and the nineteenth centuries Historiography on water management in the territory that is today Spain has highlighted the region's role as a mediator between the Islamic masters of water and the Christian world The history of water in Portugal is less known and it has been taken for granted that is similar to its neighbour This book compares two countries that have the same historical roots and therefore many similar stories but at the same time offers insights into particular aspects of each country It is recommended for scholars and researchers interested in any field of history of the early modern period and of the nineteenth century as well as general readers interested in studies on the Iberian Peninsula since it was the role model for many settlements in South America Asia and Africa *Road Notes, Cuba. 1909* United States.
