Qui Sont Vos Psychanalystes:

Lacan Today Alexandre Leupin, 2020-09-08 *Lacan Today* Psychoanalysis Science Religion offers a lucid overview of the French psychoanalyst's work in five sections: The Structure of the Subject, Epistemology, Four Discourses, There is No Sexual Rapport, and God is Real. The book maps out Lacan's thought for the lay reader with unmatched clarity. It does this by building from Lacan's graph and formulas, which are often misunderstood. This formalization acts as a pedagogical tool of wonderful economy, offering a broad overview without neglecting the essential details. The chapters are summarized by a general graph that visually demonstrates Lacan's rigor and coherence. The book examines often neglected aspects of Lacan's work, like problems in the history of science, epistemology, and religion, in order to show Lacan's relevance to today's world. It makes the case for Lacan as one of the most important thinkers of the twentieth century, whose reach extends beyond the discipline of psychoanalysis. Indeed, Lacan's thought should lead readers into a reexamination of philosophy, literature, art, politics, economy, and desire. In his introduction, Alexandre Leupin writes: "If the unconscious exists, then Lacan is the only twentieth-century thinker who has drawn the consequences of Freud's discovery to their ultimate limits. I propose here what some will take as bombastic hyperbole: Lacan's radical reevaluation of human thinking is comparable to Einstein's. Though Lacan's thought is making tremendous inroads in countries of Latin culture, it has been slowly fading from public awareness in the English-speaking world. Often Lacan has been nothing more than a pawn in the bundling of contradictory doctrines labeled as French thought, or he has been reduced to a means of exchange between psychoanalysts or specialists in the humanities. Leupin's contention is that what Lacan said or wrote is of interest to the general public and that his consignment to oblivion is reversible. This book demonstrates that Lacan's thinking has vast implications, not only for college professors or practicing psychoanalysts but also for scientists, epistemologists, and every man and woman." *Freud and War* Marlene

Belilos, 2018-03-29 During the rise of fascism and anti-Semitism in Germany, Albert Einstein wrote to Sigmund Freud asking the fundamental question: What can be done to liberate humanity from the menace of war? The psychoanalyst replied at length, and their exchange of letters reproduced here was published in March 1933 under the title *Why War*. The book would be included in the book burnings in Berlin on 10th of May that year. *Why War* is important in Freud's work because in it he develops a fundamental idea that leads him to conclude that the life and death drives are linked, a thought that he had already entertained in works such as *Death and Us* (1915), which is also included here. In a terrible irony, Freud dedicated a copy of *Why War* to Mussolini, who nonetheless instituted a police investigation of its author. The contributors to this volume explore the reasons underlying the dedication, as well as giving their own reflections on the genesis of war. **Genealogies of Speculation** Suhail Malik, Armen Avanessian, 2016-01-14 *Genealogies of Speculation* looks to break the impasse between the innovations of speculative thought and the dominant strands of 20th-century anti-foundationalist philosophy. Challenging emerging paradigms of philosophical history, this text re-evaluates different theoretical and political traditions such as

feminism literary theory social geography and political theory after the speculative turn in philosophy With contributions from leading writers in contemporary thought this book is a crucial resource for studying cultural and art theory and continental philosophy

Inheritance in Psychoanalysis Joel Goldbach, James A. Godley, 2018-02-15 In contrast to the way inheritance is understood in scientific discourse and culture more broadly inheritance in psychoanalysis is a paradox Although it's impossible strictly speaking for the unconscious to be inherited this volume demonstrates how the concept of inheritance can occasion a rich reassessment and reinvention of psychoanalytic theory and practice The collection enacts a critical traversal of inheritance for psychoanalysis from the most basic assumptions of natural or biological inheritance such as innateness heredity evolution and ontogenesis to analysis of the ways cultural traditions can be challenged and transformed and finally to the reinvention of psychoanalytic practice in which the ethics of inheritance is fully realized as the individual's responsibility to transform the social bond Featuring strong interdisciplinary analysis rooted in both psychoanalysis and philosophy this volume further engages science politics and cultural studies and addresses contemporary political challenges such as autism and transgenderism

The Reign of Speech Dries G. M. Dulsster, 2021-10-28 This book provides an in depth examination of Lacanian oriented psychotherapy and supervision drawing on a wide range of Lacanian texts and rich interview data Beginning with a comprehensive overview of the Lacanian psychoanalytic therapeutic process it next considers this in relation to Lacanian texts including *The Function and Field of Speech and Language in Psychoanalysis* *Direction of the Treatment* *Lacanian Discourses* and *Seminar XXIII* and interview data from ex analysants and psychoanalysts The second part of the book offers the first systematic discussion of Lacanian supervision Through a sophisticated theoretical analysis and unique research material Dries Dulsster has created an important reference point for students scholars and clinicians that will appeal to those new to Lacanian practice and those already deeply involved in it

Adventures in Transcendental Materialism Adrian Johnston, 2014-03-17 Critically engaging with thinkers including Slavoj Žižek Alain Badiou Catherine Malabou Jean Claude Milner Martin Hagglund William Connolly and Jane Bennett Johnston formulates a materialist and naturalist account of subjectivity that does full justice to human beings as irreducible to natural matter alone

Self and Emotional Life Adrian Johnston, Catherine Malabou, 2013-06-04 Adrian Johnston and Catherine Malabou defy theoretical humanities deeply entrenched resistance to engagements with the life sciences Rather than treat biology and its branches as hopelessly reductive and politically suspect they view recent advances in neurobiology and its adjacent scientific fields as providing crucial catalysts to a radical rethinking of subjectivity Merging three distinct disciplines European philosophy from Descartes to the present Freudian Lacanian psychoanalysis and affective neuroscience Johnston and Malabou triangulate the emotional life of affective subjects as conceptualized in philosophy and psychoanalysis with neuroscience Their experiments yield different outcomes Johnston finds psychoanalysis and neurobiology have the potential to enrich each other though affective neuroscience demands a reconsideration of whether affects can be unconscious

Investigating this vexed issue has profound implications for theoretical and practical analysis as well as philosophical understandings of the emotions Malabou believes scientific explorations of the brain seriously problematize established notions of affective subjectivity in Continental philosophy and Freudian Lacanian analysis She confronts philosophy and psychoanalysis with something neither field has seriously considered the concept of wonder and the cold disturbing visage of those who have been affected by disease or injury such that they are no longer affected emotionally At stake in this exchange are some of philosophy's most important claims concerning the relationship between the subjective mind and the objective body the structures and dynamics of the unconscious dimensions of mental life the role emotion plays in making us human and the functional differences between philosophy and science *Hegel & the Infinite* Slavoj Žižek, Clayton Crockett, Creston Davis, 2011 Here 13 major scholars reassess the place of Hegel in contemporary theory and the philosophy of religion The contributors focus not only on Hegelian analysis but also on the transformative value of his thought in relation to our current turn to religion *Zizek's Ontology* Adrian Johnston, 2008-03-19 By taking this avowal seriously Adrian Johnston finally clarifies the philosophical project underlying Žižek's efforts *Concept and Form, Volume 2* Knox Peden, Peter Hallward, 2012-12-12 *Concept and Form* is a two volume monument to the work of the philosophy journal the *Cahiers pour l'Analyse* 1966-69 the most ambitious and radical collective project to emerge from French structuralism Inspired by their teachers Louis Althusser and Jacques Lacan the editors of the *Cahiers* sought to sever philosophy from the interpretation of given meanings or experiences focusing instead on the mechanisms that structure specific configurations of discourse from the psychological and ideological to the literary scientific and political Adequate analysis of the operations at work in these configurations they argue helps prepare the way for their revolutionary transformation Volume One of *Concept and Form* translates some of the most important theoretical texts from the *Cahiers pour l'Analyse* this second volume collects newly commissioned essays on the journal together with recent interviews with people who were either members of its editorial board or associated with its broader theoretical project It aims to help reconstruct the intellectual context of the *Cahiers* and to assess its contemporary theoretical legacy Prefaced by an overview of the project's rigorous investment in science and conceptual analysis the volume considers in particular the *Cahiers*' distinctive effort to link the apparently incommensurable categories of structure and subject so as to prepare for a new synthesis of Marxism and psychoanalysis Contributors include Alain Badiou, Étienne Balibar, Edward Baring, Jacques Bouveresse, Yves Duroux, Alain Grosrichard, Peter Hallward, Adrian Johnston, Patrice Maniglier, Tracy McNulty, Jean-Claude Milner, Knox Peden, Jacques Rancière, François Regnault, and Slavoj Žižek *Prolegomena to Any Future Materialism* Adrian Johnston, 2013-07-31 Adrian Johnston's *Prolegomena to Any Future Materialism* planned for three volumes will lay the foundations for a new materialist theoretical apparatus his transcendental materialism In this first volume Johnston clears an opening within contemporary philosophy and theory for his unique position He engages closely with Lacan, Badiou, and Meillassoux demonstrating how each of these

philosophers can be seen as failing to forge an authentically atheistic materialism Johnston builds a new materialism both profoundly influenced by these brilliant comrades of a shared cause as well as making up for the shortcomings of their own creative attempts to bring to realization the Lacanian vision of an Other less One less ontology The Outcome of Contemporary French Philosophy yields intellectual weapons suitable for deployment on multiple fronts simultaneously effective against the mutually entangled spiritualist and scientistic foes of our post Enlightenment biopolitical era of nothing more than commodities and currencies

El psicoanálisis, en el siglo XXI Jacques-Alain Miller, Esthela Solano-Suárez, 2022-01-31 Pueden ser actuales una teoría y una práctica que nacieron con el siglo XX cuando nos adentramos en una época que en muchos aspectos es tan distinta. ¿Qué han hecho los psicoanalistas para actualizarla teniendo en cuenta las profundas transformaciones de la civilización y sus efectos innegables en la subjetividad de los hombres y las mujeres de nuestra época cuyos malestares se expresan de formas hasta hace poco inditas. Esta es la pregunta a la que responden diversos trabajos reunidos en este volumen empezando por la conferencia de Jacques Alain Miller. ¿Cómo se deviene psicoanalista en los inicios del siglo XXI que constituye una preciosa orientación inicial. Le sigue un seminario de Esthela Solano Suárez en torno a conceptos que Lacan introdujo en el último periodo de su enseñanza y que como ella demuestra constituyen las herramientas más adecuadas para abordar hoy los retos inherentes a nuestra tarea. Y como broche final un artículo suyo que aborda la cuestión de lo sexual a partir de casos ya clásicos pero mostrando de un modo preciso hasta qué punto lo que Lacan llamaba sexualidad es un guiso para no perderse en el laberinto de las identificaciones de género. Con la participación de Silvana Di Rienzo, Rosana Fautsch Fernández y Erendira Molina Espinosa.

Los psicoanalistas y el deseo de enseñar Graciela Brodsky, 2024-03-01 En Los psicoanalistas y el deseo de enseñar de Graciela Brodsky intervienen Fabián Naporstek, Silvia Salman, Ricardo Seldes, Gustavo Stiglitz, Mauricio Tarrab y Luis Tudanca. Se incluye un texto de Jacques Alain Miller. ¿Para qué y por qué habra que enseñar. ¿Por qué habra que enseñar lo que el psicoanálisis enseña. ¿Por qué no decir que es imposible que el análisis es de lo singular y que solamente vale para uno solo que eso que no se transmite más que como resonancia como efecto de afecto mucho menos se enseña.

Las psicosis y el vínculo social Pierre Naveau, 2018-02-13 El vínculo social está creado por la estructura del lenguaje. Atenerse a las declaraciones y los escritos de los sujetos psicóticos abre un camino de sorpresas y descubrimientos porque cada uno de esos sujetos aunque sea de manera frágil y precaria inventa una solución que le es propia. El síntoma entendido aquí en el sentido del psicoanálisis es en cada caso lo que da a ese vínculo una escritura particular. Cuando se trata de un sujeto llamado psicótico el vínculo social se deshace o puede romperse. Así la función social de la enfermedad mental alcanza la dimensión de ironía. La palabra es entonces audible. El hilo de la frase es aún así legible. La respuesta es: Atenerse a la letra de las declaraciones y de los escritos de los sujetos psicóticos abre un camino de sorpresas y descubrimientos porque cada uno de esos sujetos aunque sea de manera contingente frágil y precaria inventa una solución que le es propia.

Monólogo compartido con la locura Guy Briole,2024-03-01 Mon logo compartido con la locura le permite a Guy Briole abordar la locura desde una perspectiva única que trasciende los límites convencionales no limitándose a una visión clínica o sociológica sino que explora las múltiples facetas y expresiones de la locura en diversos contextos Su lectura es la de un psicoanalista orientado por la enseñanza de Lacan Así delimita claramente que su esencia trasciende la mera categorización de la enfermedad mental y a pesar de los avances científicos y el pensamiento racional predominante en las culturas occidentales plantea que la locura conserva un ámbito que se resiste a ser completamente asimilado por estos persistencia de un elemento insalvable una libertad inherente que no se somete a las normativas sociales ni científicas manifiestándose en un discurso no regulado por otros Pero además más allá de una simple clasificación médica la locura revela aspectos únicos de la persona marcando una diferencia en su manera de pensar actuar y razonar Desde la más sutil hasta la más intensa cada variante escapa al pleno alcance de la psiquiatría que puede atenuar sus síntomas más evidentes pero no tocar su núcleo Permite a cada individuo una forma particular de interactuar con el mundo utilizando el lenguaje de maneras que abarcan lo cotidiano y lo poético lo literario y lo lúdico Así la locura se sustrae al dominio de la medicina y la psiquiatría a cuya autoridad es delegada por la sociedad para etiquetar a los locos pero sin poder aprehender completamente su verdadera naturaleza En cada sección de este Mon logo compartido con la locura Guy Briole ofrece una nueva perspectiva a través de relatos de casos de su práctica y reflexiones que ilustran la diversidad y singularidad de cada uno de ellos desafiando las ideas preconcebidas y abriendo caminos a una comprensión más profunda y matizada de lo que denominamos genéricamente locura Propos d'une psychanalyste Annie
