In Western tradition Grammar from Greek *grammatike* stands for that branch of knowledge which deals with the inflectional forms rules for their application syntax and some times the phonetic system of the language and its representation in writing In India the term *vyakarana* connotes much more than the term grammar does In Sanskrit the science of language is called *vyakarana* which includes phonetics etymology accentuation syntax word formation by declension and conjugation and semantics Grammatical thought in India is coeval with the Vedas The preservation and understanding of the vedic texts were regarded as a religious duty The attempts to analyse the word for their better understanding are as old as the Taittiriya samhita We know from the Brahmanas and the Upanisads that Vyakarana was regarded as a *vedanga* i e an auxiliary to the vedic studies since very old times There is an erroneous notion among some people that Panini s is the only grammar of ancient India Ancient and medieval India has not only produced numerous grammarians but also has seen the development of several grammatical schools independent of one another To name a few are Katantra Mugdhabodha Sarasvata Sanksiptasara etc Accessions List, South Asia Library of Congress.
