Book on Sex Education Lester Allen Kirkendall, Ruth Farnham Osborne, 1969 **Method and Meaning in Polls and Surveys** Howard Schuman, 2008

Howard Schuman is one of the premier scholars of social surveys. His expertise concerns the way questions about attitudes and beliefs are worded and the effects questions have on the answers people give. However, *Method and Meaning in Polls and Surveys* is less about the substance of wording effects and more about approaches to interpreting the respondent's world and how surveys can make that world understandable, though often in ways not anticipated by the researcher. Schuman examines the question-answer process that is basic to polls and surveys as it is in so much of life. His concern is with the nature of questioning itself, with issues of validity and bias and with the scope and limitations of meaning sought through polls and surveys. Writing with both wisdom and humor, Schuman considers the issues both at a theoretical level, bringing in ideas from other social sciences, and empirically, with substantive research of his own and others. The book will be of interest to social scientists, to survey researchers in academia and business, and to all those concerned with the pervasive influence of polls in society.

The Boy Scout Movement Applied by the Church Norman Egbert Richardson, Ormond Eros Loomis, 1915 Practice and Profile Johan Hegeman, Margaret Edgell, Henk Jochemsen, 2011-02-28

Too many students are disappointed. They want to make a difference in their chosen professions. They are inspired by successful visionaries but they have little idea how to follow in their oversized footsteps. Their colleges and universities promise more professional development than they can possibly deliver, especially in terms of moral development for the professions. Experts coming from a range of perspectives in higher education agree that moral formation for the professions must increasingly take place in higher education. Tragically, the recent evolution of teaching has stripped educators of much of the rationale for moral formation. The recent record of moral lapses by managers testifies to this crisis of moral education. The authors call for a revival of moral formation in higher education for the professions. They supply the needed resources to redesign classic as well as cutting-edge teaching and learning toward practical moral education in the professions. This book is carefully designed to apply traditional Christian principles appropriately to evolving professional practices. The authors' strategies address the problems surrounding calling, vocation, and the growing need for virtue training in the professions. In particular, the authors provide clear direction for how to meet the need for professional profiles that meet the standards of the marketplace. *Practice and Profile* provides the reader with a tested and proven model of faith formation appropriate to the professions. It also goes into specific useful detail as to how the model mobilizes learning in classroom and professional settings. It aids institutions of higher learning in their struggle with demands for new learning.
