Power and Policy in Quest of Law Myres S. McDougal, W.M. Reisman, 2024-09-02 **A New World Order**

Anne-Marie Slaughter, 2009-02-09 Global governance is here but not where most people think This book presents the far reaching argument that not only should we have a new world order but that we already do Anne Marie Slaughter asks us to completely rethink how we view the political world It s not a collection of nation states that communicate through presidents prime ministers foreign ministers and the United Nations Nor is it a clique of NGOs It is governance through a complex global web of government networks Slaughter provides the most compelling and authoritative description to date of a world in which government officials police investigators financial regulators even judges and legislators exchange information and coordinate activity across national borders to tackle crime terrorism and the routine daily grind of international interactions National and international judges and regulators can also work closely together to enforce international agreements more effectively than ever before These networks which can range from a group of constitutional judges exchanging opinions across borders to more established organizations such as the G8 or the International Association of Insurance Supervisors make things happen and they frequently make good things happen But they are underappreciated and worse underused to address the challenges facing the world today The modern political world then consists of states whose component parts are

fast becoming as important as their central leadership Slaughter not only describes these networks but also sets forth a blueprint for how they can better the world Despite questions of democratic accountability this new world order is not one in which some world government enforces global dictates The governments we already have at home are our best hope for tackling the problems we face abroad in a networked world order **International Ethics** Mark R. Amstutz, 2008-02-15

Now in a comprehensively revised and updated edition this text cogently demonstrates that moral values and ethical reasoning are indispensable in global politics Mark R Amstutz explores two distinct dimensions of international political morality the role of moral norms in foreign affairs and the ethical foundation of the rules and structures of global society The author considers important conceptual and philosophical challenges posed by the plurality of values in the international community but his primary goal is to describe and assess the nature role and impact of international political morality on international relations Through the use of balanced arguments and a wide ranging selection of case studies Amstutz illustrates the place of moral norms in international relations He presents the concepts theories methods and traditions of ethical analysis and then applies them to case studies in the areas of political reconciliation human rights war unconventional military operations foreign intervention economic sanctions justice among states and global justice His clearly written study will be of special interest to students and practitioners of international affairs who are concerned with the role of political morality and ethical judgment in global affairs **The BRICS Order** David Monyae, Bhaso Ndzendze, 2021-02-08

This book examines the direction of the BRICS association Beginning with historical analyses of the broader Global South and the fundamental composition of the BRICS countries and then moving on to present trends The BRICS Order evaluates the variables that will influence the association's future While the BRICS as a forum emerged as a result of the visible fragmentation of the post 1945 world order it itself remains dogged by issues emanating from internal divergences among member states and from external factors The contributors interrogate the extent to which this formation of emerging economies is indicative of a challenge to the West or in fact a complimentary relation Integral to these studies which encompass examinations of such diverse areas as governance systems issues in bilateral relations security threats multilateral institution building the transnational creation and dissemination of knowledge and technological innovation are patterns of convergence and divergence which render the countries not a formal alliance but as signifiers of a multilateral future in which the West is itself to become more heterogeneous and thus become occasionally complemented depending on the vacillating consensus within the BRICS association and on the interests of the BRICS countries at different points in time
