert a degree of control over these transnational actors setting up a framework to understand how local national and global forces interact in a setting of transnational dominance The volume suggests that local and national groups can use principles and power to bring about equitable and just outcomes in relation to transnational actors and that in some cases transnational actors can be a part of constructive change in Latin America This concise volume will be of interest to students of History Latin American and Caribbean Studies and Political Science as well as those interested in 20th century Latin American politics and political history Nationalization of Multinationals in Peripheral Economies Julio Faundez,Sol Picciotto,1978-06-17 **The**

The Political Economy of Natural Resources and Development Paul A. Haslam, Pablo Heidrich, 2016-02-05 The Political Economy of Resources and Development offers a unique and multidisciplinary perspective on how the commodity boom of the mid 2000s reshaped the model of development throughout Latin America and elsewhere in the developing world Governments increased taxes and royalties on the resource sector the nationalization of foreign firms returned to the mainstream economic policy agenda and

public spending on social and developmental goals surged These trends often described as resource nationalism have developed into a strategy for economic development generated a re imagining of the state and its institutional possibilities and created a new but very significant political risk for extractive enterprises However these innovations which constitute the most dramatic change in development policy in Latin America since the advent of neoliberalism have so far received little attention from either academic or policy oriented publications This book explores the reasons behind these policies and their effects on states firms and development trajectories This text brings together renowned thematic experts to examine the political economic causes of resource nationalism as well as its manifestation in six Latin American countries The causal variables considered by the contributors to this collection include a range of political economic determinants of policy including commodity prices the influence of ideology and national politics ideas about industrial policy relations between host governments and investors and how countries respond to opportunities provided by regional initiatives and the new geography of the global economy This volume is essential reading in development economics political economy and Latin American studies as well as for those who want to understand what economic development means after neoliberalism
