Real Time Imaging:

Real-Time Image and Video Processing Nasser Kehtarnavaz, Mark Gamadia, 2022-06-01 This book presents an overview of the guidelines and strategies for transitioning an image or video processing algorithm from a research environment into a real time constrained environment Such guidelines and strategies are scattered in the literature of various disciplines including image processing computer engineering and software engineering and thus have not previously appeared in one place By bringing these strategies into one place the book is intended to serve the greater community of researchers practicing engineers industrial professionals who are interested in taking an image or video processing algorithm from a research environment to an actual real time implementation on a resource constrained hardware platform These strategies consist of algorithm simplifications hardware architectures and software methods Throughout the book carefully selected representative examples from the literature are presented to illustrate the discussed concepts After reading the book the readers are exposed to a wide variety of techniques and tools which they can then employ to design a real time image or video processing system Real-time Imaging ,2004 *Real-time Imaging* Phillip A.
