## Question Of Belief:

**Belief's Own Ethics** Jonathan E. Adler, 2006-01-20 The fundamental question of the ethics of belief is What ought one to believe According to the traditional view of evidentialism the strength of one's beliefs should be proportionate to the evidence Conventional ways of defending and challenging evidentialism rely on the idea that what one ought to believe is a matter of what it is rational prudent ethical or personally fulfilling to believe Common to all these approaches is that they look outside of belief itself to determine what one ought to believe In this book Jonathan Adler offers a strengthened version of evidentialism arguing that the ethics of belief should be rooted in the concept of belief that evidentialism is belief's own ethics A key observation is that it is not merely that one ought not but that one cannot believe for example that the number of stars is even The cannot represents a conceptual barrier not just an inability Therefore belief in defiance of one's evidence or evidentialism is impossible Adler addresses such questions as irrational beliefs reasonableness control over beliefs and whether justifying beliefs requires a foundation Although he treats the ethics of belief as a central topic in epistemology his ideas also bear on rationality argument and pragmatics philosophy of religion ethics and social cognitive psychology The Question of Belief, 1955

*Greek Myth* Lowell Edmunds, 2021-04-06 This volume provides a guide to research in the field of Greek Myth introducing the main questions theories and methods related to the study of Greek Myth today The author points out with critical reappraisal the key themes and ideas in recent scholarship and makes suggestions for future lines of study Aimed at students and scholars in Classics it will also be of interest to larger audiences in the Humanities

*Warrant and Proper Function* Alvin Plantinga, 1993-05-27 In this companion volume to *Warrant: The Current Debate* Alvin Plantinga develops an original approach to the question of epistemic warrant that is what turns true belief into knowledge He argues that what is crucial to warrant is the proper functioning of one's cognitive faculties in the right kind of cognitive environment Although this book is in some sense a sequel to its companion volume the arguments do not presuppose those of the first book and it stands alone as a stimulating contribution to epistemology

**Conceptual Revolutions** Paul Thagard, 1993 In this path breaking work Paul Thagard draws on the history and philosophy of science cognitive psychology and the field of artificial intelligence to develop a theory of conceptual change capable of accounting for all major scientific revolutions The history of science contains dramatic episodes of revolutionary change in which whole systems of concepts have been replaced by new systems Thagard provides a new and comprehensive perspective on the transformation of scientific conceptual systems Thagard examines the Copernican and the Darwinian revolutions and the emergence of Newton's mechanics Lavoisier's oxygen theory Einstein's theory of relativity quantum theory and the geological theory of plate tectonics He discusses the psychological mechanisms by which new concepts and links between them are formed and advances a computational theory of explanatory coherence to show how new theories can be judged to be superior to previous ones

**Our New Human Consciousness** Terry Sands, 2011-05 Every few thousand years our human culture

experiences a massive evolutionary transformation In the next few years our consciousness will change very rapidly and move us beyond anything we can presently imagine This change of consciousness is happening naturally to each of us now and it will affect every aspect of how we think how we live and how we love We are a culture in search of its spirit and this change of consciousness is evolutionarily next for humankind on this planet When the awareness opens one may search many avenues and attractions for truth and enlightenment and find the search lacking in result The next step may be the path of Self discovery But the direction on this path will not be given to us by a great teacher who comes down from the mountaintop with answers cast in stone but rather by lots of little great teachers who could be called pathfinders And to move into this new consciousness we will transform the mind and the way it works with new mental skills and mental technology Our success is inevitable The ease or difficulty with which we achieve this success is still in formation We will survive the transition physically The question is whether we will survive psychologically Psychological survival in this transition depends on only one thing Developing the ability and inner discipline to completely instantaneously unquestioningly and continuously adapt to change

**Believing by Faith** John Bishop, 2007-04-12 Can it be justifiable to commit oneself by faith to a religious claim when its truth lacks adequate support from one's total available evidence In *Believing by Faith* John Bishop defends a version of fideism inspired by William James's 1896 lecture *The Will to Believe* By critiquing both isolationist Wittgensteinian and Reformed epistemologies of religious belief Bishop argues that anyone who accepts that our publicly available evidence is equally open to theistic and naturalist atheistic interpretations will need to defend a modest fideist position This modest fideism understands theistic commitment as involving doxastic venture practical commitment to propositions held to be true through passion causes other than the recognition of evidence of or for their truth While Bishop argues that concern about the justifiability of religious doxastic venture is ultimately moral concern he accepts that faith ventures can be morally justifiable only if they are in accord with the proper exercise of our rational epistemic capacities Legitimate faith ventures may thus never be counter evidential and furthermore may be made supra evidentially only when the truth of the faith proposition concerned necessarily cannot be settled on the basis of evidence Bishop extends this Jamesian account by requiring that justifiable faith ventures should also be morally acceptable both in motivation and content Hard line evidentialists however insist that all religious faith ventures are morally wrong Bishop thus conducts an extended debate between fideists and hard line evidentialists arguing that neither side can succeed in establishing the irrationality of its opposition He concludes by suggesting that fideism may nevertheless be morally preferable as a less dogmatic more self accepting even a more loving position than its evidentialist rival

Report of the Joint Select Committee Appointed to Inquire Into the Condition of Affairs in the Late Insurrectionary States, So Far as Regards the Execution of Laws, and the Safety of the Lives and Property of the Citizens of the United States and Testimony Taken: Testimony taken by the committee [June 5-Dec. 8, 1871] North Carolina United States. Congress. Joint

Select Committee on the Condition of Affairs in the Late Insurrectionary States, 1872      Asking Questions Robert Fiengo, 2007-05-03 Asking Questions examines a central phenomenon of language the use of sentences to ask questions Although there is a sizable literature on the syntax and semantics of interrogatives the logic of questions and the speech act of questioning no one has tried to put the syntax and semantics together with the speech acts over the full range of phenomena we pretheoretically think of as asking questions Robert Fiengo not only does this but also takes up some more foundational issues in the theory of language By positioning the findings of contemporary grammatical theorizing within the larger domain of language use Fiengo challenges the use theorist to acknowledge the importance of grammatical form and the grammarian to acknowledge the importance of use In addition to developing an Austinian distinction between four questioning speech acts and a proposal concerning the philosophy of language Asking Questions contains a useful discussion of the type token distinction and how use of language compares with use of other things Fiengo also considers the nature of multiple questions revealing what one must know to ask them and what speech acts one may perform when asking them Asking Questions advances our understanding of a wide range of issues in a number of important respects Scholars and students of linguistics and philosophy will find plenty to interest them in this pioneering work      Beyond Belief Robert P. Vande Kappelle, 2012-09-17 The current age marks the transition from modernity to postmodernity a period as impactful to the Western sensibility as any previous era The role of religion and the future of Christianity are at stake At this time of transition many thoughtful individuals find themselves at a quandary having reached a critical stage in their spiritual journey Prompted by academia science reason culture and their own experience they feel compelled to choose between the beliefs they inherited as children and the claims of science reason pluralism and secularism Beyond Belief suggests that one need not take an either/or approach on these issues there is a better way one that embraces adventure and ambiguity science and religion reason and faith evolution and creation and finds ways to live creatively with realities for which there are no easy explanations Building on a paradigmatic journey of faith that involves three stages precritical critical and postcritical understanding Beyond Belief describes the quest for God and for authentic faith in the twenty first century The key point for this understanding is to replace belief with faith acknowledging that belief in doctrines is not central since they are themselves unprovable This new theological perspective requires rethinking many of our cherished doctrines including our understanding of God Jesus Scripture prayer miracles and revelation      *Thin Objects* Øystein Linnebo, 2018-05-23 Are there objects that are thin in the sense that not very much is required for their existence Frege famously thought so He claimed that the equinumerosity of the knives and the forks suffices for there to be objects such as the number of knives and the number of forks and for these objects to be identical The idea of thin objects holds great philosophical promise but has proved hard to explicate ystein Linnebo aims to do so by drawing on some Fregean ideas First to be an object is to be a possible referent of a singular term Second singular reference can be achieved by providing a criterion of identity for the

would be referent The second idea enables a form of easy reference and thus via the first idea also a form of easy being Paradox is avoided by imposing a predicativity restriction on the criteria of identity But the abstraction based on a criterion of identity may result in an expanded domain By iterating such expansions a powerful account of dynamic abstraction is developed The result is a distinctive approach to ontology Abstract objects such as numbers and sets are demystified and allowed to exist alongside more familiar physical objects And Linnebo also offers a novel approach to set theory which takes seriously the idea that sets are formed successively [The Westminster Review](#) ,1872 **Learning from Words** Jennifer Lackey,2008-02-28 Jennifer Lackey reshapes the vigorous current debate on testimony by showing that the standard view of the transmission of knowledge by testimony is fundamentally misguided Her radical new theory holds that testimony is itself an irreducible source of new knowledge to which both speaker and hearer contribute **Epistemology** Ernest Sosa,Jaekwon Kim,Jeremy Fantl,Matthew McGrath,2008-02-11 New and thoroughly updated Epistemology An Anthology continues to represent the most comprehensive and authoritative collection of canonical readings in the theory of knowledge Concentrates on the central topics of the field such as skepticism and the Pyrrhonian problematic the definition of knowledge and the structure of epistemic justification Offers coverage of more specific topics such as foundationalism vs coherentism and virtue epistemology Presents wholly new sections on Testimony Memory and Perception and The Value of Knowledge Features modified sections on The Structure of Knowledge and Justification The Non Epistemic in Epistemology and The Nature of the Epistemic Includes many of the most important contributions made in recent decades by several outstanding authors *Reasons Without Rationalism* Kieran Setiya,2010-07-21 Modern philosophy has been vexed by the question Why should I be moral and by doubts about the rational authority of moral virtue In *Reasons without Rationalism* Kieran Setiya shows that these doubts rest on a mistake The should of practical reason cannot be understood apart from the virtues of character including such moral virtues as justice and benevolence and the considerations to which the virtues make one sensitive thereby count as reasons to act Proposing a new framework for debates about practical reason Setiya argues that the only alternative to this virtue theory is a form of ethical rationalism in which reasons derive from the nature of intentional action Despite its recent popularity however ethical rationalism is false It wrongly assumes that we act under the guise of the good or it relies on dubious views about intention and motivation It follows from the failure of rationalism that the virtue theory is true we cannot be fully good without the perfection of practical reason or have that perfection without being good Addressing such topics as the psychology of virtue and the explanation of action *Reasons without Rationalism* is essential reading for philosophers interested in ethics rationality or the philosophy of mind [Knowledge First](#) J. Adam Carter,Emma C. Gordon,Benjamin Jarvis,2017-11-10 Knowledge First constitutes what is widely regarded as one of the most significant innovations in contemporary epistemology in the past 25 years Knowledge first epistemology is the idea that knowledge per se should not be analysed in terms of its constituent parts e g justification belief but rather that these and other notions

should be analysed in terms of the concept of knowledge This volume features a substantive introduction and 13 original essays from leading and up and coming philosophers on the topic of knowledge first philosophy The contributors essays range from foundational issues to applications of this project to other disciplines including the philosophy of mind the philosophy of perception ethics and action theory Knowledge First Approaches in Epistemology and Mind aims to provide a relatively open ended forum for creative and original scholarship with the potential to contribute and advance debates connected with this philosophical project

*Christian Apologetics Past and Present (Volume 2, From 1500)* William Edgar, K. Scott Oliphant, 2011-09-13 Amid a revival of apologetics few things could be more useful than an acquaintance with how Christian faith was defended down through the ages say the editors in their introduction to this two part anthology Access to both historical and contemporary texts gives us fresh insight into how our fathers in the faith responded to the questions facing them Volume 2 in this one of a kind resource takes a sweeping look at apologetics from the Reformation to the present Readings from twenty six apologists including Martin Luther John Calvin Blaise Pascal Jonathan Edwards Søren Kierkegaard Francis Schaeffer Alvin Plantinga and William Lane Craig are included With editorial commentary and questions for reflection Christian Apologetics Past and Present will prove a valuable text for students as well as a unique resource for those interested in defending the faith
