Dragon's Teeth Upton Sinclair, 2016-01-19 Pulitzer Prize Winner An American in Germany fights against the rising tide of Nazi terror in this monumental saga of twentieth century world history In the wake of the 1929 stock market crash Lanny

Budd's financial acumen and his marriage into great wealth enable him to continue the lifestyle he has always enjoyed. But the devastation the collapse has wrought on ordinary citizens has only strengthened Lanny's socialist ideals. Much to the chagrin of his heiress wife Irma, a confirmed capitalist, in Germany to visit relatives, Lanny encounters a disturbing atmosphere of hatred and jingoism. His concern over the growing popularity of the Nazi Party escalates when he meets Adolf Hitler, the group's fanatical leader and the members of his inner circle. But Lanny's gravest fear is the threat a national socialist government poses to the German Jewish family of Hansi, the musician husband of Lanny's sister Bess, a threat that will impel the international art dealer to risk his wealth, his future, even his life in a courageous attempt to rescue his loved ones from a terrible fate. Winner of the 1943 Pulitzer Prize for Fiction, *Dragon's Teeth* brilliantly captures the nightmarish march toward the Second World War. An astonishing mix of history, adventure, and romance, the Lanny Budd novels are a testament to the breathtaking scope of Upton Sinclair's vision and his singular talents as a storyteller. **Primary Physical**

Science Education Hans U. Fuchs, Federico Corni, 2023-10-10. This open access book is the first of two volumes that integrates a study of direct encounters with Primary Forces of Nature: Wind, Light, Rain, Heat, and Cold Water, etc., with imaginative narrative forms of communication. The approach developed in this book shows how the growth of cognitive tools, first of mythic and then of romantic forms of understanding, lets children make sense of experiencing physical phenomena. An in-depth description of Fluids, Gravity, and Heat as Basic Forces shows how primary sense-making can evolve into understanding of aspects of physical science, allowing for a nature-based pedagogy and application to environmental systems. The final chapter introduces visual metaphors and theatrical storytelling that are particularly useful for understanding the role of energy in physical processes. It explores how a mythic approach to nature can inform early science pedagogy. This book is of interest to kindergarten and primary school teachers as well as early education researchers and instructors.
