Tools for Making Acute Risk Decisions CCPS (Center for Chemical Process Safety), 2010-09-14 The complexity of today's risk decisions is well known. Beyond cost and risk, there are many other factors contributing to these decisions, including type of risk such as human injury or fatality, the economic impact on the local community, profitability, availability of capital, alternatives for reducing or eliminating the risk, costs of implementing alternatives, codes, standards, regulation, and good industry practice. This book presents a large range of decision aids for risk analysts and decision makers in industry so that vital decisions can be made in a more consistent, logical, and rigorous manner. Though primarily aimed at the process industry, this book can be used by anyone who makes similar decisions in other industries, including those in management science.

Tools to Aid Environmental Decision Making Virginia H. Dale, Mary R. English, 2012-11-26 Environmental decision making is like politics mostly local In fact making decisions about the environment at the subnational level in state regional and local jurisdictions is a lot like politics For resolving environmental issues demands but often resists a balance between deeply held feelings and

stark confrontations among opposing views This volume describes tools that should make the decision maker s lot a bit more tolerable The authors would be the last to suggest that these decision aiding tools will somehow bring a benign order to issues that reach to people s fundamental values What they can help do is to keep the debate focused on the important issues to serve up useful options and to narrow the range of disagreement Even this is a challenging assignment Still why bother The chief reason is that the locus of environmental decision making has in the past decade or so shifted from the national to the subnationallevel a convenient if colorless term to denote the hurly burly of environmental controversy outside the Washington Beltway For example New England has taken a regional stand on tropospheric ozone control and California requires automotive pollution controls that some other jurisdictions have partially adopted This shift is a profound but not unexpected result of the way environmental policy has evolved since the modern environmental movement began around the late 1960s Back then the pendulum was swinging the other way *Viable Populations for Conservation* Michael E. Soulé,1987-08-13 This book addresses research in the rapidly developing integration of conservation biology with population biology **Policy Analysis in National Security Affairs** Richard L. Kugler,2006 This book addresses how to conduct policy analysis in the field of national security including foreign policy and defense strategy It is a philosophical and conceptual book for helping people think deeply clearly and insightfully about complex policy issues This books reflects the viewpoint that the best policies normally come from efforts to synthesize competing camps by drawing upon the best of each of them and by combining them to forge a sensible whole While this book is written to be reader friendly it aspires to in depth scholarship **Human Factors in Automated and Robotic Space Systems: Proceedings of a Symposium**,1987-01-01
