

# Gathering Evidence To Answer Key Questions

- ⦿ “We need to consider the results of the test within the context of its own curriculum and students by gathering evidence to answer key questions:
  - How is writing represented in the text?
  - Does it elicit a sample that adequately represents the students’ skills and abilities?
  - Once the evidence is gathered from the investigation, it must be evaluated to determine if it is an adequate test”

delivery of effective services common factors and common elements are then introduced and followed by a treatise on the importance of implementation in child welfare settings Embracing different types of evidence used for different questions the role of randomized controlled trials epidemiology administrative and survey data are then explored Finally the context of service provision within an agency is explored through an overview of the structure function and culture of human services organizations the role of universities in training staff and conducting relevant practice and policy research and an applied example involving a partnership between a major university and a large child welfare agency
