Bowen, Derek Bok, 2019-01-08 The landmark New York Times bestseller that demonstrates the benefits of race conscious admissions in higher education First published in 1998 William Bowen and Derek Bok's *The Shape of the River* became an immediate landmark in the debate over affirmative action in America It grounded a contentious subject in concrete data at a time when arguments surrounding it were characterized more by emotion than evidence and it made a forceful case that race conscious admissions were successfully helping to promote equal opportunity Today the issue of affirmative action remains unsettled Much has changed but *The Shape of the River* continues to present the most compelling data available about the effects of affirmative action Now with a new foreword by Nicholas Lemann and an afterword by Derek Bok *The Shape of the River* is an essential text for anyone seeking to understand race conscious admissions in higher education Top Student, Top School? Alexandria Walton Radford, 2013-05-02 Most of us think that valedictorians can write their own ticket By reaching the top of their class they have proven their merit so their next logical step should be to attend the nation's very best universities Yet in

Top Student Top School Alexandria Walton Radford of American Institutes for Research reveals that many valedictorians do not enroll in prestigious institutions Employing an original five state study that surveyed nine hundred public high school valedictorians she sets out to determine when and why valedictorians end up at less selective schools showing that social class makes all the difference Radford traces valedictorians paths to college and presents damning evidence that high schools do not provide sufficient guidance on crucial factors affecting college selection such as reputation financial aid and even the application process itself Left in a bewildering environment of seemingly similar options many students depend on their parents for assistance and this allows social class to rear its head and have a profound impact on where students attend Simply put parents from less affluent backgrounds are far less informed about differences in colleges quality the college application process and financial aid options which significantly limits their child s chances of attending a competitive school even when their child has already managed to become valedictorian Top Student Top School pinpoints an overlooked yet critical juncture in the education process one that stands as a barrier to class mobility By focusing solely on valedictorians it shows that students paths diverge by social class even when they are similarly well prepared academically and this divergence is traceable to specific failures by society failures that we can and should address Watch an interview of Alexandria Walton Radford discussing her book here <http://www.youtube.com/watch?v=F81c1D1BpY0>

Education in a Research University Kenneth Joseph Arrow, 1996 The research university is one of the most characteristic and important institutions of our time It is an extremely complex entity seeking to achieve a variety of

aims and responding to a multiplicity of pressures Its principal obligation is to educate students and to prepare them to live in and contribute to society To serve this function knowledge must be collected organized and disseminated but perhaps even more important new knowledge must be created The knowledge so developed and imparted must ultimately be carried out into society largely through former students but also by other means The present volume is a collection of 30 essays on the character administration and management of research universities with special emphasis on the perspective of statistics and operations research It thus concentrates on issues of systematic planning planning models teaching approaches and management associated with the aims and methods of operations research although it also deals with more general concerns about the management of universities and university resources and with some of the applications of operations research and statistical tools that have moved outside university settings
