Quest For Reality Subjectivism And The Metaphysics Of Colour:

The Quest for Reality Barry Stroud, 2000 We say the grass is green or lemons are yellow to state what everyone knows But are the things we see around us really colored or do they only look that way because of the effects of light rays on our eyes and brains Is color somehow unreal or subjective and dependent on our human perceptions and the conditions under which we see things Distinguished scholar Barry Stroud investigates these and related questions in *The Quest for Reality* In this long awaited book he examines what a person would have to do and believe in order to reach the conclusion that everyone's perceptions and beliefs about the color of things are illusions and do not accurately represent the way things are in the world as it is independently of us Arguing that no such conclusion could be consistently reached Stroud finds that the conditions of a successful unmasking of color cannot all be fulfilled The discussion extends beyond color to present a serious challenge to many other philosophical attempts to discover the way things really are A model of subtle elegant and rigorous philosophical writing this study will attract a wide audience from all areas of philosophy

On the Genealogy of Color Zed Adams, 2015-10-16 In *On the Genealogy of Color* Zed Adams argues for a historicized approach to conceptual analysis by exploring the relevance of the history of color science for contemporary philosophical debates about color realism Adams contends that two prominent positions in these debates Cartesian anti realism and Oxford realism are both predicated on the assumption that the concept of color is ahistorical and unrevisable Adams takes issue with this premise by offering a philosophical genealogy of the concept of color This book makes a significant contribution to recent debates on philosophical methodology by demonstrating the efficacy of using the genealogical method to explore philosophical concepts and will appeal to philosophers of perception philosophers of mind and metaphysicians

Language, World, and Limits A. W. Moore, 2019-06-28 These essays by A W Moore are all concerned with the business of representing how things are its nature its scope and its limits The essays in Part One deal with linguistic representation and discuss topics such as rules of representation and their

nature the sorites paradox and the very distinction between sense and nonsense Wittgenstein's work both early and late figures prominently One thesis that surfaces at various points is that some things are beyond representation The essays in Part Two deal with representation more generally and with the character of what is represented and owe much to Bernard Williams's argument for the possibility of representation from no point of view They touch more or less directly on the distinction between representation from a point of view and representation from no point of view in some cases by exploring various consequences of Kant's belief that representation of how things are physically is always eo ipso representation from a point of view One thesis that surfaces at various points is that nothing is beyond representation Each of the essays in Part Three which draw inspiration from the early work of Wittgenstein indicate how the resulting tension between Parts One and Two is to be resolved namely by construing the first part as a thesis about states of knowledge or understanding and the second part as a thesis about facts or truths

Projection and Realism in Hume's Philosophy P. J. E. Kail, 2010-04-22 In his writings Hume talks of our gilding and staining natural objects and of the mind's propensity to spread itself on the world This has led commentators to use the metaphor of projection in connection with his philosophy Hume is held to have taught that causal power and self are projections that God is a projection of our fear and that value is a projection of sentiment By considering what it is about Hume's writing that occasions this metaphor P. J. E. Kail spells out its meaning the role it plays in Hume's work and examines how if at all what sounds projective in Hume can be reconciled with what sounds realist In addition to offering some highly original readings of Hume's central ideas *Projection and Realism in Hume's Philosophy* offers a detailed examination of the notion of projection and the problems it faces

Moral Realism Kevin DeLapp, 2013-02-14 Are moral values objective or are they relative to different cultural contexts and traditions Do values have any place in a disenchanted scientific conception of the world and if so how do human beings relate to such values culturally psychologically and epistemologically This book examines contemporary responses to these questions *Moral Realism* introduces students to contemporary debates concerning moral realism including issues related to ethical naturalism moral epistemology moral motivation cultural pluralism and moral disagreement In the context of examining and connecting these different debates the book presents its own unique form of moral realism according to which values may be belief independent while also being characterized by an ontological pluralism that generates incommensurable moral disagreements and tragic dilemmas This idea serves as a guiding thread and also represents an attractive and neglected metaethical position in its own right Specific attention is devoted to locating debates about moral realism in actual embodied contexts by looking to issues in experimental moral psychology cross cultural anthropology and political science permitting an accessible approach ideal for undergraduate students

The Mind's Eye Jeffrey F. Hamburger, Anne-Marie Bouché, 2006 *The Mind's Eye* focuses on the relationships among art theology exegesis and literature issues long central to the study of medieval art yet ripe for reconsideration Essays by leading scholars from many fields examine the illustration of

theological commentaries the use of images to expound or disseminate doctrine the role of images within theological discourse the development of doctrine in response to images and the place of vision and the visual in theological thought At issue are the ways in which theologians responded to the images that we call art and in which images entered into dialogue with theological discourse In what ways could medieval art be construed as argumentative in structure as well as in function Are any of the modes of representation in medieval art analogous to those found in texts In what ways did images function as vehicles not merely vessels of meaning and signification To what extent can exegesis and other genres of theological discourse shed light on the form as well as the content and function of medieval images These are only some of the challenging questions posed by this unprecedented and interdisciplinary collection which provides a historical framework within which to reconsider the relationship between seeing and thinking perception and the imagination in the Middle Ages

Beyond Moral Judgment Alice Crary, 2009-09-30 What is moral thought and what kinds of demands does it impose Alice Crary's book Beyond Moral Judgment claims that even the most perceptive contemporary answers to these questions offer no more than partial illumination owing to an overly narrow focus on judgments that apply moral concepts for example good wrong selfish courageous and a corresponding failure to register that moral thinking includes more than such judgments Drawing on what she describes as widely misinterpreted lines of thought in the writings of Wittgenstein and J L Austin Crary argues that language is an inherently moral acquisition and that any stretch of thought without regard to whether it uses moral concepts may express the moral outlook encoded in a person's modes of speech She challenges us to overcome our fixation on moral judgments and direct attention to responses that animate all our individual linguistic habits Her argument incorporates insights from McDowell Wiggins Diamond Cavell and Murdoch and integrates a rich set of examples from feminist theory as well as from literature including works by Jane Austen E M Forster Tolstoy Henry James and Theodor Fontane The result is a powerful case for transforming our understanding of the difficulty of moral reflection and of the scope of our ethical concerns

False Moves in Philosophy and Social Theory Patrick Murray, Jeanne Schuler, 2023-09-12 This book considers diverse philosophical topics unified by the identification of false moves commonly found in modern philosophy mainstream Anglo American philosophy and social theory The authors expose the sources of fundamental problems that recur in philosophy basic problems with what the authors call factoring philosophy Factoring philosophy fails to attend to the phenomenological task of determining when what is distinguishable is separable and when not Consequently factoring philosophy makes phenomenological mistakes false moves when it treats as separable what is only distinguishable Analytic philosophy is prone to false moves when it fails to recognize that phenomenology is the necessary complement to analysis There is nothing wrong with analysis we might as well give up thinking as give up analysis

and nothing is wrong with the values prized by analytic philosophy As Hegel observed philosophizing requires above all that each thought should be grasped in its full precision and that nothing should remain vague and indeterminate Ultimately this book contends that false moves prevail in philosophical analysis and social theory when they neglect their phenomenological foundations

Understanding Emotions Peter Goldie, 2017-11-01 This title was first published in 2002 At the end of the 20th century the emotions ceased to be a neglected topic for philosophical consideration The editor suggests that this may in part be due to a change in the way the subject is approached The emotions were characteristically thought of by philosophers as states which give rise to perturbation in what might roughly be called right thinking The basic idea was that practical reasoning like theoretical reasoning ought to be and can be dispassionate This means that either the emotions interfere with right reasoning in a way which is a proper object of study for the biological sciences but not for the science of the mind or that the emotions become reducible to and analyzable as collections of propositional attitudes which are themselves assessable in terms of right reasoning The move away from this idea is taken as an improvement in our philosophical approach to the emotions by the authors Following this all of the papers in the volume contribute to this philosophical approach each approaching the subject from a different angle

Disclosing Horizons Nicholas Temple, 2006-11-22 This study examines the influence of perspective on architecture highlighting how critical historical changes in the representation and perception of space continue to inform the way architects design Since its earliest developments perspective was conceived as an exemplary form of representation that served as an ideal model of

how everyday existence could be measured and ultimately judged Temple argues that underlying the symbolic and epistemological meanings of perspective there prevails a deeply embedded redemptive view of the world that is deemed perfectible Temple explores this idea through a genealogical investigation of the cultural and philosophical contexts of perspective throughout history highlighting how these developments influenced architectural thought This broad historical enquiry is accompanied by a series of case studies of modern or contemporary buildings each demonstrating a particular affinity with the accompanying historical model of perspective

Acquaintance Jonathan Knowles, Thomas Raleigh, 2019-11-21 Bertrand Russell famously distinguished between knowledge by acquaintance and knowledge by description For much of the latter half of the twentieth century many philosophers viewed the notion of acquaintance with suspicion associating it with Russellian ideas that they would wish to reject However in the past decade or two the concept has undergone a striking revival in mainstream analytic philosophy acquaintance is it seems respectable again This volume showcases the great variety of topics in philosophy of mind epistemology and philosophy of language for which philosophers are currently employing the notion of acquaintance It is the first collection of new essays devoted to the topic of acquaintance featuring chapters from many of the world's leading experts in this area Opening with an extensive introductory essay which provides some historical background and summarizes the main debates and issues concerning acquaintance the remaining thirteen contributions are grouped thematically into four sections phenomenal consciousness perceptual experience reference and epistemology

The Externalist Challenge Richard Schantz, 2011-08-18 The debate between internalism and externalism has become a focal point of attention both in epistemology and in the philosophy of mind and language Externalism challenges basic traditional internalist conceptions of the nature of knowledge justification thought and language What is at stake is the very form that theories in epistemology and the philosophy of mind ought to take This volume is a collection of original contributions of leading international authors reflecting on the present state of the art concerning the exciting controversies between internalism and externalism
